The Buffalo Creek Disaster-Gerald M. Stern
2011-01-26 One Saturday morning in February 1972, an impoundment dam owned by the Pittston Coal Company burst, sending a 130 million gallon, 25 foot tidal wave of water, sludge, and debris crashing into southern West Virginia's Buffalo Creek hollow. It was one of the deadliest floods in U.S. history. 125 people were killed instantly, more than 1,000 were injured, and over 4,000 were suddenly homeless. Instead of accepting the small settlements offered by the coal company's insurance offices, a few hundred of the survivors banded together to sue. This is the story of their triumph over incredible odds and corporate irresponsibility, as told by Gerald M. Stern, who as a young lawyer and took on the case and won.

Everything In Its Path-Kai T. Erikson
2012-04-10 The 1977 Sorokin Award-winning story of Buffalo Creek in the aftermath of a devastating flood. On February 26, 1972, 132-million gallons of debris-filled muddy water burst

through a makeshift mining-company dam and roared through Buffalo Creek, a narrow mountain hollow in West Virginia. Following the flood, survivors from a previously tightly knit community were crowded into trailer homes with no concern for former neighborhoods. The result was a collective trauma that lasted longer than the individual traumas caused by the original disaster. Making extensive use of the words of the people themselves, Erikson details the conflicting tensions of mountain life in general—the tensions between individualism and dependency, self-assertion and resignation, self-centeredness and group orientation—and examines the loss of connection, disorientation, declining morality, rise in crime, rise in out-migration, etc., that resulted from the sudden loss of neighborhood.

Prolonged Psychosocial Effects of Disaster-

A New Species of Trouble-Kai T. Erikson 1995
In the twentieth century, disasters caused by human beings have become more and more common. Unlike earthquakes and other natural catastrophes, this 'new species of trouble' afflicts person and groups in particularly disruptive ways.

Strange as This Weather Has Been-Ann Pancake 2007-09-10
A West Virginia family struggles amid the booms and busts of the coal industry in this novel from an author called "Appalachia's Steinbeck" (Jayne Anne Phillips). Set in present day West Virginia, this debut novel tells the story of a coal mining family—a couple and their four children—living through the latest mining boom and dealing with the mountaintop removal and strip mining that is ruining what is left of their hometown. As the mine turns the mountains "to slag and wastewater, workers struggle with layoffs and children find adventure in the blasted moonscape craters. Strange as This Weather Has Been follows several members

of the family, with a particular focus on fifteen-year-old Bant and her mother, Lace. Working at a motel, Bant becomes involved with a young miner while her mother contemplates joining the fight against the mining companies. As domestic conflicts escalate at home, the children are pushed more and more frequently outside among junk from the floods and felled trees in the hollows—the only nature they have ever known. But Bant has other memories and is as curious and strong-willed as her mother, and ultimately comes to discover the very real threat of destruction that looms as much in the landscape as it does at home. “Powerful, sure-footed and haunting.” —The New York Times Book Review

Buffalo Creek-J. Dennis Deitz 1992

Removing Mountains-Rebecca R. Scott 2010
An ethnography of coal country in southern West Virginia.

Last Ragged Breath-Julia Keller 2015-08-25
From the night-black depths of a coalmine to the sun-struck peaks of the Appalachian Mountains, from a riveting murder mystery to a poignant meditation on the meaning of love and family, the latest novel in the critically acclaimed series strikes out for new territory: the sorrow and outrage that spring from a real-life chapter in West Virginia history. Royce Dillard doesn't remember much about the day his parents-and one hundred and twenty-three other souls-died in the 1972 Buffalo Creek disaster. He was only two years old when he was ripped from his mother's arms. But now Dillard, who lives off the grid with only a passel of dogs for company, is fighting for his life one more time: He's on trial for murder. Prosecutor Bell Elkins faces her toughest challenge yet in this haunting story of vengeance, greed and the fierce struggle for social justice. Richly imagined, vividly written and deeply felt, Julia Keller's Last Ragged Breath is set in West Virginia, but it really takes place in a land we all

know: the country called home.

