# [Books] Power To Save The World: The Truth About Nuclear Energy

Eventually, you will certainly discover a new experience and capability by spending more cash. yet when? reach you receive that you require to acquire those every needs like having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will lead you to understand even more in this area the globe, experience, some places, in imitation of history, amusement, and a lot more?

It is your certainly own time to ham it up reviewing habit. in the middle of guides you could enjoy now is **Power to Save the World: The Truth About Nuclear Energy** below.

## **Power to Save the World-**

Gwyneth Cravens 2010-12-01  
An informed look at the myths and fears surrounding nuclear energy, and a practical, politically realistic solution to global warming and our energy needs. Faced by the world's oil shortages and curious about alternative energy sources, Gwyneth Cravens skeptically sets out to find the truth about nuclear energy. Her conclusion: it is a

totally viable and practical solution to global warming. In the end, we see that if we are to care for subsequent generations, embracing nuclear energy is an ethical imperative.

## **Power Play-**

Asi Burak 2017-01-31  
The phenomenal growth of gaming has inspired plenty of hand-wringing since its inception--from the press, politicians, parents, and everyone else concerned with its effect on our brains,

bodies, and hearts. But what if games could be good, not only for individuals but for the world? In *Power Play*, Asi Burak and Laura Parker explore how video games are now pioneering innovative social change around the world. As the former executive director and now chairman of Games for Change, Asi Burak has spent the last ten years supporting and promoting the use of video games for social good, in collaboration with leading organizations like the White House, NASA, World Bank, and The United Nations. The games for change movement has introduced millions of players to meaningful experiences around everything from the Israeli-Palestinian conflict to the US Constitution. *Power Play* looks to the future of games as a global movement. Asi Burak and Laura Parker profile the luminaries behind some of the movement's most iconic games, including former Supreme Court judge Sandra Day O'Connor and Pulitzer-Prize winning authors Nicholas Kristof and Sheryl WuDunn. They also explore the promise of virtual reality

to address social and political issues with unprecedented immersion, and see what the next generation of game makers have in store for the future.

How to use renewable energy as your alternative power suppliers! Get All The Support And Guidance You Need To Be A Success At Helping Save Power! In today's unstable economic condition, many people have been looking for ways to cut costs and save money while protecting the environment. The poorest people in the world are those who are more affected by the devastating effects of climate change, caused by increased carbon dioxide emissions. Energy efficiency is one of the most cost effective and easiest methods to combat climate change and clean the air that we breathe. The Department of Energy is even working together with businesses, universities and national laboratories to develop innovative, energy-efficient technologies. The use of Renewable Energy has been

found to be the most efficient ways to help people save power and at the same time reduce the impact on the environment. This is also an important part of the energy revolution that we need in order to curb the shattering climate change. By taking full advantage of our natural resources, saving power usage and using renewable energy, together, we can shape a better world for the future. By saving power, we are helping the environment. This will not only improve our lives, but will also help make our lives simpler, more enjoyable and happier. You can always help save the world and you can do this by saving energy. Lessen your carbon emission, enhance the health of the Earth and save the world. **Can Finance Save the World?**-Bertrand Badré 2018-01-30 "The world is changing, but innovative answers can be found in tradition. Badre offers comprehensive outlines as to how finance is the key to ensuring a sustainable future, ripe with growth, eradication of poverty and modernization"--

**Chasing the Flame-** Samantha Power 2008 Traces the political career of the United Nations humanitarian who lost his life in the 2003 terrorist attack on the UN Headquarters in Iraq, citing his role in the peace negotiations in post-invasion Lebanon and the cease-fire talks in Bosnia.

**The Power of Existing Buildings**-Robert Sroufe 2019-11-12 In The Power of Existing Buildings, academic sustainability expert Robert Sroufe, and construction and building experts Craig

Stevenson and Beth Eckenrode, explain how to realize the potential of existing buildings and make them perform like new. This step-by-step guide will help readers to: understand where to start a project; develop financial models and realize costs savings; assemble an expert team; and align goals with numerous sustainability programs. The Power of Existing Buildings will challenge you to rethink spaces where people work and play, while determining how existing buildings can save the world. The insights and practical experience of Sroufe, Stevenson, and Eckenrode, along with the project case study examples, provide new insights on investing in existing buildings for building owners, engineers, occupants, architects, and real estate and construction professionals.

