Ancient Egyptian Literature-Antonio Loprieno 1996-01-01 Twenty scholars have contributed to this book which deals with the development and characteristics of the literature of ancient Egypt over a period of over more than two millenia, from the monumental origins of autobiography at the end of the Old Kingdom (ca. 2150 BC) down to the latest literary compositions in Demotic during the Graeco-Roman period (300BC-200AD). The book is divided into thirty chapters concerned with the definition of literary discourse, the history and genre of the texts, their linguistic and stylistic features and the image of Egypt as displayed in later literary traditions - Greek, Coptic and Arabic. Thoroughly interdisciplinary.

Victorian Literary Culture and Ancient Egypt-Eleanor Dobson 2020-07-31 This edited collection considers representations of ancient Egypt in the literature of the nineteenth-century. It addresses themes such as reanimated mummies, ancient Egyptian mythology and contemporary consumer culture across literary modes ranging from burlesque satire to historical novels, stage performances to Gothic fiction and popular culture to the highbrow. The book illuminates unknown sources of historical significance - including the first illustration of an ambulatory mummy - revising current understandings of the works of canonical writers and grounding its analysis firmly in a contemporary context. The contributors demonstrate the extensive range of cultural interest in ancient Egypt that flourished during Victoria's reign. At the same time, they use ancient Egypt to interrogate 'selfhood' and 'otherness', notions of race, imperialism, religion, gender and sexuality.

Writings from Ancient Egypt-Toby Wilkinson 2016-08-25 'Man perishes; his corpse turns to dust; all his relatives pass away. But writings make him remembered' In ancient Egypt, words had magical power. Inscribed on tombs and temple walls, coffins and statues, or inked onto papyri, hieroglyphs give us a unique insight into the life of the Egyptian mind. Egyptologist Toby Wilkinson has freshly translated a rich and diverse range of ancient Egyptian writings into modern English, including tales of shipwreck and wonder, obelisk inscriptions, mortuary spells, funeral hymns, songs, satires and advice on life from a pharaoh to his son. Spanning over two millennia, this is the essential guide to a complex, sophisticated culture. Translated with an Introduction by Toby Wilkinson

Ancient Egyptian Literature, Volume I-Miriam Lichtheim 2006-04-03 First published in 1973 – and followed by Volume II in 1976 and Volume III in 1980 – this anthology has assumed classic status in the field of Egyptology and portrays the remarkable evolution of the literary forms of one of the world's earliest civilizations. Ancient Egyptian Literature- 2009-06-03 Poetry, stories, hymns, prayers, and wisdom texts found exquisite written expression in ancient Egypt while their literary counterparts were still being recited around hearth fires in ancient Greece and Israel. Yet, because of its very antiquity and the centuries during which the language was forgotten, ancient Egyptian literature is a newly discovered country for modern readers. This anthology offers an extensive sampling of all the major genres of ancient Egyptian literature. It includes all the texts from John Foster's previous book Echoes of Egyptian Voices, along with selections from his Love Songs of the New Kingdom and Hymns, Prayers, and Songs: An Anthology of Ancient Egyptian Lyric Poetry, as well as previously unpublished translations of four longer and two short poems. Foster's translations capture the poetical beauty of the Egyptian language and the spirit that impelled each piece's composition, making these ancient masterworks sing for modern readers. An introduction to ancient Egyptian literature and its translation, as well as brief information about the authorship and date of each selection, completes the volume.

Ancient Egypt in the Popular Imagination-David Huckvale 2014-01-10 Ancient Egypt has long been a source of fascination in Western popular culture. Movies such as The Mummy (1932, 1959), Biblical epics like The Ten Commandments (1923, 1956), and pharaonic films like Cleopatra (1934, 1963) and The Egyptian (1954) have all recreated the glamour and allure of Egyptian art and civilization for Western audiences. This work traces how these and other films were inspired by writers like Bram Stoker and Sir Arthur Conan Doyle and by the art of Victorian painters. Similarly, it shows how the soundtracks to such films belong to a Romantic musical tradition stretching back beyond Verdi and Mozart. Exploring these artistic endeavors addresses the question of whether the fantasy of ancient Egypt represents racist misunderstandings of a far more significant reality, or a way for Western culture to understand itself.

