Alice's Adventures in Wonderland-Lewis Carroll 1958 Alice was beginning to get very tired of sitting by her sister on the bank, and of having nothing to do: once or twice she had peeped into the book her sister was reading, but it had no pictures or conversations in it, "and what is the use of a book," thought Alice "without pictures or conversation?" So she was considering in her own mind (as well as she could, for the hot day made her feel very sleepy and stupid), whether the pleasure of making a daisy-chain would be worth the trouble of getting up and picking the daisies, when suddenly a White Rabbit with pink eyes ran close by her. There was nothing so VERY remarkable in that; nor did Alice think it so VERY much out of the way to hear the Rabbit say to itself, 'Oh dear! Oh dear! I shall be late!' (when she thought it over afterwards, it occurred to her that she ought to have wondered at this, but at the time it all seemed quite natural); but when the Rabbit actually TOOK A WATCH OUT OF ITS WAISTCOAT-POCKET, and looked at it, and then hurried on, Alice started to her feet, for it flashed across her mind that she had never before seen a rabbit with either a waistcoat-pocket, or a watch to take out of it, and burning with curiosity, she ran across the field after it, and fortunately was just in time to see it pop down a large rabbit-hole under the hedge. In another moment down went Alice after it, never once considering how in the world she was to get out again. The rabbit-hole went straight on like a tunnel for some way, and then dipped suddenly down, so suddenly that Alice had not a moment to think about stopping herself before she found herself falling down a very deep well. Either the well was very deep, or she fell very slowly, for she had plenty of time as she went down to look about her and to wonder what was going to happen next. First, she tried to look down and make out what she was coming to, but it was too dark to see anything; then she looked at the sides of the well, and noticed that they were filled with cupboards and book-shelves; here and there she saw maps and pictures hung upon pegs. She took down a jar from one of the shelves as she passed; it was labelled 'ORANGE MARMALADE', but to her great disappointment it was empty: she did not like to drop the jar for fear of killing somebody, so managed to put it into one of the cupboards as she fell past it.

The Greedy Queen-Annie Gray 2018-05-03 From Dr Annie Gray, presenter of BBC2's Victorian Bakers What does it mean to eat like a queen? Elizabeth gorged on sugar, Mary on chocolate and Anne was known as 'Brandy Nan'. Victoria ate all of this and more. The Greedy Queen celebrates Victoria's appetite, both for food and, indeed, for life. Born in May 1819, Victoria came 'as plump as a partridge'. In her early years she lived on milk and bread under the Kensington system; in her old age she suffered constant indigestion yet continued to over-eat. From intimate breakfasts with the King of France, to romping at tea-parties with her children, and from state balls to her last sip of milk, her life is examined through what she ate, when and with whom. In the royal household, Victoria was surrounded by ladies-in-waiting, secretaries, dressers and coachmen, but below stairs there was another category of servant: her cooks. More fundamental and yet completely hidden, they are now uncovered in their working environment for the first time. Voracious and adventurous in her tastes, Queen Victoria was head of state during a revolution in how we ate - from the highest tables to the most humble. Bursting with original research, The Greedy Queen considers Britain's most iconic monarch from a new perspective, telling the story of British food along the way.

In the Days of Queen Elizabeth-Eva March Tappan 2015-10-11 "Now it is so, my Lady Elizabeth is put from that degree she was afere, and what degree she is at now, I know not but by hearsay. Therefore I know not how to order her myself, nor none of hers that I have the rule of, that is, her women and grooms, beseeching you to be good Lord to my good Lady and to all hers, and that she may have some raiment." The letter goes on to say that she has neither gown, nor slip, nor petticoat, nor kerchiefs, nor neckerchiefs, nor nightcaps, "nor no manner of linen," and ends, "All these her Grace must have. I have driven off as long as I can, that by my troth I can drive it off no longer. Beseeching ye, mine own good Lord, that ye will see that her Grace may have that which is needfull for her, as my trust is that ye will do." The little princess had a good friend in Lady Margaret Bryan, the "lady mistress" whom Queen Anne had put over her when, as the custom was, the royal baby was taken from her mother to dwell in another house with her own retinue of attendants and ladies in waiting. In this same letter the kind lady mistress ventured to praise the neglected child. She wrote of her:— "She is as toward a child and as gentle of condition as ever I knew any in my life. I trust the king's Grace shall have great comfort in her Grace." Lady Margaret told the chancellor that the little one was having "great pain with her great teeth." Probably the last thing that King Henry thought of was showing his daughter to the public or making her prominent in any way, but the lady mistress sturdily suggested that if he should wish it, the Lady Elizabeth would be so taught that she would be an honor to the king, but she must not be kept too long before the public, she must have her freedom again in a day or two.

Mrs. Brown in the Highlands, by Arthur Sketchley-George Rose 1869

Doomtalon-Daniel T. Hylton 2016-05-31 Long ago the immortals learned the secrets of magic, and acquired knowledge of the great mystical powers that turn the wheels of the universe. Many used this new and powerful knowledge only for the good of all while others saw the advantages of its darker side. Eventually, war broke out between the two factions. The ensuing terrible conflict between beings possessed of such enormous power destroyed their world, rendering it uninhabitable. Those that believed that magic existed for the good of all won that war, but only just. With their world destroyed, the few survivors built a great ship and set sail upon the seas of stars, searching for a new world to call home. At the last, they came to earth. With humanity already in place, the race of immortals settled as mentors, guiding the race of humanity upward from savagery toward civilization. Some even took to themselves human mates, engendering a race of mighty kings. But there were those immortals, born upon the earth of pure blood, who despised the role of mentor and desired dominance. The greatest of these was a master wizard named Dagrun. Having delved deep into magic's darker aspects, Dagrun at last believed himself invincible, and precipitated war among humans. At the last, his minions having defeated the forces of the king, he went himself into the royal palace at Avnazor and slew the royal family, destroying the line of kings. When the greatest wizard of that time, Master Ayrfel, learned of this treachery, he rose up in wrath to withstand Dagrun. The battle between them raged far and wide, and at the end both were mortally wounded. Both fled away from all sight and knowledge to die alone, as is the way of wizards. Now, more than a thousand years later, war has again broken out across the face of the earth. And once more, the forces of great darkness, the darkness of magic, appear to be involved. At the capital city of Ghiron, the queen faces the destruction of her city and of her people. The writings of an ancient mystical seer states that a savior, the unknown prince, will arrive to save her and push back the forces of darkness. But will he arrive too late, when there is nothing left to save? Adaster, the only immortal left upon the earth who seeks to act in the interest of good, has looked for the unknown prince for centuries. Will he come?

The 100 Greatest Lies in Physics-Ray Fleming 2017-03-15 The 100 Greatest Lies in physics is a follow-up to Ray Fleming's The Zero-Point Universe as he continues to explore the importance of zero-point energy to modern physics. Since before the start of this century, evidence has mounted that space is not empty. Space is filled with quantum vacuum fluctuations called zero-point energy, and this energy is a modern form of aether. Most of the physics of the past century, which led to today's standard model, fails to account for this modern aether. In relativity theory there are two types of relativity, one that includes aether and one that rejects it. Physicists choose poorly and wrongly champion the theory that rejects the modern aether. Even though many theories like this are now known to be invalid, physicists still cling to the physics of the past. The mainstream physics of the last century is a complete disaster due to physicists' failure to incorporate zero-point energy into their explanations of forces and every day phenomena. The 100 Greatest Lies in Physics catalogs many of the most outrageous mistakes in physics in hopes that physicists will do their jobs and stop lying to everyone.