### **An Indispensable Truth-**

Francis Chen 2011-04-11  
Recent books have raised the public consciousness about the dangers of global warming and climate change. This book is intended to

convey the message that there is a solution. The solution is the rapid development of hydrogen fusion energy. This energy source is inexhaustible and, although achieving fusion energy is difficult, the progress made in the past two decades has been remarkable. The physics issues are now understood well enough that serious engineering can begin. The book starts with a summary of climate change and energy sources, trying to give a concise, clear, impartial picture of the facts, separate from conjecture and sensationalism. Controlled fusion -- the difficult problems and ingenious solutions -- is then explained using many new concepts. The bottom line -- what has yet to be done, how long it will take, and how much it will cost -- may surprise you. Francis F. Chen's career in plasma has extended over five decades. His textbook Introduction to Plasma Physics has been used worldwide continuously since 1974. He is the only physicist who has published significantly in both experiment and theory and on both magnetic fusion and laser fusion. As an

### **Beauty Will Save the World**-Brian Zahnd 2012

Zahnd issues a challenge to Christians to discover new vitality through re-envisioning, reimagining, and reforming the church according to the pattern of the cruciform. Using stories from the lives of St. Francis of Assisi and from his own life, he teaches believers to stay on the journey to discover the kingdom of God in a fuller, richer way.

**Taming the Sun**-Varun Sivaram 2018-03-02 How solar could spark a clean-energy transition through transformative innovation—creative financing, revolutionary technologies, and flexible energy systems. Solar energy, once a niche application for a limited market, has become the cheapest and fastest-

growing power source on earth. What's more, its potential is nearly limitless—every hour the sun beams down more energy than the world uses in a year. But in *Taming the Sun*, energy expert Varun Sivaram warns that the world is not yet equipped to harness erratic sunshine to meet most of its energy needs. And if solar's current surge peters out, prospects for replacing fossil fuels and averting catastrophic climate change will dim. Innovation can brighten those prospects, Sivaram explains, drawing on firsthand experience and original research spanning science, business, and government. Financial innovation is already enticing deep-pocketed investors to fund solar projects around the world, from the sunniest deserts to the poorest villages. Technological innovation could replace today's solar panels with coatings as cheap as paint and employ artificial photosynthesis to store intermittent sunshine as convenient fuels. And systemic innovation could add flexibility to the world's power

grids and other energy systems so they can dependably channel the sun's unreliable energy. Unleashing all this innovation will require visionary public policy: funding researchers developing next-generation solar technologies, refashioning energy systems and economic markets, and putting together a diverse clean energy portfolio. Although solar can't power the planet by itself, it can be the centerpiece of a global clean energy revolution. A Council on Foreign Relations Book

### **Can Female Power Save the Planet?**

-Rasa Von Werder 2006-09 "Your book should help bridge the gap between the academic definitions and research on Matriarchy and real world initiatives." BEATA MURRELL, MATRIARCHAL SCHOLAR "When a cork is no longer held down it rises up. This is what has happened with Women." WILLIAM BOND, AUTHOR OF 'GOSPEL OF THE GODDESS' Patriarchy is destroying the planet, and everything on it. Fortunately, patriarchy is at an

end. Changes have occurred, both inner and outer, to transform our society from a 'conquest domination/exploitation principle into one of 'nurturing/caring/justice.' This monumental shift is so vast, that it is not easily seen in details nor at all moments. As we look at day to day existence, male domination is everywhere. But if we look at the big picture, at statistics, studies, astute observation, and by the insight of those who have been focused on the subject, it is obvious. The book begins with the series of articles explaining that males exhibit the need to worship women, an ancient practice forbidden in patriarchy, now surfacing in secular forms. From whence is this need? Why do women show no need to conversely, worship males? This and more are all explained here.

Climate March and the Women's March. School strikes for climate and the #MeToo movement. Rebellions against extinction and declarations that time's up. More than concurrent, the two trends are deeply connected. From sinking islands to drought-ridden savannas, the global warming crisis places an outsized burden on women, largely because of gender inequalities. In many parts of the world, women hold traditional roles as the primary caregivers in families and communities, and as the main providers of food and fuel, they are more vulnerable when flooding and drought occur; the U.N. estimates 80% of those who have been displaced by climate change are women. Women are on the front line of the climate-change battle, and are uniquely situated to be agents of change--to find ways to mitigate the causes of global warming and adapt to its impacts on the ground. Today, across the world, from boardrooms and policy positions to local communities, from science to activism, women everywhere

are using their voices to take leadership and call for action on climate change. This anthology is a collection and celebration of these diverse voices, asking critical questions and providing invaluable insight and solutions. Curated by two climate leaders, this book leads us away from the brink and toward the possibility of a life-giving future"--

### **The Life You Can Save-**

Peter Singer 2009-03-03 For the first time in history, eradicating world poverty is within our reach. Yet around the world, a billion people struggle to live each day on less than many of us pay for bottled water. In *The Life You Can Save*, Peter Singer uses ethical arguments, illuminating examples, and case studies of charitable giving to show that our current response to world poverty is not only insufficient but morally indefensible. *The Life You Can Save* teaches us to be a part of the solution, helping others as we help ourselves.