Ancient Egypt in the Modern Imagination-Eleanor Dobson 2020-01-23 Ancient Egypt has always been a source of fascination to writers, artists and architects in the West. This book is the first study to address representations of Ancient Egypt in the modern imagination, breaking down conventional disciplinary boundaries between fields such as History, Classics, Art History, Fashion, Film, Archaeology, Egyptology, and Literature to further a nuanced understanding of ancient Egypt in cultures stretching from the eighteenth century to the present day, emphasising how some of the various meanings of ancient Egypt to modern people have traversed time and media. Divided into three themes, the chapters scrutinise different aspects of the use of ancient Egypt in a variety of media, looking in particular at the ways in which Egyptology as a discipline has influenced representations of Egypt, ancient Egypt's associations with death and mysticism, as well as connections between ancient Egypt and gendered power. The diversity of this study aims to emphasise both the multiplicity and the patterning of popular responses to ancient Egypt, as well as the longevity of this phenomenon and its relevance today.

Tales from Ancient Egypt-Loren R. Fisher 2010-02-01 The Egyptian tales witness to some of the great moments in the history of Egyptian literature and represent the earliest beginnings in world literature. Many literary critics do not seem to know the importance of Egyptian prose tales told for entertainment (including C. S. Lewis, who does not know that the "marvelous that knows itself as myth" was alive and well by 1800 BCE). Unlike some other ancient states, both Israel and Egypt wrote epic tales in prose. And these great prose stories are important for the study of the Hebrew Bible. Some of the most exciting narrative prose parallels to the Hebrew Bible are found in the stories from Egypt. The details may vary, but in the setting, the purpose, the vocabulary, and the genre of the stories, one can find many similarities. The Tale of Sinuhe and Other Ancient Egyptian Poems, 1940-1640 BC- 1998 "This anthology contains all the substantial surviving works from the golden age of Ancient Egyptian fictional literature (c.1940-1640 B.C.). Composed by an anonymous author in the form of a funerary autobiography, the Tale tells how the courtier Sinuhe flees Egypt at the death of his king. His adventures bring wealth and happiness, but his failure to find meaningful life abroad is only redeemed by the new king's sympathy, and he finally returns to the security of his homeland. Other works from the Middle Kingdom include a poetic dialogue between a man and his soul on the problem of suffering and death, a teaching about the nature of wisdom which is bitterly spoken by the ghost of the assassinated King Amenembat I, and a series of light-hearted tales of wonder from the court of the builder of the Great Pyramid."--Jacket.

The Ancient Egyptian Pyramid Texts-James P. Allen 2007-08-30 The Pyramid Texts are the oldest body of extant literature from ancient Egypt. First carved on the walls of the burial chambers in the pyramids of kings and queens of the Old Kingdom, they provide the earliest comprehensive view of the way in which the ancient Egyptians understood the structure of the universe, the role of the gods, and the fate of human beings after death. Their importance lies in their antiquity and in their endurance throughout the entire intellectual history of ancient Egypt. This volume contains the complete translation of the Pyramid Texts, including new texts recently discovered and published. It incorporates full restorations and readings indicated by post-Old Kingdom copies of the texts and is the first translation that presents the texts in the order in which they were meant to be read in each of the original sources.

The Ancient Egyptian Books of the Earth-Joshua Aaron Roberson 2014-06-23 Collections of scenes and texts designated variously as the "Book of the Earth," "Creation of the Solar Disc," and "Book of Aker" were inscribed on the walls of royal sarcophagus chambers throughout Egypt's Ramessid period (Dynasties 19-20). This material illustrated discrete episodes from the nocturnal voyage of the sun god, which functioned as a model for the resurrection of the deceased king. These earliest "Books of the Earth" employed mostly ad hoc arrangements of scenes, united by shared elements of iconography, an overarching, bipartite symmetry of composition, and their frequent pairing with representations of the double sky overhead. From the Twenty-First Dynasty and later, selections of programmatic tableaux were adapted for use in private mortuary contexts, often in conjunction with innovative or previously unattested annotations. The present study collects and analyzes all currently known Book of the Earth material, including discussions of iconography, grammar, orthography, and architectural setting.

