RoadMap-N. Dean Meyer 1998 People want to do a good job. But much too often, the organizational environment in which they work gets in their way. At a minimum, this can waste people's talents & energies, & put impossible loads on executives. At worst, it can induce people to perform poorly, work at cross purposes, fight with one another, & burn out. Meanwhile, organizations are facing tough challenges from competition & a volatile, complex business environment. If everyone in an organization isn't doing everything possible to assure its success, the organization is doomed to mediocrity or even failure. The book describes a straightforward approach to building healthy organizations -- ones in which everyone's talents are fully engaged & their independent actions are well orchestrated. It is a handbook for executives who are disappointed with quick fixes, jaded about management fads, & fed up with solving the same problems day after day... for leaders who are tired of fighting alligators & ready to drain the swamp.

Improving Diagnosis in Health Care-National Academies of Sciences, Engineering, and Medicine 2016-01-29 Getting the right diagnosis is a key aspect of health care - it provides an explanation of a patient's health problem and informs subsequent health care decisions. The diagnostic process is a complex, collaborative activity that involves clinical reasoning and information gathering to determine a patient's health problem. According to Improving Diagnosis in Health Care, diagnostic errors--inaccurate or delayed diagnoses--persist throughout all settings of care and continue to harm an unacceptable number of patients. It is likely that most people will experience at least one diagnostic error in their lifetime, sometimes with devastating consequences. Diagnostic errors may cause harm to patients by preventing or delaying appropriate treatment, providing unnecessary or harmful treatment, or resulting in psychological or financial repercussions. The committee concluded that improving the diagnostic process is not only possible, but also represents a moral, professional, and public health imperative. Improving Diagnosis in Health Care a continuation of the landmark Institute of Medicine reports To Err Is Human (2000) and Crossing the Quality Chasm (2001) finds that diagnosis--and, in particular, the occurrence of diagnostic errors--"has been largely unappreciated in efforts to improve the quality and safety of health care. Without a dedicated focus on improving diagnosis, diagnostic errors will likely worsen as the delivery of health care and the diagnostic process continue to increase in complexity. Just as the diagnostic process is a collaborative activity, improving diagnosis will require collaboration and a widespread commitment to change among health care professionals, health care organizations, patients and their families, researchers, and policy makers. The recommendations of Improving Diagnosis in Health Care contribute to the growing momentum for change in this crucial area of health care quality and safety.

What's Wrong With My Plant? (And How Do I Fix It?)-David Deardorff 2009-09-01 Dealing with a sick plant is one of the most frustrating situations a gardener can face. More often than not, we have no idea what is causing the problem, or how to fix it. Fortunately, help is at hand. What's Wrong With My Plant? (And How Do I Fix It?) provides an easy system for visually diagnosing any problem, and matching it to the right cure. This innovative and easy-to-use guide is split into three parts. Part One presents easy-to-follow, illustrated flow charts — organized by where on the plant the symptoms appear — that allow readers to accurately diagnose the problem. The format is so simple it doesn't even require knowing the name of the plant; all you need to know is whether the problem is affecting its roots, stem, flowers, or leaves. It does not matter whether the plant is a houseplant, perennial, vegetable, tree, or shrub. Part Two offers a 100% organic way to fix the problem. From improper growing conditions and environmental factors, to molds, pests, and diseases, every problem has a safe, natural solution. Part Three shows photographs and drawings of stressed, damaged, and diseased plants that help with accurate comparison. Whether your garden consists of herbs on a kitchen windowsill, a vegetable garden, an elaborate backyard border, or a container on a patio, What's Wrong With My Plant? is an indispensable resource. If you can see it, you can fix it. Curing a sick plant just doesn't get any easier.

The Autoimmune Fix-Tom O'Bryan 2016-09-20 Do you have crud in the blood? Millions of people suffer from autoimmunity whether they know it or not. The root cause of most weight gain, brain and mood problems, and fatigue, autoimmunity can take years--or even decades--for symptoms and a clear diagnosis to arise. Through years of research, Dr. Tom O'Bryan has discovered that autoimmunity is actually a spectrum, and many people experiencing general malaise are already on it. And while autoimmune diseases, such as Alzheimer's, Multiple Sclerosis, osteoporosis, diabetes, and lupus, have become the third leading cause of death behind heart disease and cancer, many people affected are left in the dark. The good news is that many autoimmune conditions can be reversed through a targeted protocol designed to heal the autoimmune system, 70 percent of which is located in the gut. The Autoimmune Fix includes two comprehensive 3-week plans: In the first 3 weeks, you'll follow a Paleo-inspired diet during which you cut out gluten, sweets, and dairy--the three primary culprits behind autoimmunity. Once the dietary changes have been addressed, The Autoimmune Fix focuses on the other causes of autoimmunity such as genetics, other dietary issues, and microbiome. The Autoimmune Fix provides a practical and much-needed guide to navigating these increasingly common conditions to help you feel better and develop a plan that works for you.

The Fatburn Fix-Catherine Shanahan, M.D. 2020-03-24 A proven plan to optimize your health by reclaiming your natural ability to burn body fat for fuel The ability to use body fat for energy is essential to health—but over decades of practice, renowned family physician Catherine Shanahan, M.D., observed that many of her patients could not burn their body fat between meals, trapping them in a downward spiral of hunger, fatigue, and weight gain. In The Fatburn Fix, Dr. Shanahan shows us how industrially produced vegetable oils accumulate in our body fat and disrupt our body’s energy-producing systems, driving food addictions that hijack our moods and habits while making it nearly impossible to control our weight. To reclaim our health, we need to detoxify our body fat and help repair our “fatburn” capabilities. Dr. Shanahan shares five important rules to fix your fatburn: 1) Eat natural fats, not vegetable oils. 2) Eat slow-digesting carbs, not starchy carbs or sweets. 3) Seek salt. 4) Drink plenty of water. 5) Supplement with vitamins and minerals. She then provides a revolutionary, step-by-step plan to help reboot your fatburn potential in as little as two weeks. This customizable two-phase plan is widely accessible, easy to follow, and will appeal to the full spectrum of diet ideologies, from plant-based to carnivore to keto and beyond.