**How You Can Save the Planet**-Hendrikus van Hensbergen 2021-03-11 YOU have the power to change the world! **Why Women Will Save the Planet**-Friends of the Earth 2015-12-01 Cities across the globe are growing fast. Today many are environmental nightmares with polluted air, excessive energy consumption and an absence of nature. But big cities don't have to mean a dystopian future. They can be turned around to be powerhouses of well-being and environmental stability - if we empower women. This book is a unique collaboration between C40 and Friends of the Earth showcasing pioneering voices in the environmental and feminist movements. This book reveals just how women's empowerment is critical to environmental sustainability. This book is a rallying call - for the planet, for women, for everyone.

**Ten Technologies to Save the Planet**-Chris Goodall 2010 Respected, authoritative, award-winning

author Chris Goodall tackles global warming reversal in this engaging and balanced book. *Ten Technologies to Save the Planet* -- popular science writing at its most crucial -- is arguably the most readable and comprehensive overview of large-scale solutions to climate change available. Goodall profiles ten technologies with the potential to slash global greenhouse emissions, explaining how they work and telling the stories of the inventors, scientists, and entrepreneurs who are driving them forward. Some of Goodall's selections, such as the electric car, are familiar. Others, like algae and charcoal, are more surprising. Illustrated with black-and-white photos and simple charts, *Ten Technologies to Save the Planet* combines cutting-edge analysis with straightforward explanations about pros and cons, and debunks myths along the way.

**Will China Save the Planet?**-Barbara Finamore  
2018-11-02 Now that Trump has turned the United States

into a global climate outcast, will China take the lead in saving our planet from environmental catastrophe? Many signs point to yes. China, the world's largest carbon emitter, is leading a global clean energy revolution, phasing out coal consumption and leading the development of a global system of green finance. But as leading China environmental expert Barbara Finamore explains, it is anything but easy. The fundamental economic and political challenges that China faces in addressing its domestic environmental crisis threaten to derail its low-carbon energy transition. Yet there is reason for hope. China's leaders understand that transforming the world's second largest economy from one dependent on highly polluting heavy industry to one focused on clean energy, services and innovation is essential, not only to the future of the planet, but to China's own prosperity.

inexpensive, and practical way to cut greenhouse gas emissions and prevent catastrophic climate change. As climate change quickly approaches a series of turning points that guarantee disastrous outcomes, a solution is hiding in plain sight. Several countries have already replaced fossil fuels with low-carbon energy sources, and done so rapidly, in one to two decades. By following their methods, we could decarbonize the global economy by midcentury, replacing fossil fuels even while world energy use continues to rise. But so far we have lacked the courage to really try. In this clear-sighted and compelling book, Joshua Goldstein and Staffan Qvist explain how clean energy quickly replaced fossil fuels in such places as Sweden, France, South Korea, and Ontario. Their people enjoyed prosperity and growing energy use in harmony with the natural environment. They didn't do this through personal sacrifice, nor through 100 percent renewables, but by using them in combination with an energy source the Swedes call

k kraft, hundreds of times safer and cleaner than coal. Clearly written and beautifully illustrated, yet footnoted with extensive technical references, Goldstein and Qvist's book will provide a new touchstone in discussions of climate change. It could spark a shift in world energy policy that, in the words of Steven Pinker's foreword, literally saves the world.

### **"A "A Problem From Hell"**

-Samantha Power  
2013-05-14 A character-driven study of some of the darkest moments in our national history, when America failed to prevent or stop 20th-century campaigns to exterminate Armenians, Jews, Cambodians, Iraqi Kurds, Bosnians, and Rwandans.

