Dinosaurs-Donald F. Glut 2016-03-03 This reference work is the seventh supplement to Dinosaurs: The Encyclopedia (a 1998 American Library Association Outstanding Reference Book) and follows the intent and format of the encyclopedia and previous supplements. This supplement, as did its predecessors, offers primarily new information based upon the more recent research of vertebrate paleontologists; also, it corrects previously errors that may have crept into earlier volumes and emends outdated information. Among the many dramatic events discussed and updated are the first record of a dinosaur of any kind from Bulgaria, the first evidence of cannibalism in the genus Tyrannosaurus, the first evidence suggesting that some of the most avian dromaeosaurid theropods might have been venomous, the oldest known dinosaurian embryonic specimens recovered to date, and the first relatively complete dinosaur described from Korea. Supplemental volumes do not repeat information from earlier volumes, but build upon them:ISBN 978-0-7864-7222-2 Original EncyclopediaISBN 978-0-7864-0591-6 Supplement 1ISBN 978-0-7864-1166-5 Supplement 2ISBN 978-0-7864-1518-2 Supplement 3ISBN 978-0-7864-2295-1 Supplement 4ISBN 978-0-7864-3241-7 Supplement 5ISBN 978-0-7864-4187-7 Supplement 6ISBN 978-1-4766-6548-1 Supplement 7

Dinosaur Data Book-David Lambert 1989 This illustrated encyclopaedia of prehistoric reptiles and dinosaurs features over 1000 alphabetical entries. Topics discussed include the origins, evolution and extinction of dinosaur species, relationships between dinosaur groups, and the excavation and reconstruction of dinosaur remains. There is a biography of dinosaur discoverers, expeditions and model-makers, an alphabetical listing of films, novels and stories featuring dinosaurs, and a complete portrait of the characteristics of dinosaurs: their size and mass, bones, muscles, brain, skin, teeth, speed, and daily habits.

The Illustrated Encyclopedia of Dinosaurs & Prehistoric Creatures-Barry Cox 2011-09-15 An unmatched reference work distinguished by its erudition and beauty, this volume is an illustrated who's who of prehistoric life, a Baedeker of more than 500 million years of evolution on Earth. With entries for more than 600 species, each arranged in its evolutionary sequence, this book presents a panorama of enormous diversity, from predatory dinosaurs to primitive amphibians, from giant armored fish to woolly mammoths, sabertooth tigers and dire wolves. Each entry features a specially commissioned full color painting prepared according to the best research of today in close collaboration with world renowned paleontologists. The records of rocks--fossil bones, teeth, skin, hair and even footprints and nests--have been combined with knowledge of the anatomy and behavior of present day descendants to arrive at informed judgments about posture, color and other aspects of appearance. Lively and informative "biographies" of the creatures accompany these remarkable illustrations: how they moved, what they ate, where they ranged and the habitats and ecological niches they occupied. Comparisons are made wherever possible with familiar living animals, highlighting both the contrasts and similarities. Also included are articles on subjects such as the time scale of evolution, fossil formation and interpretation and convergent evolution. Truly a magnificent sourcebook, The Illustrated Encyclopedia of Dinosaurs and Prehistoric Creatures is both a triumph of scholarship and a work of art.

A Field Guide to Dinosaurs-Henry Gee 2012-01-30 Sensational discoveries during the past decade have shed new light on the most intimate details of dinosaurs' lives, including their appearance and behavior, their family structures, and their sex lives. The latest dinosaur findings present a far more vivid and complete picture of this extraordinarily successful group of animals than would have been thought possible only a few years ago. Recent findings in South America, Madagascar, Mongolia, China, and Australia have revealed the existence of amazing and exotic dinosaurs. Paleontologist Henry Gee and artist Luis Rey have seamlessly integrated all of the most recent discoveries in the making of this unique book. In A Field Guide to Dinosaurs, Renowned dinosaur artist Luis V. Rey and paleontologist and writer Henry Gee use up-to-the-minute research findings to paint a vivid picture of the dinosaurs' world. Their unique approach gives readers lifelike portrayals of dinosaurs similar to that of naturalists in the wild, observing living animals of our own era. Readers will experience dinosaurs as living, breathing creatures, with each kind described "from the field" and shown in breathtaking illustrations. Dinosaur physiology is shown in full-color paintings, anatomical sketches, and a host of fascinating incidental detail, much of it never published outside specialist journals. Readers will understand the dinosaurs' environment in terms of the world's changing face throughout the 180-million-year extent of the dinosaur-dominated Mesozoic Era, with a detailed, full-color chart that relates the time span of each dinosaur group. The book also includes at-a-glance icons that convey information about different dinosaur groups, including size, taxonomy, geological period, and geographical origins.