The Dwellers on the Nile-E. A. Wallis Budge 1977-01-01 The author begins with a history of ancient Egypt and a list of its kings, and then plunges into the daily life of the people from the cradle to the grave and beyond - their manners and customs, trade and commerce, their literature and religious beliefs. Dr. Budge examines the Egyptian family and school, the furniture, jewelry, food and drink of the household, Egyptian society, Egyptians at work and play, the Egyptian religions and its temples, its numerous gods and priests, Egyptian writing, literature and knowledge of medicine, astrology and alchemy. The book concludes with the Egyptian dead, Heaven and Hell, and the future life.

Private Life in New Kingdom Egypt-Lynn Meskell 2018-06-05 Much of the literature on ancient Egypt centers on pharaohs or on elite conceptions of the afterlife. This scintillating book examines how ordinary ancient Egyptians lived their lives. Drawing on the remarkably rich and detailed archaeological, iconographic, and textual evidence from some 450 years of the New Kingdom, as well as recent theoretical innovations from several fields, it reconstructs private and social life from birth to death. The result is a meaningful portrait composed of individual biographies, communities, and landscapes. Structured according to the cycles of life, the book relies on categories that the ancient Egyptians themselves used to make sense of their lives. Lynn Meskell gracefully sifts the evidence to reveal Egyptian domestic arrangements, social and family dynamics, sexuality, emotional experience, and attitudes toward the cadences of human life. She discusses how the Egyptians of the New Kingdom constituted and experienced self, kinship, life stages, reproduction, and social organization. And she examines their creation of communities and the material conditions in which they lived. Also included is neglected information on the formation of locality and the construction of gender and sexual identity and new evidence from the mortuary record, including important new data on the burial of children. Throughout, Meskell is careful to highlight differences among ancient Egyptians—the ways, for instance, that ethnicity, marital status, age, gender, and occupation patterned their experiences. Readers will come away from this book with new insights on how life may have been experienced and conceived of by ancient Egyptians in all their variety. This makes Private Life in New Kingdom Egypt unique in Egyptology and fascinating to read.

Based on a new translation, the detailed analysis of these spells reveals that they provide a chronologically ordered account of the phenomena of a lunar month.

Civilization Before Greece and Rome-H. W. F. Saggs For many centuries it was accepted that civilization began with the Greeks and Romans. During the last two hundred years, however, archaeological discoveries in Egypt, Mesopotamia, Crete, Syria, Anatolia, Iran, and the Indus Valley have revealed that rich cultures existed in these regions some two thousand years before the Greco-Roman era. In this fascinating work, H.W.F Saggs presents a wide-ranging survey of the more notable achievements of these societies, showing how much the ancient peoples of the Near and Middle East have influenced the patterns of our daily lives. Saggs discusses the invention of writing, tracing it from the earliest pictograms (designed for account-keeping) to the Phoenician alphabet, the source of the Greek and all European alphabets. He investigates teh curricula, teaching methods, and values of the schools from which scribes graduated. Analyzing the provisions of some of the law codes, he illustrates the operation of international law and the international trade that it made possible. Saggs highlights the creative ways that these ancient peoples used their natural resources, describing the vast works in stone created by the Egyptians, the development of technology in bronze and iron, and the introduction of useful plants into regions outside their natural habitat. In chapters on mathematics, astronomy, and medicine, he offers interesting explanations about how modern calculations of time derive from the ancient world, how the Egyptians practiced scientific surgery, and how the Babylonians used algebra. The book concludes with a discussion of ancient religion, showing its evolution from the most primitive forms toward monotheism.
