Substance Abuse-Gary L. Fisher 2000 Substance Abuse, Second Edition continues to provide counselors, social workers, and students with a detailed overview of the alcohol-and-other-drug field. The new edition provides updated coverage and clinical examples to reflect the rapid changes in this area. New information includes the discussions of the latest edition of the Substance Abuse Subtle Screening Inventory, co-occurring disorders, and a section on the effect of managed care on professional ethics. The authors present balanced coverage of different treatment models as well as objective discussions of the controversies in the field. For substance-abuse counselors and social

Substance Abuse-Gary L. Fisher 2013 An overview of substance abuse for generalist students, prospective mental health professionals, and allied professionals. Providing a comprehensive overview of the substance abuse field, Substance Abuse: Information for School Counselors, Social Workers, Therapists and Counselors, Fifth Edition combines the accessible writing style and succinct, practical topical coverage that have made it a market-leading resource for generalist students, prospective mental health professionals, and allied professionals. Continuing to cover basic pharmacology, models of addiction, assessment and diagnosis, cultural issues, intervention, treatment, recovery, support groups, children and families, other addictions, prevention, and confidentiality in its applied and concise style, this latest edition of Substance Abuse contains expanded coverage of screening and brief interventions, recovery oriented systems of care, spirituality and other current topics as well as a new chapter dedicated to motivational interviewing.

Substance Abuse-Gary L. Fisher 2018 In an accessible writing style, Fisher and Harrison's Substance Abuse: Information for School Counselors, Social Workers, Therapists and Counselors presents succinct, practical coverage of alcohol and other drug prevention, treatment, and recovery for generalist students, prospective mental health professionals, and allied professionals. It includes basic information on substances of abuse and focuses on clinically relevant knowledge on such topics as cultural competence, co-occurring disorders, other behavioral addictions, children and families, and ethics and confidentiality. Each chapter includes clinical application cases and questions for further discussion. The new edition includes a new chapter on "Co-Occurring Disorders and Other Special Populations," new information on cultural competencies and intervening with special populations such as the elderly and LGBTQI, and new information on risk factors for alcohol and other drugs for culturally and ethnically diverse populations. --! From publisher's description.

From publisher's description.

The Educator's Guide To Substance Abuse Prevention-Sanford Weinstein 2012-11-12 The Educator's Guide to Substance Abuse Prevention is for educators and other school personnel who are concerned about student drug use and school violence. It will help them to appreciate and use their humanity, professional skills, educational ideals, and the school curriculum as tools for substance abuse prevention. Teachers' concerns are addressed in several ways. First, the text provides a guide through which they may resolve personal and professional concerns about the commitments, limits, and boundaries of their working relationships with students. Second, it describes tasks that teachers can perform and mental health issues they can address in creating classroom policies, procedures, and rules to promote healthful learning activity in the classroom. Third, the author summarizes and interprets research and theory about substance abuse as they apply specifically to educational prevention and to professional teaching practice—arguing that classroom management strategies, learning activities, and social interaction are a teacher's primary tools of prevention, and showing how teachers may use these tools in any curricular area and without direct reference to drugs. A highlight of this text is its emphasis on helping teachers to explore drug-related issues from within the context of their own curricular specialties and to integrate substance abuse prevention with the curriculum in many school subjects—including the arts, literature, social studies, history, government, science, and culture. Action-oriented prevention strategies based on these content areas are suggested. The Educator's Guide to Substance Abuse Prevention: *focuses primarily on teaching, learning, and prevention rather than on information about drugs; *helps teachers to better use what they already do, know, and are in order to respond competently, responsibly, and with sensitivity to the needs of their students; *attends to the needs of teachers who do prevention work and the needs of children who are the target of prevention efforts; *describes student disappointment and disillusionment with family, school, and community as sources of risk and the legitimate domain in which teachers may serve a curative role; *provides extensive coverage of historical, social, and cultural issues related to substance abuse and school violence; and *alerts teachers to the risk to children posed by extremist adult groups, prominent negative role models, popular culture, and peer pressure.

Helping Students Overcome Substance Abuse-Jason J. Burrow-Sanchez 2007-05-09 Unique in its coverage of both prevention and intervention, this book provides evidence-based strategies and ready-to-use tools for addressing substance abuse in middle and high school settings. Readers learn ways to identify students at risk and implement programs that meet a broad continuum of needs—from psychoeducational and support groups to individual intervention and referral to community services. Also provided is up-to-date information on the nature of adolescent substance abuse problems, their prevalence, and how they develop. Clearly organized and accessible, the book is designed for optimal practical utility. Special features include illustrative case examples, resources, and reproducible worksheets and forms. This book is in The Guilford Practical Intervention in the Schools Series.

