This transformation in popular culture is based on excavations at one profoundly important site in China- Liaoning. Unearthing the Changes-Edward L. Shaughnessy 2014-04-15 In recent years, three ancient manuscripts relating to the Yi jing (I Ching), or Classic of Changes, have been discovered. The earliest—the Shanghai Museum Zhou Yi—dates to about 300 B.C.E. and shows evidence of the text's original circulation. The Guicang, or Returning to Be Stored, reflects another ancient Chinese divination tradition based on hexagrams similar to those of the Yi jing. In 1993, two manuscripts were found in a third-century B.C.E. tomb at Wangjiatai that contain almost exact parallels to the Guicang's early quotations, supplying new information on the performance of early Chinese divination. Finally, the Fuyang Zhou Yi was excavated from the tomb of Xia Hou Zao, lord of Ruyin, who died in 165 B.C.E. Each line of this classic is followed by one or more generic prognostications similar to phrases found in the Yi jing, indicating exciting new ways the text was produced and used in the interpretation of divinations. Unearthing the Changes details the discovery and significance of the Shanghai Museum Zhou Yi, the Wangjiatai Guicang, and the Fuyang Zhou Yi, including full translations of the texts and additional evidence constructing a new narrative of the Yi jing's writing and transmission in the first millennium B.C.E. An introduction situates the role of archaeology in the modern attempt to understand the Classic of Changes. By showing how the text emerged out of a popular tradition of divination, these newly unearthed manuscripts reveal an important religious dimension to its evolution.

Dragon's Jaw-Stephen Coonts 2019-05-14 A riveting Vietnam War story—and one of the most dramatic in aviation history--told by a New York Times bestselling author and a prominent aviation historian Every war has its "bridge"--Old North Bridge at Concord, Burnside's Bridge at Antietam, the railway bridge over Burma's River Kwai, the bridge over Germany's Rhine River at Remagen, and the bridges over Korea's Toko Ri. In Vietnam it was the bridge at Thanh Hoa, called Dragon's Jaw. For seven long years hundreds of young US airmen flew sortie after sortie against North Vietnam's formidable and strategically important bridge, dodging a heavy concentration of anti-aircraft fire and enemy MiG planes. Many American airmen were shot down, killed, or captured and taken to the infamous "Hanoi Hilton" POW camp. But after each air attack, when the smoke cleared and the debris settled, the bridge stubbornly remained standing. For the North Vietnamese it became a symbol of their invincibility; for US war planners an obsession; for US airmen a testament to American mettle and valor. Using after-action reports, official records, and interviews with surviving pilots, as well as untapped Vietnamese sources, Dragon's Jaw chronicles American efforts to destroy the bridge, strike by bloody strike, putting readers into the cockpits, under fire. The story of the Dragon's Jaw is a story rich in bravery, courage, audacity, and sometimes luck, sometimes tragedy. The "bridge" story of Vietnam is an epic tale of war against a determined foe.
