Too High and Too Steep-David B. Williams 2015-11-30 Residents and visitors in today's Seattle would barely recognize the landscape that its founding settlers first encountered. As the city grew, its leaders and inhabitants dramatically altered its topography to accommodate their changing visions. In Too High and Too Steep, David B. Williams uses his deep knowledge of Seattle, scientific background, and extensive research and interviews to illuminate the physical challenges and sometimes startling hubris of these large-scale transformations, from the filling in of the Duwamish tideflats to the massive regrading project that pared down Denny Hill. In the course of telling this fascinating story, Williams helps readers find visible traces of the city's former landscape and better understand Seattle as a place that has been radically reshaped. Skid Road-Murray Morgan 2018-03-15 Skid Road tells the story of Seattle from the bottom up, offering an informal and engaging portrait of the Emerald City's first century, as seen through the lives of some of its most colorful citizens. With his trademark combination of deep local knowledge, precision, and wit, Murray Morgan traces the city's history from its earliest days as a hacked-from-the-wilderness timber town, touching on local tribes, settlers, the lumber and railroad industries, the great fire of 1889, the Alaska gold rush, flourishing dens of vice, general strikes, the 1962 World's Fair, and the stuttering growth of the 1970s and '80s. Through it all, Morgan shows us that Seattle's one constant is change and that its penchant for reinvention has always been fueled by creative, if sometimes unorthodox, residents. With a new introduction by Pulitzer Prize-winning book critic Mary Ann Gwinn, this redesigned edition of Murray Morgan's classic work is a must for those interested in how Seattle got to where it is today.

Housing First-Deborah Padgett 2015-11-03 This book is the first to chronicle the story of Housing First (HF), a paradigm-shifting evidence-based approach to ending homelessness that began in New York City in 1992 and rapidly spread to other cities nationally and internationally. The authors report on the rise of a 'homeless industry'

of shelters and transitional housing programs that the HF approach directly challenged by rejecting the usual demands of treatment, sobriety and housing readiness. Based upon principles of consumer choice, harm reduction and immediate access to permanent independent housing in the community, HF was initially greeted with skepticism and resistance from the 'industry'. However, rigorous experiments testing HF against 'usual care' produced consistent findings that the approach produced greater housing stability, lower use of drugs, and alcohol and cost savings. This evidence base, in conjunction with media accounts of HF's success, led to widespread adoption in the U.S., Canada, Western Europe, and Australia. The book traces the history of homelessness and the rapid growth of the publically funded homeless industry, an amalgam of religious and philanthropic organizations, advocacy groups, and non-profits that were insufficient to stem the tide of homelessness resulting from dramatic reductions in affordable housing in the 1980s and continuing to the present day. The authors summarize research findings on HF and include a chapter of personal stories of individuals who have experienced HF. Unique to this book is the participation of the founder of HF (Tsemberis) and well-known research on HF by the co-authors (Padgett and Henwood). Also unique is the deployment of theories-organizational, institutional and implementation-to conceptually frame the rise of HF and its wide adoption as well as the resistance that arose in some places. Highly readable yet informative and scholarly, this book addresses wider issues of innovation and systems change in social and human services.

Touching the Void-Joe Simpson 2012-12-12 The 25th Anniversary ebook, now with more than 50 images. 'Touching the Void' is the tale of two mountaineer's harrowing ordeal in the Peruvian Andes. In the summer of 1985, two young, headstrong mountaineers set off to conquer an unclimbed route. They had triumphantly reached the summit, when a horrific accident mid-descent forced one friend to leave another for dead. Ambition, morality, fear and camaraderie are explored in this electronic edition of the mountaineering classic, with never before seen colour photographs taken during the trip itself.

Seattle Walks-David B. Williams 2017-05-01 Seattle is often listed as one of the most walkable cities in the United States. With its beautiful scenery, miles of non-motorized trails, and year-round access, Seattle is an ideal place to explore on foot. In Seattle Walks, David B. Williams weaves together the history, natural history, and architecture of Seattle to paint a complex, nuanced, and fascinating story. He shows us Seattle in a new light and gives us an appreciation of how the city has changed over time, how the past has influenced the present, and how nature is all around us even in our urban landscape. These walks vary in length and topography and cover both well-known and surprising parts of the city. While most are loops, there are a few one-way adventures with an easy return via public transportation. Ranging along trails and sidewalks, the walks lead to panoramic views, intimate hideaways, architectural gems, and beautiful greenways. With Williams as your knowledgeable and entertaining guide, encounter a new way to experience Seattle.

