**Philosophy and Occupational Therapy**-S. Taff 2021-01-15 Philosophy and Occupational Therapy: Informing Education, Research, and Practice provides an overview of the most influential philosophical movements from past to present and shows how these philosophies are a foundational, yet underutilized, element of occupational therapy education, research, and practice. Editor Steven D. Taff, PhD, OTR/L, FNAP, FAOTA, fills a gap in existing occupational therapy literature by exploring the major thinkers and concepts of numerous different philosophical movements and examining their implications. Taff and a multitude of chapter authors demonstrate that the vital points of human existence are found in philosophy as well as science, and that occupational therapy should incorporate a clearly articulated philosophical perspective into its evidence-based and measurement-driven paradigm. Each chapter offers a basic description of a philosophy, outlines major thinkers and concepts and ultimately summarizes the implications for occupational therapy education, research and practice. Philosophy and Occupational Therapy: Informing Education, Research, and Practice is a unique and essential book for occupational therapy educators, researchers, and clinicians that will enrich the teaching-learning process, ground research with depth and clarity, and spark discussion among professionals about reviving the use of philosophy in current occupational therapy practice.
