**Child Health Nursing**-Jane W. Ball 2018-04-23 For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy

**A Farewell to Arms, Legs & Jockstraps**-Diane K. Shah 2020-04-28 "Diane Shah was a boots-on-the-ground female sports reporter in the Cro-Magnon 1970s and brings it all back in this hilarious, well-crafted book." —Dan Shaughnessy, Boston Globe sports columnist and New York Times bestselling author Strike fast, strike hard—whether it's scoring a homerun or front-page news, Diane K. Shah, former sports columnist, knows how to grab the best story. In her memoir *A Farewell to Arms, Legs, and Jockstraps*, follow Diane's escapades, from interviews with a tipsy Mickey Mantle, to sneaking into off-limits Republican galas, dining with Frank Sinatra, flying a plane with Dennis Quaid, and countless other adventures where she wields her tape recorder and a tireless drive for more. From skirting KGB agents while covering the Cold War Olympics to hunting down the three mechanical sharks starring in *Jaws*, Diane's experiences are filled with real heart and a tongue-in-cheek attitude. An insightful look into the difficulties of navigating a male-dominated profession, *A Farewell to Arms, Legs, and Jockstraps* offers rich retellings and behind-the-scenes details of stories of a trailblazing career and the prejudices facing female sportswriters during the sixties and seventies. "Impossibly elegant, and the most fun ever. The only thing better than reading Diane K. Shah's memoir was, I suppose, living it." —Sally Jenkins, columnist and feature writer, Washington Post "Diane's memoir is just like her columns—smart, funny, enlightening—just like her. Until reading it, I never really knew all the challenges she dealt with. She broke ground but never acted like it. I was lucky to work with the first female sports columnist in the country." —Ken Gurnick, LA Dodgers correspondent for MLB.com

Kasper, PhD, RN, FAAN, FACS 2015-09-16 Completely updated to help nurses learn to think genetically Today's nurses must be able to think genetically to help individuals and families who are affected by genetic disease or contemplating genetic testing. This book is a classic resource for nursing students and practitioners at all levels who need to acquire the knowledge and skills for using genomics in their practice. This completely updated second edition encompasses the many recent advances in genetic research and knowledge, providing essential new information on the science, technology, and clinical application of genomics. It focuses on the provision of individualized patient care based on personal genetics and dispositions. The second edition is designed for use by advanced practice nursing programs, as well as undergraduate programs. It pinpoints new developments in prenatal, maternity, and pediatric issues and supplies new information on genomics-based personal drug therapy, environmental susceptibilities, genetic therapies, epigenetics, and ethics The text features a practical, clinically oriented framework in line with the core competencies defined by the AACN. It delivers information according to a lifespan approach used in the practice setting. The second edition continues to provide basic information on genomics, its impact on healthcare, and genetic disorders. It covers prevention, genetic counseling and referral, neuropsychiatric nursing, and public health. The core of the text presents information on a variety of diseases that affect patients throughout the lifespan, with specific guidance on the nursing role. Also included are tests for a variety of diseases and information on pharmacogenomics, which enable health care providers to select the best drugs for treatment based on a patient's genetic makeup. Plentiful case study examples support the information throughout. Additionally, an instructor's package of PowerPoint slides and a test bank are provided for use at both the graduate and undergraduate levels.