High-Rise: A Novel-J. G. Ballard 2012-04-16 "Harsh and ingenious! High Rise is an intense and vivid bestiary, which lingers unsettlingly in the mind." —Martin Amis, New Statesman When a class war erupts inside a luxurious apartment block, modern elevators become violent battlegrounds and cocktail parties degenerate into marauding attacks on "enemy" floors. In this visionary tale, human society slips into violent reverse as once-peaceful residents, driven by primal urges, re-create a world ruled by the laws of the jungle.

East Central Europe in the Middle Ages, 1000-1500-Jean W Sedlar 1994 Although the Middle Ages saw brilliant achievements in the diverse nations of East Central Europe, this period has been almost totally neglected in Western historical scholarship. East Central Europe in the Middle Ages provides a much-needed overview of the history of the region from the time when the present nationalities established their state structures and adopted Christianity up to the Ottoman conquest. Jean Sedlar's excellent synthesis clarifies what was going on in Europe between the Elbe and the Ukraine during the Middle Ages, making available for the first time in a single volume information necessary to a fuller understanding of the early history of present-day Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Albania, and the former Yugoslavia.

Frederick Douglass-David W. Blight 2020-01-07 ****Winner of the Pulitzer Prize in History**** "Extraordinary...a great American biography" (The New Yorker) of the most important African-American of the nineteenth century: Frederick Douglass, the escaped slave who became the greatest orator of his day and one of the leading abolitionists and writers of the era. As a young man Frederick Douglass (1818-1895) escaped from slavery in Baltimore, Maryland. He was fortunate to have been taught to read by his slave owner mistress, and he would go on to become one of the major literary figures of his time. His very existence gave the lie to slave owners: with dignity and great intelligence he bore witness to the brutality of slavery. Initially mentored by William Lloyd Garrison, Douglass spoke widely, using his own story to condemn slavery. By the Civil War, Douglass had become the most famed and widely travelled orator in the nation. In his unique and eloquent voice, written and spoken, Douglass was a fierce critic of the United States as well as a radical patriot. After the war he sometimes argued politically with younger African Americans, but he never forsook either the Republican party or the cause of black civil and political rights. In this "cinematic and deeply engaging" (The New York Times Book Review) biography, David Blight has drawn on new information held in a private collection that few other historians have consulted, as well as recently discovered issues of Douglass's newspapers. "Absorbing and even moving...a brilliant book that speaks to our own time as well as Douglass's" (The Wall Street Journal), Blight's biography tells the fascinating story of Douglass's two marriages and his complex extended family. "David Blight has written the definitive biography of Frederick Douglass...a powerful portrait of one of the most important American voices of the nineteenth century" (The Boston Globe). In addition to the Pulitzer Prize, Frederick Douglass won the Bancroft, Parkman, Los Angeles Times (biography), Lincoln, Plutarch, and Christopher awards and was named one of the Best Books of 2018 by The New York Times Book Review, The Wall Street Journal, The Boston Globe, The Chicago Tribune, The San Francisco Chronicle, and Time.

Waterway-David Williams 2017-06-01 Why does a city surrounded by water need another waterway? Find out what drove Seattle's civic leaders to pursue the dream of a Lake Washington Ship Canal for more than sixty years and what role it has played in the region's development over the past century. Historians Jennifer Ott and David B. Williams, author of *Too High and Too Steep: Reshaping Seattle's Topography*, explore how industry, transportation, and the very character of the city and surrounding region developed in response to the economic and environmental changes brought by Seattle's canal and locks.

