Handbook of Innovative Career Counselling-

Jacobus G. Maree 2019-07-20 This book examines a topic widely regarded as the most pressing in career counselling today, i.e., how to ensure that everyone receives career counselling and that all workers have the opportunity to engage in sustainable, decent work. The author holds that career counselling should not only advance workers' self- and career construction, helping them design successful career-lives and make social contributions, and live purposeful lives - it should also expound new theoretical approaches and interventions. Furthermore, the book criticizes global society for overlooking the basic needs of many workers, especially the most vulnerable and disadvantaged. An important feature of the book is its emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career-related questions. It offers guidance on how to advance entrepreneurship and help workers develop critical thinking, curiosity, creativity, collaboration, and communication skills. In this way the book promotes innovation in career counselling and maps the way forward in a theoretical and practical manner that helps clients 'flourish' rather than merely 'survive' in turbulent times impacted by the fourth wave in psychology, career counselling, the economy, as well as the 4th industrial revolution (Work 4.0).

Strengths-Based School Counseling-John P. Galassi 2017-07-05 Despite calls for a more preventive and developmental mode of functioning, school counseling has tended to be

driven by a reactive and sometimes crisis orientation. Like social workers and school, counseling, and clinical psychologists, school counselors typically function to alleviate deficits, often in a small percentage of the students they serve. Although this orientation has served school counselors well in many instances, it is not empowering, it does not serve all students, and it does not replace those deficits with the type of positive characteristics and abilities that schools are attempting to develop. This is the first book to provide a comprehensive look at the theory, research, and intervention strategies that comprise a strengths-based, developmental approach to school counseling. In keeping with ASCA recommendations, the Strengths-Based School Counseling (SBSC) framework discusses academic, personal/social and career development outcomes for all students at the elementary, middle and secondary school levels. Other key features include: integrative framework SBSC builds upon contemporary research from a variety of areas: school counseling, developmental psychology, school psychology, education, positive psychology, resiliency, and social work. evidence-based interventions detailed examples of successful evidence-based interventions and environments are presented at the elementary, middle, and high school levels for each major developmental area (academic, personal/social, and career) identified in ASCA's National Model. readability and pedagogy beautifully written, the text includes lists of key points, tables of student strengths, illustrative examples, and student exercises.

The Psychology of Working-David Blustein 2013-01-11 In this original and major new work, David Blustein places working at the same level of attention for social and behavioral scientists and psychotherapists as other major life concerns, such as intimate relationships, physical and mental health, and socio-economic inequities. He also provides readers with an expanded conceptual framework within which to think about working in human development and human experience. As a result, this creative new synthesis enriches the discourse on working across the broad spectrum of psychology's concerns and agendas, and especially for those readers in career development, counseling, and policy-related fields. This textbook is ideal for use in graduate courses on counseling and work or vocational counseling.

Interventions in Career Design and Education

Valérie Cohen-Scali 2018-10-16 This book is the product of a series of reflections by career counseling and guidance specialists on a question central to society: "How can career and life design interventions contribute to fair and sustainable development and to the implementation of decent work all over the world? ". This question was formulated by Professor J. Guichard, the director of the UNESCO Chair in Lifelong Guidance and counseling at the University of Wroclaw, Poland. The researchers involved in this Chair's activities proposed answers which form the chapters of this book. These reflections emphasize the need to focus on the study and implementation of certain central psychological processes which can enable individuals to face the main challenges of our society. The contributions also propose new avenues of intervention for career counseling and guidance. The entire book is the bedrock of a program of research and interventions to be implemented in order that the field of career counseling and guidance plays a key role for individuals who must design their lives in a rapidly changing, and ever more complex context. This book is therefore a major scientific contribution and marks a turning point for researchers and practitioners in career counseling and guidance, and for all professionals who support the self-construction of individuals in the 21st century. "The authors draw on a diverse range of disciplines and research traditions and offer readers a rich array of insights, helping them reflect on how career guidance can be mobilised to serve citizens in a world that is increasingly challenged by complex, seemingly intractable problems. A central, crosscutting concern is the ways in which career guidance can foster well-being by facilitating access to meaningful and fulfilling work in contexts that promote equity, social justice, and dignity for all. While engaging the micro-worlds of individuals, and throwing light on their valiant efforts to design a life that realises their hopes and aspirations, it is a commendable feature of many of these papers that they do not eschew the societal - indeed planetary - stage across which personal dramas are enacted." Prof. Ronald G. Sultana, Director, Euro-Mediterranean Centre for Educational Research, University of Malta. "The primary strengths.....are the authors' capacity to provide forward thinking perspectives on the

