Child Health Nursing-Jane W. Ball 2018-04-23 For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Pragmatic Children's Nursing-Duncan C. Randall 2015-10-08 Pragmatic Children's Nursing is the first attempt to create a paediatric nursing theory which argues for the importance of giving children living with illness access to a childhood which is, as far as possible, equal to that of their peers. Set in the historical context of the development of children's nursing, this theory is presented in detail as an educational process, complete with eight outcome measures which allow the practitioner to evaluate its effectiveness. This book explores the triad relationship between children, carers and nurses within the context of healthcare delivery. Ht analyses the moral and ethical implications of pragmatic children's nursing, which challenges the established ideas of family-centred care. In addition to offering theoretical grounding and debate, Randall presents four practical case studies which model how this theory may work within various hospital and community settings. Establishing a link between the concepts inherent in pragmatism and our understanding of childhood within society, this accessible book will appeal to a global audience of undergraduate and postgraduate nursing students, researchers and policy makers. Discover more about this subject on our author Duncan C. Randall's website, which provides extra resources and information here: <http://pragmaticchildrensnursing.com/>

Introduction to Maternity & Pediatric Nursing - E-Book-Gloria Leifer 2013-11-28 Part of the popular LPN Threads series, Introduction to Maternity & Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy-to-follow organization by developmental stages, discussion of disorders by body system from simple-to-complex and health-to-illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX® test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Guided Participation in Pediatric Nursing Practice-Dr. Karen Pridham, PhD, RN, FAAN 2018-05-28 The first book about Guided Participation written for nurses This authoritative publication delivers an in-depth examination of Guided Participation (GP), a dynamic process of teaching and learning that parents and guardians have used for generations to help their charges become self-reliant. GP is helping another person become competent by providing expertise working alongside the learner. For the nurse specifically, this means educating and working alongside parents and children within an environment that supports health. Consistent with client- and family-centered practice, this fresh approach to nurse/client teaching is drawn a broad span of disciplines, including education, social and cultural anthropology, relationship-based attachment-caregiving theory, and developmental science. Written for students and practitioners who wish to incorporate GP into their practice, and for managers, administrators, and policy makers who support its implementation, this resource demonstrates the value of GP as a new and emerging

health care model that integrates care across health care settings. The text describes, step-by-step, how to practice GP discusses support systems to maintain GP past the initial treatment. With abundant case studies, examples and research findings, chapters analyze how GP can promote health, prevent acute and chronic illness, and adjust old patterns of living and behaviors. Key Features: Includes video clips that illustrate how guided participation is applied in a variety of clinical practice settings Provides access to self-directed online instruction Links to online journal, case studies, additional chapters, and references Features downloadable parent checklists and teaching guides Discusses effective application of Guided Participation to all aspects of pediatric nursing care in a variety of practice settings Includes numerous case studies and examples with specific components identified to help readers learn theory and related concepts Learn to apply guided participation by joining the case-based online course offered at University of Wisconsin-Madison!