Come Hell Or High Water-Michael Eric Dyson
2010-10-01 What Hurricane Katrina reveals about the fault lines of race and poverty in America-and what lessons we must take from the flood-from best-selling "hip-hop intellectual" Michael Eric Dyson Does George W. Bush care about black people? Does the rest of America? When Hurricane Katrina tore through New Orleans and the Gulf Coast, hundreds of thousands were left behind to suffer the ravages of destruction, disease, and even death. The majority of these people were black; nearly all were poor. The federal government's slow response to local appeals for help is by now notorious. Yet despite the cries of outrage that have mounted since the levees broke, we have failed to confront the disaster's true lesson; to be poor, or black, in today's ownership society, is to be left behind. Displaying the intellectual rigor, political passion, and personal empathy that have won him fans across the color line, Michael Eric

Dyson offers a searing assessment of the meaning of Hurricane Katrina. Combining interviews with survivors of the disaster with his deep knowledge of black migrations and government policy over decades, Dyson provides the historical context that has been sorely missing from public conversation. He explores the legacy of black suffering in America since slavery, including the shocking ways that black people are framed in the national consciousness even today. With this call-to-action, Dyson warns us that we can only find redemption as a society if we acknowledge that Katrina was more than an engineering or emergency response failure. From the TV newsroom to the Capitol Building to the backyard, we must change the ways we relate to the black and the poor among us. What's at stake is no less than the future of democracy.

There is No Such Thing as a Natural Disaster-Gregory Squires 2013-01-11 There is No Such Thing as a Natural Disaster is the first comprehensive critical book on the catastrophic

impact of Hurricane Katrina on New Orleans. The disaster will go down on record as one of the worst in American history, not least because of the government's inept and cavalier response. But it is also a huge story for other reasons; the impact of the hurricane was uneven, and race and class were deeply implicated in the unevenness. Hartman and. Squires assemble two dozen critical scholars and activists who present a multifaceted portrait of the social implications of the disaster. The book covers the response to the disaster and the roles that race and class played, its impact on housing and redevelopment, the historical context of urban disasters in America and the future of economic development in the region. It offers strategic guidance for key actors - government agencies, financial institutions, neighbourhood organizations - in efforts to rebuild shattered communities.

One Real American-Joseph Bruchac 2020-10-27
Children's book icon Joseph Bruchac tells the fascinating story of a Seneca (Iroquois) Civil War officer Ely S. Parker (1828-1895) is one of the most unique but little-known figures in US history. A member of the Seneca (Iroquois) Nation, Parker was an attorney, engineer, and tribal diplomat. Raised on a reservation but schooled at a Catholic institution, he learned English at a young age and became an interpreter for his people. During the American Civil War, he was commissioned as a lieutenant colonel and was the primary draftsman of the

terms of the Confederate surrender at Appomattox. He eventually became President Grant's Commissioner of Indian Affairs, the first Native American to hold that post. Award-winning children's book author and Native American scholar Joseph Bruchac provides an expertly researched, intimate look at a man who achieved great success in two worlds yet was caught between them. Includes archival photos, maps, endnotes, bibliography, and timeline.

Finding Comfort During Hard Times-Earl Johnson 2020-04-08 Finding Comfort is a book about easing grief and trauma after unimaginable horrors - mass shootings, catastrophic natural disasters and terrorist acts. Personal recollections of responding to tragedy, combined with a practical application, Earl Johnson offers readers the tools they need to seek support and offer it to those in need. The book walks through the life-cycle of disaster care from the first hours and days to the years that follow. Having been a care provider in a variety

of events, Johnson shares valuable wisdom from those who have worked in the worst situations. Whether you're a first responder, a care professional, a victim of a disaster, a family member, or following a disaster on television or social media, Finding Comfort gives readers guidance and support. Readers don't have to wait for tragedy. this work helps one be prepared through examples and practical suggestions. This book is a ready resource to both those in need looking for help and to those wishing to provide it.

The Fate of the Earth-Jonathan Schell 2000 These two books, which helped focus national attention on the movement for a nuclear freeze, are published in one volume.