important issue of sustainable lifelong interventions and career design in its broadest sense. The volume offers depth in a way of thinking that is pertinent to the 21st century and provokes both an interest in the further study of this domain as well as providing tools and references for novice and experienced researchers and professionals. The book is sure to become a major text in the field." Prof. Maurice Taylor, Faculty of Education, University of Ottawa, Canada

Career Development and Systems Theory

Wendy Patton 2014-05-12 Career Development and Systems Theory: Connecting Theory and Practice offers practitioners, researchers and students a comprehensive introduction to, and overview of, career theory; introduces the Systems Theory Framework of career development; and demonstrates its considerable contemporary and innovative application to practice. A number of authors have identified the framework as one of a small number of significant innovations in the career development literature. The Systems Theory Framework of career development was developed to provide coherence to the career development field by providing a comprehensive conceptualisation of the many existing theories and concepts relevant to understanding career development. It is not designed to be a theory of career development; rather systems theory is introduced as the basis for an overarching, or metatheoretical, framework within which all concepts of career development, described in the plethora of career theories, can be usefully positioned and utilised in both theory and practice. It has been applied to the career development of children, adolescents and women. Since its first publication, the Systems Theory Framework has been the basis of numerous publications focusing on theoretical application and integration, practice and research, with a growing number of these by authors other than the framework developers. Its application across cultures also has been emphasised. The theoretical and practical unity of the Systems Theory Framework makes this book a worthy addition to the professional libraries of practitioners, researchers and students, new to, or experienced

in, the field of career development.

Developing Self in Work and Career-Paul J. Hartung 2011 Human beings possess the unique psychological ability to self-reflect. Few human experiences and behaviors define the self and allow us to characterize ourselves within the social world more than work and career. The pressing economic and social conditions of the information and globalization age require workers to be more self-directed by managing their own work lives, rather than solely relying on organizations to support them. Given these shifting occupational structures, it is time to reassess the long-standing emphasis on fitting workers to jobs and move toward empowering them to adapt to change. In this volume, leading scholars and practitioners examine the construct of self through vocational psychology and career development topics centered on theory, assessment, and intervention. Chapters in Part I consider predominant theoretical models of career choice and development, such as person-environment fit, developmental, sociocognitive-behavioral, and constructionist perspectives. In Part II, contributors offer counseling methods rooted in these theoretical models and in contemporary industrial and organizational psychology to foster self-construction through work and career. In the final part, authors

examine contextual dimensions of gender, culture, and socioeconomic class to investigate how self is constructed in relation to our social world. By exploring theories of career choice and development and their related counseling practices, practitioners can more effectively meet the needs of a rapidly changing global workforce.

Field Trials of Health Interventions-Richard H. Morrow 2015-06-11 Before new interventions can be used in disease control programmes, it is essential that they are carefully evaluated in "field trials", which may be complex and expensive undertakings. Descriptions of the detailed procedures and methods used in trials that have been conducted in the past have generally not been published. As a consequence, those planning such trials have few guidelines available and little access to previously accumulated knowledge. In this book the practical issues of trial design and conduct are discussed fully and in sufficient detail for the text

to be used as a "toolbox" by field investigators. The toolbox has now been extensively tested through use of the first two editions and this third edition is a comprehensive revision, incorporating the many developments that have taken place with respect to trials since 1996 and involving more than 30 contributors. Most of the chapters have been extensively revised and 7 new chapters have been added.
