Ethics for Behavior Analysts-Jon Bailey 2006-04-21 Behavior analysis, a rapidly growing profession, began with the use and application of conditioning and learning techniques to modify the behavior of children or adults presenting severe management problems, often because of developmental disabilities. Now behavior analysts work in a variety of settings, from clinics and schools to workplaces. Especially since their practice often involves aversive stimuli or punishment, they confront many special ethical challenges. Recently, the Behavior Analyst Certification Board codified a set of ten fundamental ethical guidelines to be followed by all behavior analysts and understood by all students and trainees seeking certification. This book shows readers how to follow the BACB guidelines in action. The authors first describe core ethical principles and then explain each guideline in detail, in easily comprehensible, everyday language. The text is richly illuminated by more than a hundred vivid case scenarios about which the authors pose, and later answer questions for readers. Useful appendices include the BACB Guidelines, an index to them, practice scenarios, and suggested further reading. Practitioners, instructors, supervisors, students, and trainees alike will welcome this invaluable new aid to professional development.

Global Health Research in an Unequal World-Gemma Aallah 2016-09-14 This book is a collection of

fictionalized case studies of everyday ethical dilemmas and challenges, encountered in the process of conducting global health research in places where the effects of political and economic inequality are particularly evident. It is a training tool to fill the gap between research ethics guidelines and their implementation "on the ground." The cases focus on "relational" ethics: ethical actions and ideas that continuously emerge through relations with others, rather than being determined by bioethics regulation. They are based on stories and experiences collected by a group of social anthropologists who have worked with leading transnational medical research organizations across Africa in the past decade. Accompanied by guidelines, discussion questions and selected further readings, the book provides a flexible resource for training and self-study for people engaged in health research with universities, international collaborative sites and NGOs and for everyone interested in the realities of global health research today."

The Moral Case for Fossil Fuels-Alex Epstein 2014-11-13 Could everything we know about fossil fuels be wrong? For decades, environmentalists have told us that using fossil fuels is a self-destructive addiction that will destroy our planet. Yet at the same time, by every measure of human well-being, from life expectancy to clean water to climate safety, life has been getting better and better. How can this be? The explanation, energy expert Alex Epstein argues in *The Moral Case for Fossil Fuels*, is that we usually hear only one side of the story. We're taught to think only of the negatives of fossil fuels, their risks and side effects, but not their positives—their unique ability to provide cheap, reliable energy for a world of seven billion people. And the moral significance of cheap, reliable energy, Epstein argues, is woefully underrated. Energy is our ability to improve every single aspect of life, whether economic or environmental. If we look at the big picture of fossil fuels compared with the alternatives, the overall impact of using fossil fuels is to make the world a far better place. We are morally obligated to use more fossil fuels for the sake of our economy and our environment. Drawing on original insights and cutting-edge research, Epstein argues that most of what we hear about fossil fuels is a myth. For instance . . . Myth: Fossil fuels are dirty. Truth: The environmental benefits of using fossil fuels far outweigh the risks. Fossil fuels don't take a naturally clean environment and make it dirty; they take a naturally dirty environment and make it clean. They don't take a naturally safe climate and make it dangerous; they take a naturally dangerous climate and make it ever safer. Myth: Fossil fuels are unsustainable, so we should strive to use "renewable" solar and wind. Truth: The sun and wind are intermittent, unreliable fuels that always need backup from a reliable source of energy—usually fossil fuels. There are huge amounts of fossil fuels left, and we have plenty of time to find something cheaper. Myth: Fossil fuels are hurting the developing world. Truth: Fossil fuels are the key to improving the quality of life for billions of people in the developing world. If we withhold them, access to clean water plummets, critical medical machines like incubators become impossible to operate, and life expectancy drops significantly. Calls to "get off fossil fuels" are calls to degrade the lives of innocent people who merely want the same opportunities we enjoy in the West. Taking everything into account, including the facts about climate change, Epstein argues that "fossil fuels are easy to misunderstand and demonize, but they are absolutely good to use. And they absolutely need to be championed. . . . Mankind's use of fossil fuels is supremely virtuous—because human life is the standard of value and because using fossil fuels transforms our environment to make it wonderful for human life."

Heard-Dale Van Steenis 2011-08-01 NOTE: This is the small group, companion workbook for "Heard: The Power and Promise of Christian Prayer." It divides the material in "Heard" into six study sessions, each containing a mix of fill-in-the-blank and questions for individual reflection and group discussion. DESCRIPTION OF "HEARD: " God is waiting for his people to pray. But the contemporary Western Church is blighted by a prayer famine. It is plagued with dry eyes, few tears and no fire in the gut. Conversation with God ought to be a part of the natural rhythm of our lives, like eating or sleeping, yet we have neglected this most basic need. Our churches have kept us so busy with activities, carefully-crafted music presentations and non-offensive preaching that we are often too tired to pray, and impatient when we do. As a result, altars are vacant, church members come in and go out the same, the local culture remains unchanged. Dale Van Steenis calls us to recapture our energy and excitement, to catch our "second wind" in prayer. God still answers. He said he would. Whenever God's people have turned to him in prayer, they have been heard.

Guest commentators (each a well-known and highly recognized practitioner) discuss Ruth's case based on their perspectives.
