Who Gets In and Why-Jeffrey Selingo 2020-09-15 A NEW YORK TIMES NOTABLE BOOK OF 2020 From award-winning higher education journalist and New York Times bestselling author Jeffrey Selingo comes a revealing look from inside the admissions office—one that identifies surprising strategies that will aid in the college search. Getting into a top-ranked college has never seemed more impossible, with acceptance rates at some elite universities dipping into the single digits. In Who Gets In and Why, journalist and higher education expert Jeffrey Selingo dispels entrenched notions of how to compete and win at the admissions game, and reveals that teenagers and parents have much to gain by broadening their notion of what qualifies as a "good college." Hint: It's not all about the sticker on the car window. Selingo, who was embedded in three different admissions offices—a selective private university, a leading liberal arts college, and a flagship public campus—closely observed gatekeepers as they made their often agonizing and sometimes life-changing decisions. He also followed select students and their parents, and he traveled around the country meeting with high school counselors, marketers, behind-the-scenes consultants, and college rankers. While many have long believed that admissions is merit-based, rewarding the best students, Who Gets In and Why presents a more complicated truth, showing that "who gets in" is frequently more about the college's agenda than the applicant. In a world where thousands of equally qualified students vie for a fixed number of spots at elite institutions, admissions officers often make split-second decisions based on a variety of factors—like diversity, money, and, ultimately, whether a student will enroll if accepted. One of the most insightful books ever about "getting in" and what higher education has become, Who Gets In and Why not only provides an usually intimate look at how admissions decisions get made, but guides prospective students on how to honestly assess their strengths and match with the schools that will best serve their interests.

Where You Go Is Not Who You'll Be-Frank Bruni 2015-03-17 Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In Where You Go is Not Who You'll Be, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that—and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

Admission-Jean Hanff Koretitz 2009-04-13 "Admissions. Admission. Aren't there two sides to the word? And two opposing sides...It's what we let in, but it's also what we let out." Her reluctance to confront the truth is suddenly overwhelmed by the resurfacing of a life-altering decision, and Portia is faced with an extraordinary test. Just as thousands of the nation's brightest students await her decision regarding their academic admission, so too must Portia decide whether to make her own ultimate admission. The Admissions-Meg Mitchell Moore 2015-08-18 The Admissions brilliantly captures the frazzled pressure cooker of modern life as a seemingly perfect family comes undone by a few desperate measures, long-buried secret —and college applications! The Hawthorne family has it all. Great jobs, a beautiful house in one of the most affluent areas of Northern California, and three charming kids whose sunny futures are all but assured. And then comes their eldest daughter's senior year of high school . . . Firstborn Angela Hawthorne is a straight-A student and star athlete, with extracurricular activities coming out of her ears and a college application that's not going to write itself. She's set her sights on Harvard, her father's alma mater, and like a dog with a chew toy, Angela won't let up until she's basking in crimson-colored glory. Except her class rank as valedictorian is under attack, she's suddenly losing her edge at cross-country, and she can't help but daydream about a cute baseball player. Of course Angela knows the time put into her schoolgirl crush would be better spent coming up with a subject for her English term paper—which, along with her college essay, has a rapidly approaching deadline. Angela's mother, Nora, is similarly stretched to the limit, juggling parent-teacher meetings, carpool, and a real estate career where she caters to the mega-rich and super-picky buyers and sellers of the Bay Area. The youngest daughter, second-grader Maya, still can't read; the middle child, Cecily, is no longer the happy-go-lucky kid she once was; and their dad, Gabe, seems oblivious to the mounting pressures at home because a devastating secret of his own might be exposed. A few ill-advised moves put the Hawthorne family on a collision course that's equal parts achingly real and delightfully screwball—and they learn that whatever it cost to get their lucky lives it may cost far more to keep them. Sharp, topical, and wildly entertaining, The Admissions shows that if you pull at a loose thread, even the sturdiest lives start to unravel at the seams of high achievement.

Write Your Way In-Rachel Toor 2017-08-03 Writing, for most of us, is bound up with anxiety. It's even worse when it feels like your whole future—or at least where you'll spend the next four years in college—is on the line. It's easy to understand why so many high school seniors put off working on their applications until the last minute or end up with a generic and clichéd essay. The good news? You already have the "secret sauce" for crafting a compelling personal essay: your own experiences and your unique voice. The best essays rarely catalog how students have succeeded or achieved. Good writing shows the reader how you've struggled and describes mistakes you've made. Excellent essays express what you're fired up about, illustrate how you think, and illuminate the ways you've grown. More than twenty million students apply to college every year; many of them look similar in terms of test scores, grades, courses taken, extracurricular activities. Admissions officers wade through piles of files. As an applicant, you need to think about what will interest an exhausted reader. What can you write that will make her argue to admit you instead of the thousands of other applicants? A good essay will be conversational and rich in vivid details, and it could only be written by one person—you. This book will help you figure out how to find and present the best in yourself. You'll acquire some useful tools for writing well—and may even have fun—in the process.

Creating a Class-Mitchell L. Stevens 2009-09-15 In real life, Mitchell Stevens is a professor in bustling New York. But for a year and a half, he worked in the admissions office of a bucolic New England college that is known for its high academic standards, beautiful campus, and social conscience. Ambitious high schoolers and savvy guidance counselors know that admission here is highly competitive. But creating classes, Stevens finds, is a lot more complicated than most people imagine. Admissions officers love students but they work for the good of the school. They must bring each class in "on budget," burnish the statistics so crucial to institutional prestige, and take care of their colleagues in the athletic department and the development office. Stevens shows that the job cannot be done without "systematic preferencing," and racial affirmative action is the least of it. Kids have an edge if their parents can pay full tuition, if they attend high schools with exotic zip codes, if they are athletes—especially football players—and even if they are popular. With nostalgic flair, sensitivity to history, and a keen eye for telling detail, Stevens explains how elite colleges and universities have assumed their central role in the production of the nation's most privileged classes. Creating a Class makes clear that, for better or worse, these schools now define the standards of youthful accomplishment in American culture more generally.

How to Run a College-Brian C. Mitchell 2018-01-15 Residential colleges are the foundation on which US higher education is based. These institutions possess storied traditions fondly cherished by students, alumni, and faculty. There is no denying, however, that all colleges today struggle with changing consumer preferences, high sticker prices, and aging infrastructure. Technological and pedagogical alternatives--not to mention growing political pressure--present complex challenges. What can colleges and smaller universities do to stay relevant in today's educational and economic climate? In their concise guide, How to Run a College, Brian C. Mitchell and W. Joseph King analyze how colleges operate. Widely experienced as trustees, administrators, and faculty, they understand that colleges must update their practices, monetize their assets, and focus on core educational strategies in order to build strong institutions. Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their fundamental strengths. To survive and become sustainable, they must be centers of dynamic learning, as well as economic engines able to power regional, state, and national economies. Rejecting the notion that American colleges are holdovers from a bygone time, How to Run a College shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide.