Ramp Hollow-Steven Stoll 2017-11-21 How the United States underdeveloped Appalachia In Ramp Hollow, Steven Stoll offers a fresh, provocative account of Appalachia, and why it

matters. He begins with the earliest European settlers, whose desire for vast forests to hunt in was frustrated by absentee owners—including George Washington and other founders—who laid claim to the region. Even as Daniel Boone became famous as a backwoods hunter and guide, the economy he represented was already in peril. Within just a few decades, Appalachian hunters and farmers went from pioneers to pariahs, from heroes to hillbillies, in the national imagination, and the area was locked into an enduring association with poverty and backwardness. Stoll traces these developments with empathy and precision, examining crucial episodes such as the Whiskey Rebellion, the founding of West Virginia, and the arrival of timber and coal companies that set off a devastating “scramble for Appalachia.” At the center of Ramp Hollow is Stoll’s sensitive portrayal of Appalachian homesteads. Perched upon ridges and tucked into hollows, they combined small-scale farming and gardening with expansive foraging and hunting, along with distilling and trading, to achieve self-sufficiency

and resist the dependence on cash and credit arising elsewhere in the United States. But the industrialization of the mountains shattered the ecological balance that sustained the households. Ramp Hollow recasts the story of Appalachia as a complex struggle between mountaineers and profit-seeking forces from outside the region. Drawing powerful connections between Appalachia and other agrarian societies around the world, Stoll demonstrates the vitality of a peasant way of life that mixes farming with commerce but is not dominated by a market mind-set. His original investigation, ranging widely from history to literature, art, and economics, questions our assumptions about progress and development, and exposes the devastating legacy of dispossession and its repercussions today.

Death at Buffalo Creek-Tom Nugent

Children of Katrina-Alice Fothergill 2015-09-01

When children experience upheaval and trauma, adults often view them as either vulnerable and helpless or as resilient and able to easily “bounce back.” But the reality is far more complex for the children and youth whose lives are suddenly upended by disaster. How are children actually affected by catastrophic events and how do they cope with the damage and disruption? Children of Katrina offers one of the only long-term, multiyear studies of young people following disaster. Sociologists Alice Fothergill and Lori Peek spent seven years after Hurricane Katrina interviewing and observing several hundred children and their family members, friends, neighbors, teachers, and other caregivers. In this book, they focus intimately on seven children between the ages of three and eighteen, selected because they exemplify the varied experiences of the larger group. They find that children followed three different post-disaster trajectories—declining, finding equilibrium, and fluctuating—as they tried to regain stability. The children’s moving stories illuminate how a

devastating disaster affects individual health and well-being, family situations, housing and neighborhood contexts, schooling, peer relationships, and extracurricular activities. This work also demonstrates how outcomes were often worse for children who were vulnerable and living in crisis before the storm. Fothergill and Peek clarify what kinds of assistance children need during emergency response and recovery periods, as well as the individual, familial, social, and structural factors that aid or hinder children in getting that support.

International Handbook of Traumatic Stress Syndromes-John P. Wilson 2013-06-29

Over 100 researchers from 16 countries contribute to the first comprehensive handbook on post-traumatic stress disorder. Eight major sections present information on assessment, measurement, and research protocols for trauma related to war veterans, victims of torture, children, and the aged. Clinicians and researchers will find it an indispensable reference, touching on such

disciplines and psychiatry, psychology, social work, counseling, sociology, neurophysiology, and political science.

Preparing for the Psychological

Consequences of Terrorism-Institute of Medicine 2003-08-26 The Oklahoma City bombing, intentional crashing of airliners on September 11, 2001, and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism. These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result. Preparing for the Psychological Consequences of Terrorism highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention. The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to

the psychological consequences of a variety of terrorism events can be formulated. The report includes recommendations for the training and education of service providers, ensuring appropriate guidelines for the protection of service providers, and developing public health surveillance for preevent, event, and postevent factors related to psychological consequences.

The Rehnquist Choice-John W. Dean

2002-02-01 The explosive, never-before-revealed story of how William Rehnquist became a Supreme Court Justice, told by the man responsible for his candidacy.

