High Acuity Nursing-Pamela Stinson Kidd 2001 A supplement for a variety of junior/senior-level courses in Critical Care or Advanced Med-Surg Nursing courses and others throughout the nursing curriculum. Written by practicing nurses in acute care, this text provides students with a basic understanding of complex patients and the ability to provide nursing care across a variety of settings by using a series of reality-based, self-paced, self-contained modules that focus on multiple system problems frequently encountered in working with high acuity patients. Using a "nuts and bolts" approach, it addresses essentials by using examples, analogies, and metaphors; focuses on concepts and principles that can be applied across practice settings and patient populations; and includes nursing diagnoses. The modules progress from simple to complex and contain pretests and posttests with answers, learning objectives, glossary, abbreviations, and review questions and answers.

High-acuity Nursing-Kathleen Dorman Wagner 2006 The Fourth Edition of "High Acuity Nursing" delivers essential understanding of complex patients and instructs both students and nurses on how to provide nursing care in varied clinical settings. Broken down into a series of learner-focused, active learning modules, "High Acuity Nursing" takes complex information and presents it in smaller, more accessible chunks that promote easier mastery by readers. As the modules progress in difficulty, this text addresses the multiple-system problems that nurses face when caring for high acuity patients. With a focus on concepts and principles that can be applied across practice settings and patient populations, "High Acuity Nursing, Fourth Edition" is a learner-friendly approach that will help nurses and nursing students master the concepts and confidence necessary to succeed in today's health care settings. New to this edition: Greater attention to problems seen in high acuity populations Integration of research and Evidence Based Practice boxes throughout modules Conceptual approach to patient care that provides readers with an understanding of rationales Consistency and continuity among modules that is achieved by means of a single concept or nursing application format

Critical Care Nursing in Resource Limited Environments-Chris Carter 2019-06-05 All hospitals have critically ill patients, and their management depends upon the resources available. In many low income countries, critically ill patients may be admitted to a critical care unit; however, many are nursed on wards due to a lack of critical care beds or simply die before they reach the hospital. This book provides guidance on the unique situations for nurses working in these challenging environments, while considering ethical decision-making, providing appropriate services, and the types of patients admitted. Topics covered include: working in a resource limited environment; cultural awareness and international agendas; provision and access to healthcare services; ethical considerations in the context of resource limited environments; best practice and knowledge regarding rehabilitation, pain management, managing a major incident; relevant research concerning resource limited environments. Critical Care Nursing in Resource Limited Environments prepares readers to consider how best to utilise their skills and deliver safe patient care within a resource limited context. Each easy-to-read chapter provides core knowledge and relevant research, as well as useful ideas and solutions, with further reading sections to signpost readers to key international resources. This text provides practical ideas for nurses working in critical care and defence nursing, and acute areas in resource limited environments. It can also be used to support educational courses and pre-deployment training for nurses hoping to work in Global Health.

Appropriate interventions are discussed from an interdisciplinary, evidence-based perspective. Hundreds of new, full-color illustrations and design clarify important concepts and improve the book's usability. Complex, unfolding case studies are presented in all disease chapters, accompanied by review questions with a comprehensive answer key. Multidisciplinary Plans of Care provide at-a-glance information for common ICU conditions. Nutrition boxes appear in each relevant chapter, offering guidelines for patient needs with specific illnesses. Research-Based Practice Guidelines boxes and Promoting Evidence-Based Practice features appear throughout the text whenever applicable to present the latest research-supported nursing assessment and intervention practices. Drug boxes include common classifications of critical care drugs for specific disorders, including drug, actions, dosage, and special considerations. Applying the Technology features help you apply the latest technology to patient care. NIC Interventions boxes list NIC intervention labels appropriate for the conditions discussed in a chapter.