Drug Abuse Prevention-Richard Wilson 2011-08-24 Using an evidence-based approach, Drug Abuse Prevention: A School and Community Partnership, Third Edition teaches students and practitioners the important concepts and skills needed to design effective drug prevention programs. Written to cover more than just the facts about drugs, this text provides a background of drug use and abuse, presents the principles and skills of prevention, with particular focus on adolescents and school settings, and reinforces the importance of schools forming community partnerships with key institutions and the application of policy tools to enhance the impact of education alone. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Approaches to Substance Abuse and Addiction in Education Communities-Jeffrey Roth 2013-10-18 This book is designed to increase the awareness among mental health professionals and educators about the potential sources of support for students struggling with substance abuse, addiction and compulsive behaviors. The book includes a description of the scope of the problem of substance abuse in high schools and colleges, followed by sections describing recovery high schools and collegiate recovery communities. A further unique component of this book is the inclusion of material from the adolescents and young adults whose lives have been changed by these programs. This book was published as a special issue in the Journal of Groups in Addiction and Recovery.

Encyclopedia of Substance Abuse Prevention, Treatment, and Recovery-Gary L. Fisher 2009 Substance abuse is one of the most frequent and serious problems encountered by human service workers, criminal justice professionals, and clinicians. Unfortunately, many professionals in these fields receive little, if any, formal training about this problem. Our planned encyclopedia presents state-of-the-art research and evidence-based applications in A-to-Z format. Rather than create a compendium of specific drugs and drug effects, for which there are any number of fine titles already available, the focus will be upon practical knowledge and skills for pre-service and in-service human service professionals, including substance abuse counselors and prevention specialists.

Schools-United Nations Office on Drugs and Crime 2004 "This publication does not offer a pre-packaged programme of education for drug abuse prevention that can be picked up and implemented. It is rather an attempt to provide a conceptual basis upon which teachers, policy makers and school administrators can make decisions about school based drug prevention programmes in order to achieve greater success in education terms" -- p. 6.

Substance Abuse Mycounselinglab With Pearson Etext Access Card-Gary Fisher 2017-01-03 NOTE: Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for MyCounselingLab may not be included, may be previously redeemed. Check with the seller before completing your purchase. This access code card provides access to MyLab Counseling with Pearson eText. In an accessible writing style, Fisher and Harrison's Substance Abuse: Information for School Counselors, Social Workers, Therapists and Counselors presents succinct, practical coverage of alcohol and other drug prevention, treatment, and recovery for generalist students, prospective mental health professionals, and allied professionals. It includes basic information on substances of abuse and focuses on clinically relevant knowledge on such topics as cultural competence, co-occurring disorders, other behavioral addictions, children and families, and ethics and confidentiality. Each chapter includes clinical application cases and questions for further discussion. The new edition includes a new chapter on "Co-Occurring Disorders and Other Special Populations," new information on cultural competencies and intervening with special populations such as the elderly and LGBTQI, and new information on risk factors for alcohol and other drugs for culturally and ethnically diverse populations. Personalize learning with MyLab Counseling MyLab Counseling is an online homework, tutorial, and assessment program designed to work with the text to engage students and improve results. Within its structured environment, students see key concepts demonstrated through video clips, practice what they learn, test their understanding, and receive feedback to guide their learning and ensure they master key learning outcomes.

Substance Abuse-Joyce H. Lowinson 2005 The premier text on substance abuse and addictive behaviors is now in its updated and expanded Fourth Edition, with up-to-the-minute insights from more than 150 experts at the front lines of patient management and research. This edition features expanded coverage of the neurobiology of abused substances, new pharmacologic therapies for addictions, and complete information on "club drugs" such as Ecstasy. New sections focus on addiction in children, adolescents, adults, and the elderly and women's health issues, including pregnancy. The expanded behavioral addictions section now includes hoarding, shopping, and computer/Internet abuse. Includes access to a Companion website that has fully searchable text.

Drug Abuse Prevention-Dr. Richard W. Wilson 2003 This is one of the only texts available that offers a holistic approach to planning and implementing drug abuse prevention.