Children and Disasters-Conway F. Saylor

2013-06-29 In response to the growing concern for the psychological impact of disasters on children, this book integrates a diverse body of literature-including theory, case studies and other research, and assessment and intervention techniques-contributed by many of the fields

most experienced professionals. Child and school psychologists, psychiatrists, nurses, mental health administrators, and pediatricians will all appreciate the work's unique focus on the reaction of children to extreme stress.

Place Attachment-Irwin Altman 2012-12-06 In step with the growing interest in place attachment, this volume examines the phenomena from the perspective of several disciplines-including anthropology, folklore, and psychology-and points towards promising directions of future research.

A Civil Action-Jonathan Harr 2011-08-10 This true story of an epic courtroom showdown, where two of the nation's largest corporations were accused of causing the deaths of children from water contamination, was a #1 national bestseller and winner of the National Book Critics Circle Award. Described as "a page-turner filled with greed, duplicity, heartache, and bare-

knuckle legal brinksmanship by The New York Times, *A Civil Action* is the searing, compelling tale of a legal system gone awry—one in which greed and power fight an unending struggle against justice. Yet it is also the story of how one man can ultimately make a difference. Representing the bereaved parents, the unlikeliest of heroes emerges: a young, flamboyant Porsche-driving lawyer who hopes to win millions of dollars and ends up nearly losing everything, including his sanity. With an unstoppable narrative power reminiscent of Truman Capote's *In Cold Blood*, *A Civil Action* is an unforgettable reading experience that will leave the reader both shocked and enlightened. *A Civil Action* was made into a movie starring John Travolta and Robert Duvall.

The Scotia Widows-Gerald Stern 2008-08-26 On March 9, 1976, a violent explosion, fueled by high concentrations of methane gas and coal dust, ripped through the Scotia mine in the heart of Eastern Kentucky coal country. The blast

killed fifteen miners who were working nearly three and a half miles underground; two days later, a second explosion took the lives of eleven rescue workers. For the miners' surviving family members, the loss of their husbands, fathers, and sons was only the beginning of their nightmare. In *The Scotia Widows*, Gerald M. Stern, the groundbreaking litigator and acclaimed author of *The Buffalo Creek Disaster*, recounts the epic four-year legal struggle waged by the widows in the aftermath of the disaster. Stern shares a story of loss, scandal, and perseverance—and the plaintiffs' fight for justice against the titanic forces of "Big Daddy Coal." Confronted at nearly every turn by a hostile judge and the scorched-earth defense of the Scotia mine's owners, family members also withstood the opprobrium of some of their neighbors, most of whom relied on coal mining for their livelihoods. Meanwhile, Stern, representing the widows of the disaster on contingency, amassed huge bills and encountered a litany of formidable obstacles. The Eastern Kentucky trial judge withheld disclosure of his own personal financial interest in coal

mining, and a popular pro-coal former Kentucky governor served as the lead defense counsel. The judge also suppressed as evidence the federal mine study that pointed to numerous safety violations at the Scotia mine: In a rush to produce more coal, necessary ventilation had been short-circuited, miners had not been trained in the use of self-rescue equipment, and ventilation inspections had not been made. Moreover, Scotia did not even have a trained rescue team. Ultimately, the Scotia widows' ordeal helped to inspire the Federal Mine Safety and Health Act of 1977, which changed safety regulations for coal mines throughout the country. *The Scotia Widows* portrays in gripping detail young women deciding to pursue a landmark legal campaign against powerful corporate interests and the judge who protected them. It is a critically important and timeless story of ordinary people who took a stand and refused to give up hope for justice. Praise for *The Scotia Widows*: "This is a very scary story, a guided tour of the grinding cogs and spinning wheels inside the machinery of justice. Gerald

Stern's compassionate account of the ordeal of the Scotia widows shows you how horribly out of kilter it can all get when greed and self-interest are at the controls. Only with luck and the expertise of Stern does justice emerge in the end, a bit tarnished but still intact." -Jonathan Harr, author of *A Civil Action*

Thunder on the Mountain-Peter A. Galuszka
2012-09-18 Traces the April 2010 disaster, contending that Massey Energy's defiance of regulators resulted in safety violations and perpetuated a corporate culture that prioritized profits over lives, communities, and the environment.

