The Moral Case for Fossil Fuels-Alex Epstein 2014-11-13 Could everything we know about fossil fuels be wrong? For decades, environmentalists have told us that using fossil fuels is a self-destructive addiction that will destroy our planet. Yet at the same time, by every measure of human well-being, from life expectancy to clean water to climate safety, life has been getting better and better. How can this be? The explanation, energy expert Alex Epstein argues in The Moral Case for Fossil Fuels, is that we usually hear only one side of the story. We're taught to think of the negatives of fossil fuels, their risks and side effects, but not their positives—their unique ability to provide cheap, reliable energy for a world of seven billion people. And the moral significance of cheap, reliable energy, Epstein argues, is woefully underrated. Energy is our ability to improve every single aspect of life, whether economic or environmental. If we look at the big picture of fossil fuels compared with the alternatives, the overall impact of using fossil fuels is to make the world a far better place. We are morally obligated to use more fossil fuels for the sake of our economy and our environment. Drawing on original insights and cutting-edge research, Epstein argues that most of what we hear about fossil fuels is a myth. For instance. . . Myth: Fossil fuels are dirty. Truth: The environmental benefits of using fossil fuels far outweigh the risks. Fossil fuels don't take a naturally clean environment and make it dirty; they take a naturally dirty environment and make it clean. They don't take a naturally safe climate and make it dangerous; they take a naturally dangerous climate and make it ever safer. Myth: Fossil fuels are unsustainable, so we should strive to use "renewable" solar and wind. Truth: The sun and wind are intermittent, unreliable fuels that always need backup from a reliable source of energy—usually fossil fuels. There are huge amounts of fossil fuels left, and we have plenty of time to find something cheaper. Myth: Fossil fuels are hurting the developing world. Truth: Fossil fuels are the key to improving the quality of life for billions of people in the developing world. If we withhold them, access to clean water plummets, critical medical machines like incubators become impossible to operate, and life expectancy drops significantly. Calls to "get off fossil fuels" are calls to degrade the lives of innocent people who merely want the same opportunities we enjoy in the West. Taking everything into account, including the facts about climate change, Epstein argues that "fossil fuels are easy to misunderstand and demonize, but they are absolutely good to use. And they absolutely need to be championed. . . . Mankind's use of fossil fuels is supremely virtuous—because human life is the standard of value and because using fossil fuels transforms our environment to make it wonderful for human life."

Haynes 2017-10-14 If you are anything like me, after a busy day of answering the phone and checking my voicemail messages, your desk is often littered with yellow sticky notes, random pink slips and scraps of notebook paper! The Quick Cash Grant Manual-Allen Michaels 2013-01-29 I can show you how to get Free Cash in your hands in 30 days or less, Yes, 30 days or less! Can anyone else state that fact? And get this.... These people will be "Begging" you to take it from them! I know it sounds too good to be true but let me tell you I have seen it with my own eyes. I have a simple method that works every time without fail. After several months of trial and error, I have found a fool proof way to get real FREE Cash in your hands in 30 days or less and I don't mean a few bucks here, I'm talking about Big Money! This Free Money was allocated to stimulate the economy and create jobs. These programs can put large amounts of money in your pocket to use as you see fit, some programs have rules on how you can spend the money, but most of them allow the individual to decide what to spend it on. These programs are popping up all the time but no one knows about them, how to apply for them, or what it takes to Get your share! This is where I come in. I have been submitting my "Hard Hitting" grant proposal letters and helping people cash in on them for years, and by doing so I have found "Hidden Secret Techniques" and simple procedures to get the Free Cash you need FAST, Easy! and without ever paying back a single dime! Over the years I have found and secured more than 18 Million Dollars in "Real Money" for my clients, and customers. Due to my uncanny ability to find, secure and siphon Free Cash from the U. S. Government and private funding sources I have become an expert in my field, and I am willing to help anyone willing to help themselves to become financially self sufficient. And Yes!... I used the word siphon, because that is exactly what I do, I find hidden programs that most people will never hear about. Why? Because these Cash Grant Programs are only available because the Federal Government is required by law to provide them, but are NOT required to advertise them to the general public. Can you believe That? And the Privately held Companies are giving away Free Cash Grants and zero interest loans to individuals as well. These Companies need tax shelters and tax write-offs in order to stay afloat, especially in this economic climate. They have a designated amount annually that must be awarded in order to adjust their fiscal responsibilities. It's no different than you needing tax write-offs in order to lower your income tax liability.

Money-Jacob Goldstein 2020-09-08 The co-host of the popular NPR podcast Planet Money provides a well-researched, entertaining, somewhat irreverent look at how money is a made-up thing that has evolved over time to suit humanity's changing needs. Money only works because we all agree to believe in it. In Money, Jacob Goldstein shows how money is a useful fiction that has shaped societies for thousands of years, from the rise of coins in ancient Greece to the first stock market in Amsterdam to the emergence of shadow banking in the 21st century. At the heart of the story are the fringe thinkers and world leaders who reimaged money. Kublai Khan, the Mongol emperor, created paper money backed by nothing, centuries before it appeared in the west. John Law, a professional gambler and convicted murderer, brought modern money to France (and destroyed the country's economy). The cypherpunks, a group of radical libertarian computer programmers, paved the way for bitcoin. One thing they all realized: what counts as money (and what doesn't) is the result of choices we make, and those choices have a profound effect on who gets more stuff and who gets less, who gets to take risks when times are good, and who gets screwed when things go bad. Lively, accessible, and full of interesting details (like the 43-pound copper coins that 17th-century Swedes carried strapped to their backs), Money is the story of the choices that gave us money as we know it today.

Big Money Energy Directly from God-Mike McArthur 2021-01-14 You will realize that money is energy Everything in our world consists of energy, because energy is everything that surrounds us. Everyone has heard about the energy of love, but does everyone know that the energy of money also exists?Money is also energy, but it functions according to its own laws. Money is a material representation of energy. In fact, God invented and created money. Some deity money, some take it easily, some try to save it, and some live one day at a time and spend every penny made. Everyone treats money differently, but you must admit that money plays some role in each person's life, sometimes the main one, and sometimes secondary. And the amount that each person considers enough for happiness differs from person to person. You will see that money is creation of God Money always existed and will exist forever. Because money was created by God. During our life, we always interact with each other. Two things in this are always true: nothing is free, and nothing goes unnoticed. If you go to the grocery store to buy some milk, you must pay some money. If money didn't exist, this simple transaction of buying milk would be very hard to solve. In that case you, would interact with many others like farmers who produced this milk, sellers who sell the milk, etc. You would need to do chores and help them in order to get some milk from them. How could you get a milk in this situation? That's why God created money as a universal solution where you can get what you need and keep going.
