The Log from the Sea of Cortez-John Steinbeck 1995-11-01 A Penguin Classic In the two years after the 1939 publication of Steinbeck's masterful *The Grapes of Wrath*, Steinbeck and his novel increasingly became the center of intense controversy and censorship. In search of a respite from the national stage, Steinbeck and his close friend, biologist Ed Ricketts, embarked on a month long marine specimen-collecting expedition in the Gulf of California, which resulted in their collaboration on the *Sea of Cortez*. In 1951, after Ricketts' death, Steinbeck reissued his narrative portion of the work in memory of his friend and the inspiration for Cannery Row's "Doc". This exciting day-by-day account of their journey together is a rare blend of science, philosophy, and high-spirited adventure. This edition features an introduction by Richard Astro. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Sea Log-May Joseph 2019-04-24 The ocean has always been the harbinger of strangers to new shores. Migrations by sea have transformed modern conceptions of mobility and belonging, disrupting notions of how to write about movement, memory and displaced histories. *Sea Log* is a memory theater of repressive hauntings based on urban artifacts across a maritime archive of Dutch and Portuguese colonial pillage. Colonial incursions from the sea, and the postcolonial aftershocks of these violent sea histories, lie largely forgotten for most formerly colonized coastal communities around the world. Offering a feminist log of sea journeys from the Malabar Coast of South India, through the Atlantic to the North Sea, May Joseph writes a navigational history of postcolonial coastal displacements. Excavating Dutch, Portuguese, Arab, Asian and African influences along the Malabar Coast, Joseph unearths the undertow of colonialism's ruins. In *Sea Log*, the Bosphorus, the Tagus and the Amstel find coherence alongside the Arabian Sea and the Indian Ocean. Written in a clear and direct style, this volume will appeal to historians of transnational communities, as well as students and scholars of cultural studies, anthropology of space, area studies, maritime history and postcolonial studies.

The Log from the Sea of Cortez-Jesse Russell 2012-04 High Quality Content by WIKIPEDIA articles! The Log from the Sea of Cortez is an English language book written by American author John Steinbeck and published in 1951. It details a six-week (March 11 - April 20) marine specimen-collecting boat expedition he made in 1940 at various sites in the Gulf of California (also known as the Sea of Cortez), with his friend, the marine biologist Ed Ricketts. It is regarded as one of Steinbeck's most important works of non-fiction chiefly because of the involvement of Ricketts, who shaped Steinbeck's thinking and provided the prototype for many of the pivotal characters in his fiction, and the insights it gives into the philosophies of the two men.

Beyond the Outer Shores-Eric Enno Tamm 2005-07-28 In the 1930s, while the Dust Bowl and the Great Depression sent most of America into the doldrums, a lively intellectual and artistic community formed in the West, revolving around three legendary friends: Ed Ricketts, John Steinbeck, and Joseph Campbell. Steinbeck immortalized Monterey's bohemian spirit in Cannery Row, but the area's true lifeblood was his best friend and mentor, Ed Ricketts. Today Ed Ricketts is usually remembered as "Doc"—the beer-drinking philosopher-scientist who presided over Monterey's population of "whores, pimps, gamblers, and sons of bitches" in Cannery Row—but Ricketts was actually a trailblazing ecologist who did seminal work in the emerging field on the Pacific Coast. His ideas were decades before their time, and his two books, *Between Pacific Tides* and *Sea of Cortez* (coauthored with Steinbeck), are still considered classics. Now, some sixty years after his untimely death, Ricketts' ecological approach and ethic seem more relevant than ever.

Log Off-Blake Snow 2017-12-15 IT'S OFFICIAL: excessive "internetting," smartphoning, and social media make us miserable. But it doesn't have to be that way. Over the last decade, recognized journalist Blake Snow rigorously researched, tested, and developed several connectivity strategies

for finding offline balance in an online world, which resulted in this, his first book. In *Log Off: How to Stay Connected after Disconnecting*, Snow passionately, succinctly, and sometimes humorously explains how to hit refresh for good, do more with less online, live large on low-caloric technology, increase facetime with actual people, outperform workaholics in half the time, and tunefully blend both analog and digital lives with no regrets. If the "offline balance movement" is real, this is its playbook.

Beyond the Sea-Brian Ahearn 2013 This log book is an aid to researching

and understanding the historic voyage of the Atlas, arguably the worst in the history of convict transportation from Ireland to the infant colony of New South Wales. This is first time the log of this voyage has been published and a listing been made available covering the convicts, crew and passengers. The publication is set out in three parts: 1. The voyage 2. The log 3. The convicts by muster, census and their fate on arrival. It is hoped the evidence gleaned from the log book of the Atlas will add to the background of the voyage and the tragic history of convict transportation to New South Wales. Each page of the original log has been scanned and enhanced, then transcribed for ease of readership and study. It is hoped that noting individual convicts will provide a working document for further research by those who have ancestors who survived the voyage, and went on to create a family of proud 'native' Australians. Their strong work ethic, sense of humour, friendliness, love of life and cheeky lack of respect for authority and all things English became entrenched in the way the nation developed its Australian-ness. Australia was because of them. The log is an important reference point for the book titled 'Beyond the Sea' - The life and times of Murtagh Ahern.