Left to Chance-Steve Kroll-Smith 2015-09-01
How do survivors recover from the worst urban flood in American history, a disaster that destroyed nearly the entire physical landscape of a city, as well as the mental and emotional maps that people use to navigate their everyday lives?

This question has haunted the survivors of Hurricane Katrina and informed the response to the subsequent flooding of New Orleans across many years. *Left to Chance* takes us into two African American neighborhoods—working-class Hollygrove and middle-class Pontchartrain Park—to learn how their residents have experienced “Miss Katrina” and the long road back to normal life. The authors spent several years gathering firsthand accounts of the flooding, the rushed evacuations that turned into weeks- and months-long exile, and the often confusing and exhausting process of rebuilding damaged homes in a city whose local government had all but failed. As the residents’ stories make vividly clear, government and social science concepts such as “disaster management,” “restoring normality,” and “recovery” have little meaning for people whose worlds were washed away in the flood. For the neighbors in Hollygrove and Pontchartrain Park, life in the aftermath of Katrina has been a passage from all that was familiar and routine to an ominous world filled with raw existential uncertainty.

Recovery and rebuilding become processes imbued with mysteries, accidental encounters, and hasty adaptations, while victories and defeats are left to chance.

Disaster Planning and Control-William M. Kramer 2009 In this new book, Bill Kramer examines the complexities of disaster planning and control, covering the concepts of disaster management, development of disaster and emergency operation plans, and much more. Through examples and case studies, the book is designed to allow the fire officer to study how the fire service has been involved with responding to various disasters and, by learning from the past and understanding the concepts presented, make a difference in the overall outcome of future events. Disaster Planning and Control will be an invaluable resource for anyone involved in disaster response--from the frontline worker to the highest elected official. This book is written to the FESHE model curriculum for the Disaster Planning and Recovery course.

The Coal Handbook: Towards Cleaner Production-Dave Osborne 2013-10-31 Coal is an important fossil fuel resource for many nations due to its large remaining resources, relatively low production and processing cost and potential high energy intensity. Certain issues surround its utilisation, however, including emissions of pollutants and growing concern about climate change. The coal handbook: Towards cleaner production Volume 1 reviews the coal production supply chain from analysis to extraction and distribution. Part one explores coal characterisation and introduces the industrial use of coal as well as coal formation, petrography, reserves, sampling and analysis. Part two moves on to review coal extraction and preparation. Chapters highlight advances in coal mining technology, underground coal gas extraction, coal sizing, comminution and cleaning, and solid-liquid separation technologies for coal. Further chapters focus on economic factors affecting coal preparation, post-treatment

of coal, coal tailings treatment, and the optimisation, simulation and control of coal preparation plants. Finally, part three considers aspects of the coal supply chain including the management approach and individual functions such as coal blending and homogenisation, transportation and handling along the entire supply chain. With its distinguished editor and international team of expert contributors, The coal handbook Volumes 1 and 2 is a comprehensive and invaluable resource for professionals in the coal mining, preparation, and utilisation industry, those in the power sector, including plant operators and engineers, and researchers and academics interested in this field. Reviews the coal production supply chain from analysis to extraction and distribution Explores coal characterisation, formation, petrography, reserves, sampling and analysis Examines coal extraction and preparation and highlights advances in coal mining technology, underground coal gas extraction, coal sizing, comminution and cleaning, and solid-liquid separation technologies

Stress Response Syndromes-Mardi Jon Horowitz 1992 In this revised and expanded second edition, Dr. Horowitz places special emphasis on treatment. The chapters on diagnosis, theory and therapeutic technique have been extensively revised. In ten years since the publication of the first edition, Dr. Horowitz has continued to direct the Centre for the Study of Neurosis at the Langley Porter Psychiatric Institute of the University of California, placing particular emphasis on psychotherapy of stress response syndromes. This clinical work has provided the background for a greatly expanded discussion of treatment technique and a new chapter on therapeutics of stress response syndromes. Mental health professional who want to be effective with patients experiencing the stress of bereavement, traumatic accident, medical illness or other life events should find this book a useful guide.