The Steep and Thorny Way-Cat Winters 2016-03-08 A thrilling reimagining of Shakespeare's Hamlet, *The Steep and Thorny Way* tells the story of a murder most foul and the mighty power of love and acceptance in a state gone terribly rotten. 1920s Oregon is not a welcoming place for Hanalee Denney, the daughter of a white woman and an African-American man. She has almost no rights by law, and the Ku Klux Klan breeds fear and hatred in even Hanalee's oldest friendships. Plus, her father, Hank Denney, died a year ago, hit by a drunk-driving teenager. Now her father's killer is out of jail and back in town, and he claims that Hanalee's father wasn't killed by the accident at all but, instead, was poisoned by the doctor who looked after him—who happens to be Hanalee's new stepfather. The only way for Hanalee to get the answers she needs is to ask Hank himself, a "haint" wandering the roads at night.

Olmsted in Seattle-Jennifer Ott 2019 In the midst of galloping growth at the turn of the twentieth century, Seattle's city leaders seized on the confluence of a roaring economy with the City Beautiful movement to hire the

Olmsted Brothers landscape architecture firm to design a park and parkway system. Their 1903 plan led to a supplemental plan, a playground plan, numerous park and boulevard designs, changes to park system management, and a ripple effect, as the Olmsted Brothers were hired to design public and private landscapes throughout the region. The park system shaped Seattle's character and continues to play a key role in the city's livability today.

Fear and Loathing in Las Vegas (Harper Perennial Modern Classics)-Hunter S. Thompson 2014-10-16 'We were somewhere around Barstow on the edge of the desert when the drugs began to take hold. I remember saying something like, "I feel a bit lightheaded; maybe you should drive ..."'

Fitting Models to Biological Data Using Linear and Nonlinear Regression-Harvey Motulsky 2004-05-27 Most biologists use nonlinear regression more than any other statistical technique, but there are very few places to learn about curve-fitting. This book, by the author of the very successful *Intuitive Biostatistics*, addresses this relatively focused need of an extraordinarily broad range of scientists.

The Prophet-Kahlil Gibran 2009-01-01 A prophet has is about to board a ship home after 12 years in exile, when he is stopped by a group of people. His teachings to them, discussing love, marriage, crime, freedom and law among many other aspects of everyday life, form the 26 poetic essays of Gibran's work. The work has been a bestseller since its first publication.

Stories in Stone-David B. Williams 2019-08-27 Most people do not think to observe geology from the sidewalks of a major city, but all David B. Williams has to do is look at building stone in any urban center to find a range of rocks equal to any assembled by plate tectonics. In *Stories in Stone*, he takes you on explorations to find 3.5-billion-year-old rock that looks like swirled pink-and-black taffy, a gas station made of petrified wood, and a Florida fort that has withstood three hundred years of attacks and hurricanes, despite being made of a stone that has the consistency of a granola bar. Williams also weaves in the cultural history of stone, explaining why a white fossil-rich limestone from Indiana became the only building stone used in all fifty states; how in 1825, the construction of the Bunker Hill Monument led to America's first commercial railroad; and why when the same kind of marble used by Michelangelo clad a Chicago skyscraper it warped so much after nineteen years that all 44,000 panels of it had to be replaced. This love letter to building stone brings to life the geology you can see in the structures of every city.

First Light of Day-Michael J. T. Steep 2020-01-30 **FIRST LIGHT OF DAY** is two things. First, it's a compelling story wrapped around a disquieting look at life in 2045 in the aftermath of a technology revolution that profoundly changed the nature of society. Second, it's a non-fiction look at the technologies available today that make this revolution possible and even probable. In the fictional, part one of the book, the world is on the brink of creating the first truly sentient machines. Technology has changed everything from travel and work to government and

even personal relationships. Most developed societies are segregated between high-end knowledge workers who enjoy all the benefits of life in the new digital cities and the majority of the population who have been rendered economically superfluous. The characters' inner struggles are intellectual, philosophical and spiritual--and their time before losing control of their lives to their own creations is running out. The second non-fiction part of the book provides an overview of the 10 categories of technology that play crucial roles in the story and are shaping our world today. The author, Michael J.T. Steep, is the founder and executive director of the Disruptive Technology and Digital Cities Program at Stanford University School of Engineering and one of today's leading experts on technology innovation. He wrote this book as a cautionary tale for anyone who wonders about the impact of unchecked technology development currently underway.