Treatment of Adolescents With Substance Use Disorders-Ken C. Winters, Ph.D. 1999-10-01 Adolescents differ from adults both physiologically & emotionally as they make the transition from child to adult &, thus, require treatment adapted to their needs. This report details the scope & complexity of the problem. Presents factors to be considered when making treatment decisions. Discusses successful program components. Describes the treatment approaches used in 12-Step-based programs, therapeutic communities, & family therapy respectively. Discusses adolescents with distinctive treatment needs, such as those involved with the juvenile justice system. Explains legal issues concerning confidentiality laws.

Creating safe and drug-free schools : an action guide.

Sunny's Story-Ginger Katz 2007-03-01 Sunny's Story brings to light one of the most critical issues facing children, parents and educators today. Parents are challenged with discussing the dangers of alcohol and other drugs with their children. Having the courage to face hard issues is the first step in keeping children safe. Through the voice of the family dog, and in a tender and thoughtful way, Sunny's Story is an effective tool to approach this topic. This story opens a dialogue between parents and their children. It teaches parents about what children are exposed to everyday. Children will obtain a clear understanding of how their choices affect their life and the lives of those close to them.

Preventing Drug Abuse-National Research Council 1993-02-01 As the nation's drug crisis has deepened, public and private agencies have invested huge sums of money in prevention efforts. Are the resulting programs effective? What do we need to know to make them more effective? This book provides a comprehensive overview on what we know about drug abuse prevention and its effectiveness, including Results of a wide range of antidrug efforts. The role and effectiveness of mass media in preventing drug use. A profile of the drug problem, including a look at drug use by different population groups. A review of three major schools of prevention theory--risk factor reduction, developmental change, and social influence. An examination of promising prevention techniques from other areas of health and human services. This volume offers provocative findings on the connection between low self-esteem and drug use, the role of schools, the reality of changing drug use in the population, and more. Preventing Drug Abuse will be indispensable to anyone involved in the search for solutions, including policymakers, antidrug program developers and administrators, and researchers.

Substance Abuse Prevention-Kar B Snehendu 2020-06-10 In thirteen chapters, twenty-four authors share their analyses, concerns, and conclusions in several domains including the: meaning and dynamics of multiculturalism affecting prevention intervention, relative risks and knowledge gaps across ethnic groups, social trends affecting health risks and substance abuse, lessons learned from substance abuse research and prevention, role of the media, promises and limits of the new public health paradigm for assessment, policy development, assurance of preventive services, and social action and empowerment for prevention in partnership with the public.

The Science of Addiction: From Neurobiology to Treatment-Carlton K. Erickson 2007-02-17 Runner-up winner of the Hamilton Book Author Award, this book is a comprehensive overview of the neurobiology behind addictions. Neuroscience is clarifying the causes of compulsive alcohol and drug use--while also shedding light on what addiction is, what it is not, and how it can best be treated--in exciting and innovative ways. Current neurobiological research complements and enhances the approaches to addiction traditionally taken in social work and psychology. However, this important research is generally not presented in a forthright, jargon-free way that clearly illustrates its relevance to addiction professionals. The Science of Addiction presents a comprehensive overview of the roles that brain function and genetics play in addiction. It explains in an easy-to-understand way changes in the terminology and characterization of

substance-abuse-information-for-school-counselors-social-workers-therapists-and-counselors

addiction that are emerging based upon new neurobiological research. The author goes on to describe the neuroanatomy and function of brain reward sites, and the genetics of alcohol and other drug dependence. Chapters on the basic pharmacology of stimulants and depressants, alcohol, and other drugs illustrate the specific and unique ways in which the brain and the central nervous system interact with, and are affected by, each of these substances Erickson discusses current and emerging treatments for chemical dependence, and how neuroscience helps us understand the way they work. The intent is to encourage an understanding of the body-mind connection. The busy clinical practitioner will find the chapter on how to read and interpret new research findings on the neurobiological basis of addiction useful and illuminating. This book will help the almost 21.6 million Americans, and millions more worldwide, who abuse or are dependent on drugs by teaching their caregivers (or them) about the latest addiction science research. It is also intended to help addiction professionals understand the foundations and applications of neuroscience, so that they will be able to better empathize with their patients and apply the science to principles of treatment.

Seeking Safety-Lisa Najavits 2002-01-01 This much-needed manual presents the first empirically studied, integrative treatment approach developed specifically for PTSD and substance abuse. The manual is divided into 25 specific units or topics, addressing a range of different cognitive, behavioral, and interpersonal domains. The volume is designed for ease of use with a large format, lay-flat binding, and helpful reproducible handouts and forms. 4/01.