Gastrointestinal Issues and Complications, an Issue of Critical Care Nursing Clinics of North America, E-Book-Debra Sullivan 2018-02-06 Gastrointestinal dysfunction or injury is common in the critical care patient either as a primary diagnosis or as secondary symptoms. Several studies confirm that up to 62% of critical care patients exhibit at least one GI symptom for at least one day. In addition, recent studies have shown that GI problems are related to negative outcomes in the critical care patient. The articles in this issue are current and relevant to critical care patients today: Autoimmune Disease of the Gut in the Critical Care Patient; Nutrition Options in CCU Patients; Mesenteric Ischemia; Management of C-Diff in Critical Care Setting; Management of Acute GI Bleed; Acute Diverticulitis Management; GI Patient Skills Training in the ICU: SOFA assessment and recognizing GI symptoms; EBP with probiotics in treatment for antibiotic associated diarrhea in the ICU; GI Problems in the ICU with Patients with HIV/AIDs; Complications of GI Motility/GI Failure in the Critically Ill Patient; Untreated Gastroesophageal Reflux Patients in the ICU; Liver Transplant; Ecoli Complications in Critical Care-Pediatrics; and GI Traumatic injuries: GI Perforation. Being knowledgeable and skillful in the recognition and care for these problems is paramount to the critical care nurse.

Critical Care Nursing-Kathy J. Booker 2014-12-11 Providing an easy-to-use reference, Critical Care Nursing outlines best practice for the assessment, monitoring and treatment of critically ill adult patients. Each chapter includes research and evidence-based strategies for treating commonly-seen conditions. Initial chapters introduce ICU set-up and operation, the rapid response team, vitals measurement and shock management strategies. Subsequent chapters, structured by organ system, focus on care relating to specific organ function and dysfunction, including the respiratory, cardiovascular, neurologic, renal and gastrointestinal systems. Key information on monitoring for overdoses, special considerations in traumatic injury and end-of-life concerns is also included. Critical Care Nursing is a comprehensive and informative resource for experienced staff nurses and advanced practice nurses working with critically ill patients on ICUs, PCUs, transitional care units and within emergency care departments.

Critical Care Nursing-Suzanne Bench 2011-02-10 Critical Care Nursing: Learning from Practice takes a unique approach to critical care. Based around case scenarios that have the patient as the central focus, each chapter is constructed around an example of a critically ill patient with specific care needs. The chapters then go on to critically explore the knowledge and skills required to deliver expert care. This book looks at a range of critical care scenarios, including: The patient with acute lung injury The patient with fever The patient with an acute kidney injury The patient with long term needs The patient with increased intra-abdominal pressure The Patient following cardiac surgery Each chapter develops knowledge of the related physiology/pathophysiology, appropriate nursing interventions that are research/evidence based, technical skills, data interpretation and critical appraisal skills, enabling the reader to apply fundamental knowledge to more complex patient problems. Critical Care Nursing: Learning from Practice is an essential resource for practitioners faced with complex and challenging patient cases.

Acute and Critical Care Clinical Nurse Specialists E-book-AACN 2007-07-04 2007 AJN Book of the Year Award Winner Acute and Critical Care Clinical Nurse Specialists: Best Practices presents the knowledge and tools the CNS needs to provide the best standards of practice and performance. It focuses on the role of the CNS in acute and critical care, emphasizing the relationship between critical care nursing, the patient, and the environment of care. NEW focus on culturally sensitive care is included in an expanded Family Integration and Culturally Sensitive Care chapter. UPDATED rationales in the Answer Key are referenced to the most recent literature and evidence-based guidelines. Compatibility with iPads, iPhones, and other mobile devices allows online exam practice that is easy and convenient.

Certified Registered Nurse Anesthesia: Critical Care Nursing in the Operating Room, An Issue of Critical Care Nursing Clinics,-Holly-May Robins 2015-04-07 APRNs are essential to deliver healthcare in today's complex environment. Certified Registered Nurse Anesthetists have met that challenge for over 150 years. Nurse Anesthetists have shifted from the intensive care unit as critical care nurses into the operating room arena. The operating room is an environment that is uniquely challenging. A critical care background is essential to meet these challenges, and all Certified Registered Nurse Anesthetists share that experience. The topic: "Certified Registered Nurse Anesthesia: Critical Care Nursing in the Operating Room", highlights critical care nursing as it is applied in the operating room setting. Critical care nurses will appreciate the knowledge base that is essential for the anesthetist. As healthcare reform demands greater efficiency, more and more procedures are performed outside the operating room. The line between the Operating Room, ICU and Interventional Radiology will become less defined. Critical care nurses are, and will be more involved in patient care while an anesthetic is administered. It is the goal of this proposed monograph to share knowledge and experience so that ICU nurses will learn more about caring for the anesthetized patient.