Unnatural Disasters-Angus Macleod Gunn 2003

Looks at sudden and widespread damage to the natural environment caused primarily by human action, including coal mining disasters, dam failures, industrial explosions, oil spills, and terrorist acts.

The Children of Kauai-Emmy E. Werner 1971

Killing Waters-Bob Teets 1985 An injection at birth turns into a miraculous gift from his late father sending 12 year-old Chip and friends on a treasure hunt of a lifetime.

Helping Children Cope with Disasters and Terrorism-Annette Marie La Greca 2002-01-01

This text offers psychotherapists and others involved in emergency response contemporary information on the immediate and lasting effects of trauma on children and adolescents. This volume demonstrates children and adolescents

do have significant reactions that can interfere with their current and future psychological adjustment. Who is most at risk, and what can be done? This text reviews the research and intervention literature on a broad range of natural and man-made disasters, from floods and house-fires to acts of terrorism and war. Chapter authors document children's reactions, identifying factors that may predict or, alternatively, buffer against severe trauma responses. Descriptions of preparatory and post-disaster coping materials and interventions developed for use with children are included. In addition to setting the research agenda and paving the way for theory and model building in this evolving field, this volume has a strong practical emphasis, offering strategies for when and how to intervene, based on clinical observations and empirical evidence.

The Devil Is Here in These Hills-James Green 2015-02-03 "The most comprehensive and comprehensible history of the West Virginia Coal

War I've ever read" (John Sayles, writer and director of *Matewan*). On September 1, 1912, the largest, most protracted, and deadliest working class uprising in American history was waged in West Virginia. On one side were powerful corporations whose millions bought armed guards and political influence. On the other side were fifty thousand mine workers, the nation's largest labor union, and the legendary "miners' angel," Mother Jones. The fight for unionization and civil rights sparked a political crisis that verged on civil war, stretching from the creeks and hollows of the Appalachians to the US Senate. Attempts to unionize were met with stiff resistance. Fundamental rights were bent then broken, and the violence evolved from bloody skirmishes to open armed conflict, as an army of more than fifty thousand miners finally marched to an explosive showdown. Extensively researched and vividly told, this definitive book about an essential chapter in the history of American freedom, "gives this backwoods struggle between capital and labor the due it deserves. [Green] tells a dark, often despairing

story from a century ago that rings true today" (Pittsburgh Post-Gazette).

Style Manual for Political Science-American Political Science Association 2018-11 APSA's Style Manual for Political Science prepares authors for manuscript submission with sections that include: preparation, writing (punctuation and style), parenthetical citations, notes, tables and figures, and additional resources. The Manual acts as an umbrella submission guide for APSA's four member-wide journals and many section journals.

Judicial Process in America-Robert A. Carp 2015-12-30 Known for shedding light on the link among the courts, public policy, and the political environment, *Judicial Process in America* provides a comprehensive overview of the American judiciary. In this Tenth Edition, authors Robert A. Carp, Ronald Stidham, Kenneth L. Manning, and Lisa M. Holmes examine the

recent Supreme Court rulings on same-sex marriage and health care subsidies, the effect of three women justices on the Court's patterns of decision, and the policy-making role of state tribunals. Original data on the decision-making behavior of the Obama trial judges—which are unavailable anywhere else—ensure this text's position as a standard bearer in the field.

The Book of the Dead-Muriel Rukeyser
2017-10-30 Written in response to the Hawk's Nest Tunnel disaster of 1931 in Gauley Bridge, West Virginia, *The Book of the Dead* is an important part of West Virginia's cultural heritage and a powerful account of one of the worst industrial catastrophes in American history. The poems collected here investigate the roots of a tragedy that killed hundreds of workers, most of them African American. They are a rare engagement with the overlap between race and environment in Appalachia. Published for the first time alongside photographs by Nancy Naumburg, who accompanied Rukeyser to

Gauley Bridge in 1936, this edition of *The Book of the Dead* includes an introduction by Catherine Venable Moore, whose writing on the topic has been anthologized in *Best American Essays*.