Preventing Drug Use Among Children and Adolescents-Elizabeth B. Robertson 2003 One of the goals of the Nat. Institute on Drug Abuse is to help the public understand the causes of drug abuse and to prevent its onset. This is a summary of topics covered in the newest ed. of the guide, "Preventing Drug Use Among Children and Adolescents", which includes updated principles, new questions and answers, new program information, and expanded references and resources. This In Brief edition summarizes sections of the guide for community use. Chapters: Prevention Principles; Risk Factors and Protective Factors; Planning for Drug Abuse Prevention in the Community; Applying Prevention Principles to Drug Abuse Prevention Programs; Examples of Research-Based Drug Abuse Prevention Programs; and Selected Resources and References.

Epidemiologic Trends in Drug Abuse-National Institute on Drug Abuse. Community Epidemiology Work Group 2000-12

Channel Kindness: Stories of Kindness and Community-Born This Way Foundation Reporters 2020-09-22 For Lady Gaga, kindness is the driving force behind everything she says and does. The quiet power of kindness can change the way we view one another, our communities, and even ourselves. She embodies this mission, and through her work, brings more kindness into our world every single day. Lady Gaga has always believed in the importance of being yourself, being kind to yourself, and being kind to others, no matter who they are or where they come from. With that sentiment in mind, she and her mother, Cynthia Germanotta, founded Born This Way Foundation, a nonprofit organization dedicated to making the world a kinder and braver place. Through the years, they’ve collected stories of kindness, bravery and resilience from young people all over the world, proving that kindness truly is the universal language. And now, we invite you to read these stories and follow along as each and every young author finds their voice just as Lady Gaga has found hers. Within these pages, you’ll meet young changemakers who found their inner strength, who prevailed in the face of bullies, who started their own social movements, who decided to break through the mental health stigma and share how they felt, who created safe spaces for LGBTQ+ youth, and who have embraced kindness with every fiber of their being by helping others without the expectation of anything in return. In one story, you’ll read about a young person with an autoimmune disease, who after being bullied at school, learned how to practice self-love and started an organization with the mission of educating others about the importance of self-love, too; and in another story, you’ll meet a young person who decided to start a movement to help eliminate the stigma surrounding mental health and encouraged others to talk about their feelings openly and honestly, a reminder that kindness and mental wellness go hand in hand. Not only were we moved by these individual acts of kindness, but we were also touched by the many stories of organizations, neighborhoods, and entire communities that fully dedicated themselves to helping those in need and found new, innovative ways to make our world a kinder and braver place. Individually and collectively, these stories prove that kindness not only saves lives but builds community. Kindness is inclusion, it is pride, it is empathy, it is compassion, it is self-respect and it is the guiding light to love. Kindness is always transformational, and its never-ending ripples result in even more kind acts that can change our lives, our communities, and our world.

Drug Abuse Prevention Materials for Schools-National Clearinghouse for Drug Abuse Information

Libraries and the Substance Abuse Crisis-Cindy Grove 2020-03-25 By making their own contributions to changing the way people struggling with substance abuse are treated in society, libraries can demonstrate that resilience can transcend crisis.

1992 Texas School Survey of Substance Abuse-Eric V. Fredlund 1993

Psychopathology in Women-Margarita Sáenz-Herrero 2019-07-15 This book examines sex and gender differences in the causes and expression of medical conditions, including mental health disorders. Sex differences are variations attributable to individual reproductive organs and the XX or XY chromosomal complement. Gender differences are variations that result from biological sex as well as individual self-representation which include psychological, behavioural, and social consequences of an individual’s perceived gender. Gender is still a neglected field in psychopathology, and gender differences is often incorrectly used as a synonym of sex differences. A reconsideration of the definition of gender, as the term that subsumes masculinity and femininity, could shed some light on this misperception and could have an effect in the study of health and disease. This second edition of Psychopathology clarifies the anthropological, cultural and social aspects of gender and their impact on mental health disorders. It focuses on gender perspective as a paradigm not only in psychopathology but also in mental health disorders. As such it promotes open mindedness in the definition and perception of symptoms, as well as assumptions about those symptoms, and raises awareness of mental health.