**We Are Power**-Todd Hasak-Lowy  
2020-04-07 A stirring look at nonviolent activism, from American suffragists to Civil Rights to the Climate Change Movement We Are Power brings to light the incredible individuals who

have used nonviolent activism to change the world. The book explores questions such as what is nonviolent resistance and how does it work? In an age when armies are stronger than ever before, when guns seem to be everywhere, how can people confront their adversaries without resorting to violence themselves? Through key international movements as well as people such as Gandhi, Alice Paul, Martin Luther King, Cesar Chavez, and Václav Havel, this book discusses the components of nonviolent resistance. It answers the question "Why nonviolence?" by showing how nonviolent movements have succeeded again and again in a variety of ways, in all sorts of places, and always in the face of overwhelming odds. The book includes endnotes, a bibliography, and an index.

### **How to Change the World-**

David Bornstein 2007-09-17  
Now published in more than twenty countries, David Bornstein's How to Change the World has become the bible for social entrepreneurship--in which

men and women around the world are finding innovative solutions to a wide variety of social and economic problems. Whether delivering solar energy to Brazilian villagers, expanding work opportunities for disabled people across India, creating a network of home-care agencies to serve poor people with AIDS in South Africa, or bridging the college-access gap in the United States, social entrepreneurs are pioneering problem-solving models that will reshape the 21st century. How to Change the World provides vivid profiles of many such individuals and what they have in common. The book is an In Search of Excellence for social initiatives, intertwining personal stories, anecdotes, and analysis. Readers will discover how one person can make an astonishing difference in the world. The case studies in the book include Jody Williams, who won the Nobel Peace Prize for the international campaign against landmines she ran by e-mail from her Vermont home; Roberto Baggio, a 31-year old Brazilian who has established eighty computer

schools in the slums of Brazil; and Diana Propper, who has used investment banking techniques to make American corporations responsive to environmental dangers. The paperback edition will offer a new foreword by the author that shows how the concept of social entrepreneurship has expanded and unfolded over the last few years, including the Gates-Buffetts charitable partnership, the rise of Google, and the increased mainstream coverage of the subject. The book will also update the stories of individual social entrepreneurs that appeared in the cloth edition.

**The Powerhouse**-Steve Levine 2016 The United States, China and virtually every other nation with an industrial base have concluded that powerful advanced batteries and the product that will chiefly use them - affordable, long-distance electric cars - will be the world's next great engine of economic growth. The Powerhouse tells the story of a group of U.S. scientists working towards this great

technological breakthrough, following them over a two year period of emotional highs, setbacks and innovation. This is the story of cutting-edge science, and the people working towards a world-changing battery.

inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold

solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Nonprofit and philanthropic organizations are under increasing pressure to do more and to do better to increase and improve productivity with fewer resources. Social entrepreneurs, community-minded leaders, nonprofit organizations, and philanthropists now recognize that to achieve greater impact they must adopt a network-centric approach to solving difficult problems. Building networks of like-minded organizations and people offers them a way to weave together and create strong alliances that get better leverage, performance, and results than any single organization is able to do. While the advantages of such networks are clear, there are few resources that offer easily understandable, field-tested information on how to form and manage social-impact networks. Drawn from the authors' deep experience with more than thirty successful network projects, *Connecting to Change the World* provides the frameworks, practical advice, case studies, and expert knowledge needed to build better performing

networks. Readers will gain greater confidence and ability to anticipate challenges and opportunities. Easily understandable and full of actionable advice, *Connecting to Change the World* is an informative guide to creating collaborative solutions to tackle the most difficult challenges society faces.

volume of *Power Quest, The Ascendancy of Antichrist in America*, Woodward brings to the reader the recently declassified proof our America has often shunned its most noble ideals. The author uncovers a vast record of unethical and deceptive Federal activities committed in Washington's darkened corridors of political power. Woodward condenses mountains of highly reliable research compiled by authoritative investigative journalists and insiders along with his own well-turned analysis, demonstrating that the political and spiritual evil of Nazism was often excused and encouraged by American officials as part of a blind quest to fight communism during the Cold War. Woodward makes no secret of his evangelical perspective. But *Power Quest: The Ascendancy of Antichrist in America* is not a selective proof texting of biblical assertions or a diatribe against liberal political views. His account is a factual history that most Americans have never heard. For conservative Christian readers, Woodward speaks

prophetically - challenging the cherished assumption held by political conservatives that America traditionally takes the moral high ground. And he poses an alternative view to the typical eschatological position, asking "Could America be the seat of power for a literal personage the Bible calls Antichrist?"

**Climate of Hope**-Michael Bloomberg 2017-04-18 NEW YORK TIMES BESTSELLER From Mayor Michael Bloomberg and former head of the Sierra Club Carl Pope comes a manifesto on how the benefits of taking action on climate change are concrete, immediate, and immense. They explore climate change solutions that will make the world healthier and more prosperous, aiming to begin a new type of conversation on the issue that will spur bolder action by cities, businesses, and citizens—and even, someday, by Washington. "Climate of Hope is an inspiring must read."

