It answers the questions new counselors have in real school settings, such as What is it really like to live the life of a professional school counselor? How does the theory presented in the classroom apply to the myriad of situations encountered in the real life, everyday school setting? Case studies and scenarios give readers examples of many commonly encountered presenting issues. For each scenario the case is introduced, background information is supplied, and initial processing questions are posed. The authors include a discussion of the theoretical models or frameworks used to address the issue, along with a table segmented by theoretical paradigm and grade level that includes other techniques that could be used in the presenting case. 15-Minute Counseling Techniques That Work-Allison Edwards 2020-05-21 The counselor is not the strategy. The counselor teaches strategies. As counselors, we spend our days helping kids. Kids come to us with a variety of problems, searching for answers. They want us to listen. And they need us to give them solutions for the issues they are facing. While these solutions may work temporarily, we really never help kids until we give them tools"--,--"or techniques"--,--"to manage thoughts and feelings on their own. Our job is not to do it for them. Our job is to teach them how to do it themselves! This is the greatest gift we can give. In 15-Minute Counseling Techniques, Allison Edwards provides tools to use in individual or group counseling sessions with children in grades K"--,--"12. Children will learn how to calm their mind and body with Square Breathing, let go of negative thoughts by Changing the Channel, identify their unique gifts by creating a "What I'm Good At" Jar, and so much more. The techniques in this book will help children feel empowered to face everyday challenges and equipped to manage their stress and emotions. And, best of all, you will give them the confidence they need to handle challenges throughout their lives.