Substance Abuse Recovery in College-H. Harrington Cleveland 2010-04-15 Substance Abuse Recovery in College explains in authoritative detail what collegiate recovery communities are, the types of services they provide, and their role in the context of campus life, with extended examples from Texas Tech University’s influential CSAR (Center for the Study of Addiction and Recovery) program. Using data from both conventional surveys and end-of-day daily Palm Pilot assessments as well as focus groups, the book examines community members’ experiences. In addition, the importance of a positive relationship between the recovery community and the school administration is emphasized. Topics covered include: The growing need for recovery services at colleges. How recovery communities support abstinence and relapse prevention. Who are community members and their addiction and treatment histories. Daily lives of young adults in a collegiate recovery community. Challenges and opportunities in establishing recovery communities on campus. Building abstinence support into an academic curriculum. This volume offers clear insights and up-close perspectives of importance to developmental and clinical child psychologists, social workers, higher education policymakers, and related professionals in human development, family studies, student services, college health care, and community services.

Adolescent Substance Abuse-Yifrah Kaminer 2013-06-29 [This] volume provides a unique and advantageous perspective to the trainees and practitioners in the adolescent substance abuse field. It offers a sophisticated perspective on addiction treatment techniques developed in recent years, with a sensitivity to the social and developmental needs of the adolescent. Marc Galanter, from the Foreword.

Resources in Education- 1996

Technologies for Understanding and Preventing Substance Abuse and Addiction-DIANE Publishing Company 1996-04 Focuses on several factors that are necessary for substance abuse & addiction to occur, including an examination of the biological research regarding the phenomenon of addiction to a variety of substances. Describes individual risk & protection factors that contribute to the abuse, & addiction to alcohol & drugs. Looks at how risk & protection factors play out in subcultures & in major activity settings including the home, school, workplace & recreation settings. Addresses a range of legislative options for Congress. History of drug control policy in the U.S.

This Brilliant Darkness: A Book of Strangers-Jeff Sharlet 2020-02-11 A visionary work of radical empathy. Known for immersion journalism that is more immersed than most people are willing to go, and for a prose style that is somehow both fierce and soulful, Jeff Sharlet dives deep into the darkness around us and awaiting us. This work began when his father had a heart attack; two years later, Jeff, still in his forties, had a heart attack of his own. In the grip of writerly self-doubt, Jeff turned to images, taking snapshots and posting them on Instagram, writing short, true stories that bloomed into documentary. During those two years, he spent a lot of time on the road: meeting strangers working night shifts as he drove through the mountains to see his father; exploring the life and death of Charley Keunang, a once-aspiring actor shot by the police on LA’s Skid Row; documenting gay pride amidst the violent homophobia of Putin’s Russia; passing time with homeless teen addicts in Dublin; and accompanying a lonely woman drifting into dementia, whose only friend was a houseplant, on shopping trips. Early readers have called this book “incantatory,” the voice “prophetic,” in “James Agee’s tradition of looking at the reality of American lives.” Defined by insomnia and late-night driving and the companionship of other darkness-dwellers—night bakers and last-call drinkers, frightened people and frightening people, the homeless and the lost (or merely disoriented), other people on the margins—This Brilliant Darkness erases the boundaries between author, subject, and reader to ask: how do people live with suffering?

Principles of Drug Addiction Treatment: a Research-Based Guide-National Drug Abuse (NIDA) 2018-05-28 Drug addiction is a complex illness. It is characterized by intense and, at times, uncontrollable drug craving, along with compulsive drug seeking and use that persist even in the face of devastating consequences. This update of the National Institute on Drug Abuse’s Principles of Drug Addiction Treatment is intended to address addiction to a wide variety of drugs, including nicotine, alcohol, and illicit and prescription drugs. It is designed to serve as a resource for healthcare providers, family members, and other stakeholders trying to address the myriad problems faced by patients in need of treatment for drug abuse or addiction. Addiction affects multiple brain circuits, including those involved in reward and motivation, learning and memory, and inhibitory control over behavior. That is why addiction is a brain disease. Some individuals are more vulnerable than others to becoming addicted, depending on the interplay between genetic makeup, age of exposure to drugs, and other environmental influences. While a person initially chooses to take drugs, over time the effects of prolonged exposure on brain functioning compromise that ability to choose, and seeking and consuming the drug become compulsive, often eluding a person’s self-control or willpower. But addiction is more than just compulsive drug taking-it can also produce far reaching health and social consequences. For example, drug abuse and addiction increase a person’s risk for a variety of other mental and physical illnesses related to a drug-abusing lifestyle or the toxic effects of the drugs themselves. Additionally, the dysfunctional behaviors that result from drug abuse can interfere with a person’s normal functioning in the family, the workplace, and the broader community. Because drug abuse and addiction have so many dimensions and disrupt so many aspects of an individual’s life, treatment is not simple. Effective treatment programs typically incorporate many components, each directed to a particular aspect of the illness and its consequences. Addiction treatment must help the individual stop using drugs, maintain a drug-free lifestyle, and achieve productive functioning in the family, at work, and in society. Because addiction is a disease, most people cannot simply stop using drugs for a few days and be cured. Patients typically require long-term or repeated episodes of care to achieve the ultimate goal of sustained abstinence and recovery of their lives. Indeed, scientific research and clinical practice demonstrate the value of continuing care in treating addiction, with a variety of approaches having been tested and integrated in residential and community settings.