—Former Vice President Al Gore, Chairman of The Climate Reality Project  
“Climate change threatens to reshape the future of our world's population centers. Bloomberg and Pope have been leaders on fortifying our cities against this threat, and their book proves that victory is possible—and imperative.”

—Leonardo DiCaprio "If Trump is looking for a blueprint, he could not do better than to read a smart new book, *Climate of Hope*."

—Thomas Friedman in *The New York Times* ~ The 2016 election left many people who are concerned about the environment fearful that progress on climate change would come screeching to a halt. But not Michael Bloomberg and Carl Pope. Bloomberg, an entrepreneur and former mayor of New York City, and Pope, a lifelong environmental leader, approach climate change from different perspectives, yet they arrive at similar conclusions. Without agreeing on every point, they share a belief that cities, businesses, and citizens can lead—and win—the battle against climate change, no matter

which way the political winds in Washington may shift. In *Climate of Hope*, Bloomberg and Pope offer an optimistic look at the challenge of climate change, the solutions they believe hold the greatest promise, and the practical steps that are necessary to achieve them. Writing from their own experiences, and sharing their own stories from government, business, and advocacy, Bloomberg and Pope provide a road map for tackling the most complicated challenge the world has ever faced. Along the way, they turn the usual way of thinking about climate change on its head: from top down to bottom up, from partisan to pragmatic, from costs to benefits, from tomorrow to today, and from fear to hope.

A vibrant new voice . . . a modern classic. For generations, the Beaumont family has harbored a magical secret. They each possess a "savvy"—a special supernatural power that strikes when they turn thirteen. Grandpa Bomba moves mountains, her older brothers create hurricanes and spark electricity . . . and now it's the eve of Mibs's big day. As if waiting weren't hard enough, the family gets scary news two days before Mibs's birthday: Poppa has been in a terrible accident. Mibs develops the singular mission to get to the hospital

and prove that her new power can save her dad. So she sneaks onto a salesman's bus . . . only to find the bus heading in the opposite direction. Suddenly Mibs finds herself on an unforgettable odyssey that will force her to make sense of growing up—and of other people, who might also have a few secrets hidden just beneath the skin.

**Unknown Fate**-Eric Fulton 2016-12-11 Since the dawn of time, fire has been the essence of light, protection, and destruction. As an ally and savior, it has built the mightiest of citadels, empires, and countries. As an enemy and destroyer, it has consumed everything it touches. It was prophesied in the Ancient world, that the destruction of Earth, as we know it, would come in the form of fire. But what if fire was the essence we needed to save this world? During the early 1970's, after segregation, an unlikely bond formed between an African America boy named Billy Smalls and Caucasian girl named Mariah Clover. Though segregation was over, the

southern town of Stone Mountain, Georgia held on to many of their racial ideologies. Though their friendship faced many obstacles, Billy and Mariah formed a bond of undying love. At the center of Stone Mountain's economy is a nuclear power plant that is owned by a business tycoon who inherited his father's wealth. Needing to make his own mark on the world, he does whatever it takes to gain more control and power. After him and Billy's paths cross, they are effected by a nuclear disaster that changes the fate of the world as super human powers emerge and evil tries to conquer it. However, in the midst of evil, a hero is born with the power of the sun. Despite having super powers, treachery and betrayal awaits around every corner. Though young, this hero journeys into the unknown to protect and save the world. Will this hero be ready for the world's greatest adversaries, or will everything be consumed by evil?

dryer than most parts of the world, the Middle East could soon see climate change exacerbate food and water shortages, aggravate social inequalities, and drive displacement and political destabilization. And as renewable energy eclipses fossil fuels, oil rich countries in the Middle East will see their wealth diminish. Amidst these imminent risks is a call to action for regional leaders. Could countries such as Saudi Arabia, Kuwait, and the United Arab Emirates harness the region's immense potential for solar energy and emerge as vanguards of global climate action? The Power of Deserts surveys regional climate models and identifies the potential impact on socioeconomic disparities, population movement, and political instability. Offering more than warning and fear, however, the book highlights a potentially brighter future--a recent shift across the Middle East toward renewable energy. With his deep knowledge of the region and knack for presenting scientific data with clarity, Dan Rabinowitz makes a sober yet surprisingly optimistic

investigation of opportunity arising from a looming crisis.

