FAT BURNING SECRETS- Tired of hiding your muffin top under layers of clothing? You are not alone. About one- third of American adults are overweight. Now is the time to transform your soft, flabby body into the toned, sexy physique of your dreams. Forget yo-yo diets and easy weight loss promises that leave you feeling like a fat failure. It is possible to have a lean, traffic stopping body you can’t wait to show off. You’ve stumbled upon the fat burning secrets television gurus don’t want you to know about. Get ready to throw your fat clothes aw ay for good. It’s vital to know how fat is deposited in the body, so you have an understanding of how to make the body lose it. Your body needs food to acquire the necessary energy to function and feed its cells. The calories in food have energy commonly referred to as calories. The more calories the food contains the more fuel the body can acquire from it. In order to use the foods energy, your body must first digest the food. The process of digestion causes the body to burn some old energy to get the new energy from the food. The more difficult it is to digest the food, the more energy/calories are burned. The body’s fuel is categorized as protein, carbohydrates or fats. This fuel nourishes the body and keeps the body functioning. The left over calories are eventually stored in the fat cells. Your body uses a part of the foods fuel for nutrition. The excess fuel is eventually stored up as fat in the “fat cells” of your body, around the kidneys and liver. Fat cells are often deposited in the chest, hips and waist region. As the cells become bigger, your physique acquires a doughy look. The body has a limited number of fat cells, and there is only so much fat these cells can store. Once the threshold is reached, fat begins to accumulate in the muscle lining of your arms and thighs, creating unsightly, flabby limbs. All foods can cause fat creation, but certain foods actually help burn fat. Some foods have minerals or vitamins that raise metabolism and act as virtual fat burners. There are negative calorie foods with low calories that burn extra calories during digestion. Other foods, even eaten in small quantities, deliver a feeling of fullness with very little calories. Sticking to the right whole foods will drastically reduce the fat profile of your body. By eating these fat burning foods at the right time, in the correct amount, the body fat profile starts to reduce. Add in foods that lower the likelihood of fat depositing in your body for an extra boost. Here is a list of everyday foods that double as secret fat burners. Poultry Poultry such as chicken has special assets that increase the bod’s metabolic rate, helping you melt extra fat away. Chicken is low in fat and carbohydrates with a good protein profile. Proteins require a lot of energy to digest, and more energy for proteins to be stored as fat. It is also a great source of iron, zinc, and niacin. For best results, remove the skin from poultry before eating to avoid excess fat. Salmon & Tuna Salmon and tuna are good sources of protein that provides the body with healthy fats from omega-3 and omega-6 fatty acids. Both meaty fish, while satisfying, are also low in calories and unhealthy saturated fat. Eating salmon positively effects leptin, the hormone responsible for burning and storing calories. High leptin levels cause the body to store fat. Salmon and tuna reduce leptin, giving your metabolism the boost it needs to burn calories. Other Lean Protein As with other proteins, research has shown the thermic effect of protein is the most of all th e macronutrients. Protein require approximately 30% of its’ calories for digestion and processing. Lean proteins also suppress the appetite reducing the tendency to overeat. Though poultry has a lower fat profile, lean red meats such as top round, lean sirloin, game and other white meat have a place in a fat burning diet. Eating the right food will kick your metabolism into high gear and help you burn unwanted fat. Combine fat burning foods with these fat boosters to push your metabolism into overdrive. Mustard Tiny mustard seeds are packed with nutrition including: the amino acid tryptophan, omega 3 fatty acids, selenium, phosphorus, manganese, magnesium, calcium, iron, niacin and zinc. They even have a bit of protein and fiber. The spicy Asian and Mexican varieties temporarily speed up the metabolism like ephedrine or caffeine in a safe, natural way. Adding spicy mustard delivers zest to your food and a nice fat loss boost. Onions Onions are aromatic, flavorful and low in calories. But, onions can also aid in weight loss. They are a source of a nutrient called chromium. Chromium is said to improve insulin and maintain stable blood sugar. So, onions help stop blood sugar crashes and the resulting case of the munchies. Coconut Oil Coconuts boost the body’s energy. Unlike margarine or shortening, coconut oil is full of medium chain fatty acids used as an immediate supply of fuel. Use coconut oil in your cooking to speed metabolism improve thyroid functioning and amplify fat burning. Hot Peppers The chemicals that give hot peppers their spice safely speeds up the heart rate. Some people are able to burn up to 1,000 more calories every day from eating peppers. Spicy foods like chilies and peppers trigger your body to burn fat. For their flavor and fat burning properties, hot peppers are one of the best diet foods.