Inside Out-Demi Moore 2019-09-24 INSTANT #1 NEW YORK TIMES BESTSELLER A Best Book of the Year: The New Yorker, The Guardian, The Sunday Times, The Daily Mail, Good Morning America, She Reads Famed American actress Demi Moore at last tells her own story in a surprisingly intimate and emotionally charged memoir. For decades, Demi Moore has been synonymous with celebrity. From iconic film roles to high-profile relationships, Moore has never been far from the spotlight—or the headlines. Even as Demi was becoming the highest paid actress in Hollywood, however, she was always outrunning her past, just one step ahead of the doubts and insecurities that defined her childhood. Throughout her rise to fame and during some of the most pivotal moments of her life, Demi battled addiction, body image issues, and childhood trauma that would follow her for years—all while juggling a skyrocketing career and at times negative public perception. As her success grew, Demi found herself questioning if she belonged in Hollywood, if she was a good mother, a good actress—and, always, if she was simply good enough. As much as her story is about adversity, it is also about tremendous resilience. In this deeply candid and reflective memoir, Demi pulls back the curtain and opens up about her career and personal life—laying bare her tumultuous relationship with her mother, her marriages, her struggles balancing stardom with raising a family, and her journey toward open heartedness. Inside Out is a story of survival, success, and surrender—a wrenchingly honest portrayal of one woman’s at once ordinary and iconic life.

Treatment Strategies for Substance Abuse and Process Addictions-Robert L. Smith 2015-03-05 This distinctive and timely text examines the most prevalent substance and process addictions and focuses on current research and evidence-based treatment strategies. Major substance addictions discussed include alcohol, tobacco, marijuana, methamphetamines, and prescription drugs. Complete chapters are also devoted to the most frequently cited process addictions, making this text unique. Behavioral addictions covered in this text include pathological gambling, sex disorders, disordered eating, work, exercise, shopping, and Internet/gaming. Each chapter contains a listing of student learning outcomes, a case study with reflective questions, techniques for assessment and diagnosis, inpatient and outpatient treatment approaches, and resources for further study. With its emphasis on treatment strategies, this text can be used by practitioners as well as by professors in the classroom in introductory courses in addictions or in subsequent courses that focus on treatment strategies. *Requests for digital versions from the ACA can be found on wiley.com. *To request print copies, please visit the ACA website here. *Reproduction requests for material from books published by ACA should be directed to permissions@counseling.org.

Theoretical Principles of Distance Education-Desmond Keegan 2005-08-15 According to UNESCO statistics, 10 million of the world's 600 million students study at a distance. Theoretical Principles of Distance Education seeks to lay solid foundations for the education of these students and for the structures within which they study. As a more industrialised form of education provision, distance education is well adapted to the use of new communication technologies, and brings to education many of the strengths and dangers of post-industrialism. The central focus of the study of distance education is the placing of the student at home or at work and the justification of the abandonment in this form of education of

interpersonal, face-to-face communication, previously considered to be a cultural imperative for education in both east and west. This book explores the problems that distance education poses to the theorist, bringing together an international team of distance educators to address these issues for the first time in a systematic way. The team comprises theoreticians, administrators, experts in educational technology and adult education, experts in learning from video machines, from computers and other forms of technology. Contributions from Italy, and Scandinavia contrast with viewpoints provided by scholars from the US, Canada, Australia, and the UK.

National Drug Control Strategy (1997)-Barry R. McCaffrey 1997-05 Contents: the purposes and nature of strategy (a comprehensive 10-year plan); profile of drug abusers (trends in youth drug abuse; health consequences; cost of drug-related crime; illegal drugs remain available); strategic goals and objectives (demand and supply reduction; goals and objectives; measures of effectiveness); a comprehensive approach (youth oriented initiatives; initiatives to reduce drug-related crime and violence; reduce health and social problems; shield our frontiers; reduce drug availability); and resources to implement the strategy.

Aging: 1987