**Save the Congo, to Stop World War III-Bartolomeu**

Capita 2016-04-12 "Will one of the biggest and bloodiest economic wars of human history decide the future order of the global community?" Bartolomeu Capita's powerful book launches an in-depth exploration of this prescient question posed by Milo Rau, and though the truth might be painful, Capita's solution is enormously empowering. Digging into the disgraceful history of plunder and looting in the Congo Basin, Save the Congo to Stop World War III shines a much-needed light onto the sadistic hidden agenda behind the present plight of the region-and charts a bold course forward for Africans everywhere. Capita shows racism, exclusion, and theft of black heritage are the drivers of the violence and poverty plaguing the Congo and the perpetrators have assigned Angola-with its vast oil riches under the leadership of the puppet couple Isabel dos Santos and Sindika Dokolo-as the mercenary charged with exterminating the native population, leaving the natural resources free for the taking. Although the early

stages of WWII are in motion, it's not too late to change course. It is time for the black race to rise to the occasion and, through self-awareness and reempowerment, become the solution to creating a better world on a global scale.

### **Power, Control,**

**Conformance**-A. J. Aaron

2014-07-09 Psychopath + Empath = World Domination? When Roland Vandergrift, a psychopath with a PhD in Neuro-physiology and Psychiatry wants something, he always gets it. Or does he. Will Sedric Jace, a high degree empath with a PhD in Physics, become like his psychopathic boss and mentor, Roland Vandergrift? Will Sedric be lured into the world of power, control, and conformance and help Roland achieve world domination? Enter a world of big business where Lean Transformations have enabled massive reductions in work forces and closing of manufacturing plants. A world where the women are turned into stepford wives through the use of pharmaceuticals that affect their DNA to keep them

subservient and devoted to men. A world where secrets are shared amongst a few privileged elite, in a special club where secrecy violations are met with the penalty of death. If a high degree empath can hear others' thoughts, experience their feelings, and heal others, can a cold and calculating psychopath be the other end of the scale and capable of causing death purely through intention? It is known that one in every 25 people is a psychopath. That doesn't mean they are killers and many make excellent CEO's, commanders, and leaders. They learn to fit in well and present some of the emotions of normal people without becoming emotionally involved with decisions. However, to them, other people are still no more than objects moving through space. Empaths are less well known since they never cause harm and fit well into society as caring and empathetic persons. Some intuit others' feelings, while high degree empaths can even read minds and heal. Can empaths be turned into psychopaths and use their powers for killing

instead of healing? What could possibly replace power, control, and conformance in this world? Can these three methods, used for centuries by governments, the military, and religions to amass wealth, create empires, and shape society, be replaced, or should they simply be accepted since that is how the world works. Join Doctor Sedric Jace in his quest for answers. Look inside and start reading now.

**Eon's Door**-J. G. McKenney  
2011 \*\*\*A Reader Views Award winner and Eric Hoffer Award finalist\*\*\* The Dark Forest is moving and a horde of bloodthirsty monsters is on the hunt. For the peaceful denizens of Erla, time is running out. Two thousand years have passed since the three clans fled the world of humans through Eon's Door to find sanctuary in a realm called Erla, and now a prophecy left to them by the ancient race that created the tree portal is coming true. A trusted sage has stolen the portal's key and is using the awesome power that separated the worlds to tear apart the very soul of Nature.

The key must be taken back and Eon's Door closed--before it's too late. Hope lies with a "child of doubt" from the world the clans left behind and the courageous young Erlan who's been sent to find him. Together they must retrieve the key and close Eon's Door. It won't be easy. Abominations of beasts and trees stand between them and their goal. Even worse, the sage knows the prophecy and is expecting them. "Avatar meets The Lord of the Rings." "A captivating storyline with a lovely surprise at the end...beautiful imagery, and a great read." Sift Book Reviews

**Wonderpowers: the Power of Truth Will Save the World**-Maggie Moline  
2010-09-14 What we are thinking is what we attract and create, so this book looks at our collective consciousness to see what we have collectively been thinking and doing wrong since the beginning of time to create all of the problems in the world. Then, as we awaken, we can begin to rebuild our consciousness and

world from the ground up to create a new foundation with new programs and thinking that do serve us. As we look at the role that religion and government has played, we can also arrive with a new understanding and direction of where to go from here, starting with learning to think globally and become World

Citizens! We must unite with our new collective consciousness of World Peace and act accordingly, as 'The Power of Truth will save the World!'
