The Nursing Assistant-JoLynn Pulliam 2011-08 The Nursing Assistant, Fifth Edition is a concise, practical, affordable, and up-to-date guide to the skills today's nursing assistants need to master. It is designed both to serve as the basis of any nursing assistant training program, and to prepare students for careers in acute, subacute, or long-term care. It addresses the needs of the whole patient or resident, while promoting independence and self-care. Carefully organized to follow nursing process models, state curricula, and OBRA mandates, it walks through 75 step-by-step procedures reflecting the most common nursing assistant tasks. This edition is fully updated for the newest CDC and OSHA guidance for hand cleaning and infection control, and to reflect other relevant federal laws, including HIPAA.

Nursing Staff in Hospitals and Nursing Homes-Committee on the Adequacy of Nursing Staff in Hospitals and Nursing Homes 1996-04-10 Hospitals and nursing homes are responding to changes in the health care system by modifying staffing levels and the mix of nursing personnel. But do these changes endanger the quality of patient care? Do nursing staff suffer increased rates of injury, illness, or stress because of changing workplace demands? These questions are addressed in Nursing Staff in Hospitals and Nursing Homes, a thorough and authoritative look at today's health care system that also takes a long-term view of staffing needs for nursing as the nation moves into the next century. The committee draws fundamental conclusions about the evolving role of nurses in hospitals and nursing homes and presents recommendations about staffing decisions, nursing training, measurement of quality, reimbursement, and other areas. The volume also discusses work-related injuries, violence toward and abuse of nursing staffs, and stress among nursing personnel—and examines whether these problems are related to staffing levels. Included is a readable overview of the underlying trends in health care that have given rise to urgent questions about nurse staffing: population changes, budget pressures, and the introduction of new technologies. Nursing Staff in Hospitals and Nursing Homes provides a straightforward examination of complex and sensitive issues surround the role and value of nursing on our health care system.

Matteson & McConnell's Gerontological Nursing-Adrienne Dill Linton 2007 Matteson & McConnell's Gerontological Nursing, 3rd Edition provides comprehensive, research-based information on nursing care of older adults. Beginning with the basics, the text uses a systems approach to describe the aging process from wellness to illness. It also describes physiological and psychological aspects of aging in detail, as well as assessment and practice in all settings using the nursing process. Each chapter incorporates a research and theory-based approach to the aging process. Content is comprehensive and focuses on caring for the older adult. The text examines the differences between normal aging conditions and clinical problems/conditions. Competencies and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment, including addressing communication issues, both verbal and non-verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. Reflections boxes written by experts across different nursing fields share personal experiences related to the chapters' content. Toward Better Health boxes provide key considerations for promoting healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient. Age-Related Changes boxes detail the ways in which particular body systems are affected by the aging process. New chapters on End of Life Care, Evidence-Based Practice, and Assisted Living Care give the reader a more comprehensive look at gerontological nursing care.

Improving the Quality of Long-Term Care-Institute of Medicine 2001-02-27 Among the issues confronting America is long-term care for frail, older persons and others with chronic conditions and functional limitations that limit their ability to care for themselves. Improving the Quality of Long-Term Care takes a comprehensive look at the quality of care and quality of life in long-term care, including nursing homes, home health agencies, residential care facilities, family members and a variety of others. This book describes the current state of long-term care, identifying problem areas and offering recommendations for federal and state policymakers. Who uses long-term care? How have the characteristics of this population changed over time? What paths do people follow in long term care? The committee provides the latest information on these and other key questions. This book explores strengths and limitations of available data and research literature especially for settings other than nursing homes, on methods to measure, oversee, and improve the quality of long-term care. The committee makes recommendations on setting and enforcing standards of care, strengthening the caregiving workforce, reimbursement issues, and expanding the knowledge base to guide organizational and individual caregivers in improving the quality of care.

Merrill's Pocket Guide to Radiography - E-Book-Eugene D. Frank 2012-10-14 Designed for quick reference in the clinical environment, Merrill's Pocket Guide to Radiography is a pocket-sized companion to Merrill's Atlas of Radiographic Positioning and Procedures, 12th Edition. This handy resource summarizes essential information for 170 of the most frequently requested projections you'll encounter. Authors Eugene Frank, Barbara Smith, and Bruce Long concisely present just the information you'll need for quick reference -- keep it with you and keep Merrill's close at hand! Diagnostic-quality radiographs demonstrate desired imaging results. Key positioning information is formatted for quick and easy access. Each procedure is presented in a two-color, two-page spread with bulleted, step-by-step procedures and accompanying images on the top page; and a chart with spaces to fill in the specific techniques used for a particular projection on the bottom page. Section dividers with tabs offer quick access to each section. Computed radiography information allows you to make the subtle adjustments necessary to obtain optimal results with CR. Exposure technique chart for every projection helps reduce the number of repeat radiographs and improves overall image quality. Abbreviations and external landmark charts on the inside covers provide quick access to frequently needed information. kVp values are included for each projection. Compensating filter information included for those projections where filters are used. New exposure index column for use with digital imaging systems Specific collimation settings for all projections done using DR Systems

Critical Thinking in Long-term Care Nursing-Shelley Cohen 2017-05-30 Critical Thinking in Long-Term Care Nursing, Second Edition Shelley Cohen, RN, BS, CEN Resident outcomes have come under growing scrutiny, both through new quality measures and the overall star rating. Nurses are the frontline staff who engage with residents daily, and it's crucial for them to understand how to apply critical thinking. When caring for residents and creating documentation, critical thinking can improve facility and resident outcomes while reducing medical errors, which will ultimately lead to more accurate reimbursement. Developing a culture of critical thinking in nursing is crucial in today's long-term care industry. Resident outcomes have come under growing scrutiny, both through surveys (new quality measures) and overall star ratings. Nurses are the frontline staff that engage with residents daily, and they need to understand how to apply critical thinking to nursing. Critical thinking during documentation can improve outcomes in their facility, which will ultimately lead to accurate reimbursement. This update will cover the new quality measures and discuss how nurses' actions and documentation affect the facility's star ratings.

Patient Safety and Quality-2008 "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."-Online AHRQ blurb, <http://www.ahrq.gov/qual/nursesdbk>.

The Role of Nutrition in Maintaining Health in the Nation's Elderly-Institute of Medicine 2000-06-09 Malnutrition and obesity are both common among Americans over age 65. There are also a host of other medical conditions from which older people and other Medicare beneficiaries suffer that could be improved with appropriate nutritional intervention. Despite that, access to a nutrition professional is very limited. Do nutrition services benefit older people in terms of morbidity, mortality, or quality of life? Which health professionals are best qualified to provide such services? What would be the cost to Medicare of such services? Would the cost be offset by reduced illness in this population? This book addresses these questions, provides recommendations for nutrition services for the elderly, and considers how the coverage policy should be approached and practiced. The book discusses the role of nutrition therapy in the management of a number of diseases. It also examines what the elderly receive in the way of nutrition services along the continuum of care settings and addresses the areas of expertise needed by health professionals to provide appropriate nutrition services and therapy.