The Fatburn Fix-Catherine Shanahan, M.D. 2020-03-24 A proven plan to optimize your health by reclaiming your natural ability to burn body fat for fuel! The ability to use body fat for energy is essential to health—but over decades of practice, renowned family physician Catherine Shanahan, M.D., observed that many of her patients could not burn their body fat between meals, trapping them in a downward spiral of hunger, fatigue, and weight gain. In The Fatburn Fix, Dr. Shanahan shows us how industrially produced vegetable oils accumulate in our body fat and disrupt our body’s energy-producing systems, driving food addictions that hijack our moods and habits while making it nearly impossible to control our weight. To reclaim our health, we need to detoxify our body fat and help repair our “fatburn” capabilities. Dr. Shanahan shares five important rules to fix your fatburn: 1) Eat natural fats, not vegetable oils. 2) Eat slow-digesting carbs, not starchy carbs or sweets. 3) Seek salt. 4) Drink plenty of water. 5) Supplement with vitamins and minerals. She then provides a revolutionary, step-by-step plan to help reboot your fatburn potential in as little as two weeks. This customizable two-phase plan is widely accessible, easy to follow, and will appeal to the full spectrum of diet ideologies, from plant-based to carnivore to keto and beyond. By making a few changes to what you eat and when, you will lose unwanted weight and restore your body’s ability to store and release energy. With The Fatburn Fix, Dr. Shanahan shows how regaining your fatburn is the key to effortless weight loss and a new, elevated life, paving the way to abundant energy and long-term health and happiness.

The Real Meal Revolution-Tim Noakes 2015-07-30 ‘Scientists labelled fat the enemy . . . they were wrong.’ Time magazine We’ve been told for years that eating fat is bad for us, that it is an primary cause of high blood pressure, heart disease and obesity. The Real Meal Revolution debunks this lie and shows us the way back to restored health through eating what human beings are meant to eat. This book will radically transform your life by showing you clearly, and easily, how to take control of not just your weight, but your overall health, too - through what you eat. And you can eat meat, seafood, eggs, cheese, butter, nuts . . . often the first things to be prohibited or severely restricted on most diets. This is Banting, or Low-Carb, High-Fat (LCHF) eating, for a new generation, solidly underpinned by years of scientific research and by now incontrovertible evidence. This extraordinary book, already a phenomenal bestseller, overturns the conventional dietary wisdom of recent decades that placed carbohydrates at the base of the supposedly healthy-eating pyramid and that has led directly to a worldwide epidemic of obesity and diabetes. Both a

startling revelation, and as old as humanity itself, it offers a truly revolutionary approach to healthy eating that explodes the myth, among others, that cholesterol is bad for us. This is emphatically not just another unsustainable, quick-fix diet or a fad waiting to be forgotten, but a long-delayed return to the way human beings are supposed to eat. The Real Meal Revolution is an ebook which maintains the design of the book, and as a result will not display correctly on some basic reading devices.

The New Rules of Lifting for Women-Lou Schuler 2008-12-26 In The New Rules of Lifting for Women, authors Lou Schuler, Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength, conditioning and nutrition plan destined to revolutionize the way women work out. All the latest studies prove that strength training, not aerobics, provides the key to losing fat and building a fit, strong body. This book refutes the misconception that women will "bulk up" if they lift heavy weights. Nonsense! It's tough enough for men to pack on muscle, and they have much more of the hormone necessary to build muscle: natural testosterone. Muscles need to be strengthened to achieve a lean, healthy look. Properly conditioned muscles increase metabolism and promote weight loss -- it's that simple. The program demands that women put down the "Barbie" weights, step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman. The New Rules of Lifting for Women will change the way women see fitness, nutrition and their own bodies.
