First to the Party-Christopher Baylor 2017-10-17 What determines the interests, ideologies, and alliances that make up political parties? In its entire history, the United States has had only a handful of party transformations. First to the Party concludes that groups like unions and churches, not voters or politicians, are the most consistent influences on party transformation.

Apartheid's Reluctant Uncle-Thomas Borstelmann 1993 Despite the unsavory racism of Malan's government - Borstelmann shows that Pretoria fomented violence among black groups in the late 1940s, just as it has done recently between the ANC and Inkatha - the U.S. saw South Africa as a dependable and important ally. In addition, America was almost completely dependent on southern Africa for its uranium supply, and was willing to go to great lengths to secure the critical fuel for its nuclear arsenal. Borstelmann also notes that race relations in the segregated U.S. played a role in Washington's policies, with few white Americans greatly disturbed by the establishment of apartheid. As South Africa finally nears an end to almost fifty years of formal apartheid (and as Truman nears canonization, following the recent presidential election), Borstelmann's account comes as a startling reminder of America's early links to Pretoria's racist system

America the Beautiful Quarters Collector's Folder 2010-2021-United States Mint 2010-05-04 Beginning in 2010, the United States Mint will issue newly designed quarters featuring a national park or other site approximately every ten weeks—and this compact folder is the perfect place for collectors to store each new coin. Complete with historical information and details of the Congressional Act that initiated this special program, the folder will keep this commemorative series organized, accessible, and easy to show off. The noteworthy sites will come from all 50 states, as well as Washington, D.C., and five U.S. territories: Puerto Rico, Guam, American Samoa, the U.S. Virgin Islands, and the Northern Mariana Islands.

National Parks Quarters-Warman's 2010-08-09 Coin folders have a long, distinguished legacy as being most people's first exposure to coin collecting hobby. Everyone either has or knows someone who has been given a coin folder as a child and gone on to fill it with cents, nickels, dimes, or quarters. The state quarter program has been one of the most successful in the U.S. Mint's history. It has brought collecting to the mainstream. Riding on the coat tails of the state quarter program, the America the Beautiful series comes at a time when the public is familiar with searching and saving quarters from circulation. A total of 56 quarters honoring a national site from each U.S. state and territory will be issued from 2010 to 2021.

Lincoln Cent 1909-1958 Collector's Folder-Warman's 2009-11-28 To do its part in the war effort, the U.S. Mint changed from a copper cent to a zinc-coated steel version for one year, in 1943. Rumor quickly spread that anyone who found a 1943 copper cent would be rewarded with a car from Ford. Now you can display your collection of the legendary Lincoln cents of 1909 to 1958 in this beautiful four-panel coin folder. Larger in size than the average folder, this unit has room for 144 coins, the most of any similar folder.

Civil Rights and the Making of the Modern American State-Megan Ming Francis 2014-04-21 This book extends what we know about the development of civil rights and the role of the NAACP in American politics. Through a sweeping archival analysis of the NAACP's battle against lynching and mob violence from 1909 to 1923, this book examines how the NAACP raised public awareness, won over American presidents, secured the support of Congress, and won a landmark criminal procedure case in front of the Supreme Court.

Preserving the Desert-Lary M. Dilsaver 2017-02-15 National parks are different from other federal lands in the United States. Beginning in 1872 with the establishment of Yellowstone, they were largely set aside to preserve for future generations the most spectacular and inspirational features of the country, seeking the best representative examples of major ecosystems such as Yosemite, geologic forms such as the Grand Canyon, archaeological sites such as Mesa Verde, and scenes of human events such as Gettysburg. But one type of habitat--the desert--fell short of that goal in American eyes until travel writers and the Automobile Age began to change that perception. As the Park Service began to explore the better-known Mojave and Colorado deserts of southern California during the 1920s for a possible desert park, many agency leaders still carried the same negative image of arid lands shared by many Americans--that they are hostile and largely useless. But one wealthy woman--Minerva Hamilton Hoyt, from Pasadena--came forward, believing in the value of the desert, and convinced President Franklin D. Roosevelt to establish a national monument that would protect the unique and iconic Joshua trees and other desert flora and fauna. Thus was Joshua Tree National Monument officially established in 1936, with the area later expanded in 1994 when it became Joshua Tree National Park. Since 1936, the National Park

Service and a growing cadre of environmentalists and recreationalists have fought to block ongoing proposals from miners, ranchers, private landowners, and real estate developers who historically have refused to accept the idea that any desert is suitable for anything other than their consumptive activities. To their dismay, Joshua Tree National Park, even with its often-conflicting land uses, is more popular today than ever, serving more than one million visitors per year who find the desert to be a place worthy of respect and preservation. A Place for Inquiry, a Place for Wonder-William Robbins 2020-08-31 The H.J. Andrews Experimental Forest is a slice of classic Oregon: due east of Eugene in the Cascade Mountains, it comprises 15,800 acres of the Lookout Creek watershed. The landscape is steep, with hills and deep valleys and cold, fast-running streams. The densely forested landscape includes cedar, hemlock, and moss-draped Douglas fir trees. One of eighty-one USDA experimental forests, the Andrews is administered cooperatively by the US Forest Service, OSU, and the Willamette National Forest. While many Oregonians may think of the Andrews simply as a good place to hike, research on the forest has been internationally acclaimed, has influenced Forest management, and contributed to our understanding of healthy forests. In A Place for Inquiry, A Place for Wonder, historian William Robbins turns his attention to the long-overlooked Andrews Forest and argues for its importance to environmental science and policy. From its founding in 1948, the experimental forest has been the site of wide-ranging research. Beginning with postwar studies on the conversion of old-growth timber to fast-growing young stands, research at the Andrews shifted in the next few decades to long-term ecosystem investigations that focus on climate, streamflow, water quality, vegetation succession, biogeochemical cycling, and effects of forest management. The Andrews has thus been at the center of a dramatic shift in federal timber practices from industrial, intensive forest management policies to strategies emphasizing biodiversity and healthy ecosystems.
