of importance measures to
provide a comprehensive

overview of their applications in the areas of reliability, network, risk, mathematical programming, and optimization. Investigating the precise relationships among various importance measures, it describes how they are modelled and combined with other design tools to allow users to solve readily many real-world, large-scale decision-making problems. Law Digest and hundreds of English language doctoral dissertations on canon law produced at the world's great Catholic universities, now allows researchers to access directly this great fountain of ecclesiastical legal science. No student of canon law, and indeed, no one with a need to understand modern Church administration, can afford to be without this important volume.

"The book is a major
contribution to social workers
and their clients as it
addresses advocacy on behalf
of immigrants and refugees
during a social, economic and
political period that restricts
immigrants' rights and service
access." --Dr. Diane
Drachman, Associate
Professor, University of
Connecticut School of Social
Work
Successful social work
with immigrants must begin
with an understanding of their
legal status and how that
status impacts their housing,
employment, health care,
education, and virtually every
other aspect of life. Chang-

social workers with the only
book on the market to
emphasize the legal aspect of
immigrant issues as well as
critical practice and advocacy
issues. Topics discussed
include historical and current
trends in immigration,
applicable theories for
practice with immigrants,
policy and advocacy methods,
and the need for cultural
competence. By providing
comprehensive coverage of

both the legal and practice
issues of this complex field,
this book will help social
service professionals and
graduate students increase
their cultural sensitivity and
work more effectively with
immigrants. Key Features:
Covers the latest aspects of

The Pig Book-Citizens
Against Government Waste
2013-09-17 The federal
government wastes your tax
dollars worse than a drunken

sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

Riparian Areas-National Research Council 2002-10-10

The Clean Water Act (CWA) requires that wetlands be protected from degradation because of their important ecological functions including maintenance of high water quality and provision of fish and wildlife habitat. However, this protection generally does not encompass riparian areas—the lands bordering rivers and lakes—even though they often provide the same functions as wetlands. Growing recognition of the similarities in wetland and riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian areas, which has culminated in *Riparian Areas: Functioning and Strategies for Management*. The report is intended to heighten awareness of riparian areas commensurate with their ecological and societal values. The primary conclusion is that, because riparian areas perform a disproportionate number of biological and physical functions on a unit area basis, restoration of riparian functions along America's waterbodies should be a national goal.

Book of Proof-Richard H. Hammack 2016-01-01 This book is an introduction to the language and standard proof methods of mathematics. It is a bridge from the computational courses (such as calculus or differential equations) that students typically encounter in their first year of college to a more abstract outlook. It lays a foundation for more theoretical courses such as topology, analysis and abstract algebra. Although it

may be more meaningful to the student who has had some calculus, there is really no prerequisite other than a measure of mathematical maturity.

It offers a detailed explanation of types of security, creation, priority and enforcement. The book is mainly concerned with property and insolvency law, two areas where security is tested and enforced. Authoritative in approach, this highly respected book provides guidance on both the legal principles and practical issues involved in taking and challenging security. The book is accordingly broken down into the following parts: Part A: Types of Security (Chapters 2-4): what types of security are available to a creditor, what are the differences between pledges, mortgages and fixed and floating charges, and what are their advantages and disadvantages?Part B: Creating Security (Chapters 5 and 6): how is security created in practice and what requirements are there to

register the security?Part C: Priority of Security (Chapter 7): what are the priorities between the creditor and another person who obtains an interest in the secured asset?Part D: Enforcing Security (Chapters 8 and 9): how is security enforced, what liabilities can be incurred as a result of enforcing security, and how can the onset of insolvency proceedings against the debtor affect the enforcement of security?Part E: Security Arising by Operation of Law (Chapter 10): in what circumstances is security created without the necessity for an agreement between the debtor and the creditor?Part F: Alternatives to Security (Chapters 11 and 12): to what extent can a creditor protect himself against the insolvency of the debtor in other ways, for instance, by taking a guarantee from a third party or by relying on a right of set-off?Part G: International Security (Chapters 13 and 14): what issues arise where the transaction is of a cross-border nature.