Hinds Feet on High Places-Hannah Hurnard 2013-03-21 Much-Afraid had been in the service of the Chief Shepherd, whose great flocks were pastured down in the Valley of Humiliation. She lived with her friends and fellow workers Mercy and Peace in a tranquil little white cottage in the village of Much-Trembling. She loved her work and desired intensely to please the Chief Shepherd, but happy as she was in most ways, she was conscious of several things which hindered her in her work and caused her much secret distress and shame. Here is the allegorical tale of Much-Afraid, an every-woman searching for guidance from God to lead her to a higher place.

The Glass Castle-Jeannette Walls 2006-01-02 Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

Praise for author David B. Williams: "Makes stones sing" --Kirkus Reviews "Williams's lively mixture of hard science and piquant lore is sure to fire the readers' curiosity" --Publisher's Weekly *Part history, part folklore, part geology * Features charming black-and-white illustrations From meadow trails to airy mountaintops and wide open desert, cairns -- those seemingly random stacks of rocks -- are surprisingly rich in stories and meaning. For thousands of years cairns have been used by people to connect to the landscape and communicate with others, and are often an essential guide to travelers. Cairns, manmade rock piles can indicate a trail, mark a grave, serve as an altar or shrine, reveal property boundaries or sacred hunting grounds, and even predict astronomical activity. The Inuit have more than two dozen terms to describe cairns and their uses! In Cairns: Messengers in Stone, geologist and acclaimed nature writer David B. Williams (Stories in Stone: Travels through Urban Geology) explores the history of cairns from the moors of Scotland to the peaks of the Himalaya -- where they come from, what they mean, why they're used, how to make cairns, and more. Cairns are so much more than a random pile of rocks, knowing how to make cairns can drastically alter the meaning of the formation. Hikers, climbers, travelers, gardeners, and nature buffs alike will delight in this quirky, captivating collection of stories about cairns.

iGen-Jean M. Twenge 2017-08-22 As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent

need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

The Seattle Street-Smart Naturalist-David B. Williams 2012-11-15 Back to the city, or back to nature? Seattle author David Williams shows us how we can get the best of both. Botany and bugs, geology and geese, and creeks and crows; living in a major city doesn't have to separate us from the natural world. Stepping away from a guidebook format, Williams presents the reader with a series of essays and maps that weave personal musings, bits of humor, natural history observations, and scientific data into a multi-textured perspective of life in the city--descriptions of his journeys as a naturalist in an urban landscape. Williams addresses questions that an observant person asks in an urban environment. What did Seattle look like before Europeans got here? How does the area's geologic past affect us? Why have some animals thrived and other languished? How are we affected by the species with whom we share the urban environment and how do we affect them? This book captures all of the distinctive flavors of the Emerald City, urban and natural.

No Shortcuts to the Top-Ed Viesturs 2006-10-17 This gripping and triumphant memoir from the author of The Mountain follows a living legend of extreme mountaineering as he makes his assault on history, one 8,000-meter summit at a time. For eighteen years Ed Viesturs pursued climbing's holy grail: to stand atop the world's fourteen 8,000-meter peaks, without the aid of bottled oxygen. But No Shortcuts to the Top is as much about the man who would become the first American to achieve that goal as it is about his stunning quest. As Viesturs recounts the stories of his most harrowing climbs, he reveals a man torn between the flat, safe world he and his loved ones share and the majestic and deadly places where only he can go. A preternaturally cautious climber who once turned back 300 feet from the top of Everest but who would not shrink from a peak (Annapurna) known to claim the life of one climber for every two who reached its summit, Viesturs lives by an unyielding motto, "Reaching the summit is optional. Getting down is mandatory." It is with this philosophy that he vividly describes fatal errors in judgment made by his fellow climbers as well as a few of his own close calls and gallant rescues. And, for the first time, he details his own pivotal and heroic role in the 1996 Everest disaster made famous in Jon Krakauer's Into Thin Air. In addition to the raw excitement of Viesturs's odyssey, No Shortcuts to the Top is leavened with many funny moments revealing the camaraderie between climbers. It is more than the first full account of one of the staggering accomplishments of our time; it is a portrait of a brave and devoted family man and his beliefs that shaped this most perilous and magnificent pursuit.
