King of Capital-David Carey 2012 Strippers and Flippers . . . or a New Positive Force Helping to Drive the Economy . . . The untold story of Steve Schwarzman and Blackstone, the financier and his financial powerhouse that avoided the self-destructive tendencies of Wall Street. David Carey and John Morris show how Blackstone (and other private equity firms) transformed themselves from gamblers, hostile-takeover artists, and 'barbarians at the gate' into disciplined, risk-conscious investors. The financial establishment—banks and investment bankers such as Citigroup, Bear Stearns, Lehman, UBS, Goldman Sachs, Merrill Lynch, Morgan Stanley—were the cowboys, recklessly assuming risks, leveraging up to astronomical levels and driving the economy to the brink of disaster. Blackstone is now ready to break out once again since it is sitting on billions of dollars that can be invested at a time when the market is starved for capital. The story of a financial revolution—the greatest untold success story on Wall Street:Not only have Blackstone and a small coterie of competitors wrested control of corporations around the globe, but they have emerged as a major force on Wall Street, challenging the likes of Goldman Sachs and Morgan Stanley for dominance. Great human interest story:How Blackstone went from two guys and a secretary to being one of Wall Street's most powerful institutions, far outgrowing its much older rival KKR; and how Steve Schwarzman, with a pay packet one year of \$398 million and \$684 million from the Blackstone IPO, came to epitomize the spectacular new financial fortunes amassed in the 2000s. Controversial:Analyzes the controversies surrounding Blackstone and whether it and other private equity firms suck the lifeblood out of companies to enrich themselves—or whether they are a force that helps make the companies they own stronger and thereby better competitors. The story by two insiders with access:Insightful and hard-hitting, filled with never-before-revealed details about the workings of a heretofore secretive company that was the personal fiefdom of Schwarzman and Peter Peterson. Forward-looking:How Blackstone and private equity will drive the economy and provide a model for how financing will work. From the Hardcover edition.

Ling-Stanley H. Brown 1999 What was most remarkable about Jim Ling among the great players of corporate games is that he invented his own. And it worked for a while. In fact, he convinced some of the smartest people on Wall Street that he had a foolproof way. It has been more than 25 years since Ling strode the scene as creator and CEO of Ling-Temco-Vought, once the 14th largest corporation on Fortune's 500 list. When the financial magic he used wore off, he was ousted from the helm. They even changed the name to plain LTV to get his name off the facade that wound up as a bankrupt steelmaker. Without any education beyond high school in Oklahoma and electrician's training in the Navy during World War II, Ling discovered a way to create free money for a while. He called his series of acquisitions and spin-offs Project Redeployment, which made it sound like something grander than it proved to be. But while it worked, it was dazzling, even compared with Michael Milken's rediscovery of undervalued, high-yield (junk) bonds. Unlike Milken, a convicted felon, Ling was a man of integrity whose worst trouble with the law involved a minor regulatory matter. He believed in himself and his venture so thoroughly -- and wrongheadedly -- that he kept all his own and his children's money in his company's stock and was wiped out. The trouble with financial games is that they are easier to play than focusing on sound management and products, and they are surely more fun to watch.

The Education of an American Dreamer-Peter G. Peterson 2009-06-08 With insight and refreshing candor, Peter G. Peterson describes his remarkable life story beginning in Kearney, Nebraska as an eight-year-old manning the cash register at his father's Greek diner through his "Mad Men" advertising days, to Secretary of Commerce in Nixon's paranoid White House, to the tumultuous days of Lehman Brothers, and to the creation of The Blackstone Group, one of the great financial enterprises in recent times. In THE EDUCATION OF AN AMERICAN DREAMER, Peterson chronicles the progress of this journey with irony, humor and, sometimes, painful honesty. Within these pages are stories of marriage and family hardship; lessons in political gamesmanship; thoughts on his obsessive desire to succeed; and, finally, learning the meaning of "enough." From his advertising days in Chicago in the 1950's to becoming the youngest CEO of a Fortune 300 Company, he shares with us his rise to the top and the price paid along the way. As the youngest Cabinet member in the Nixon administration, he describes his survival techniques in a hubris-driven and paranoid White House, including his turbulent turf wars with Treasury Secretary John Connally leading to Peterson's abrupt and highly publicized firing. His stewardship of Lehman Brothers is a Shakespearian tale of a CEO who struggled to deal with partners who were plotting his demise and, at the same time, turning an institution on the brink of bankruptcy to one with 5 straight years of record profits. His life's story is about doing well by doing good. In the wake of Blackstone's highly successful public offering, Peterson found himself an 80-year old instant billionaire, on the verge of retirement. And like many lifetime workers and over-achievers, he suddenly confronts an unexpected, depressing identity crisis. His solution? Committing a great bulk of his net proceeds to establish the Peter G. Peterson Foundation, his philanthropic endeavor to do something about America's politically untouchable challenges that threaten America's future, among them massive entitlement obligations, ballooning health care costs, and our energy gluttony. Ultimately, this is a man's account of his legendary successes, humiliating failures, and personal tragedies - a testament to a remarkable life and, indeed, to the American Dream itself.

She Would Be King-Wayétu Moore 2018-09-11 A novel of exhilarating range, magical realism, and history—a dazzling retelling of Liberia's formation Wayétu Moore's powerful debut novel, She Would Be King, reimagines the dramatic story of Liberia's early years through three unforgettable characters who share an uncommon bond. Gbessa, exiled from the West African village of Lai, is starved, bitten by a viper, and left for dead, but still she survives. June Dey, raised on a plantation in Virginia, hides his unusual strength until a confrontation with the overseer forces him to flee. Norman Aragon, the child of a white British colonizer and a Maroon slave from Jamaica, can fade from sight when the earth calls him. When the three meet in the settlement of Monrovia, their gifts help them salvage the tense relationship between the African American settlers and the indigenous tribes, as a new nation forms around them. Moore's intermingling of history and magical realism finds voice not just in these three characters but also in the fleeting spirit of the wind, who embodies an ancient wisdom. "If she was not a woman," the wind says of Gbessa, "she would be king." In this vibrant story of the African diaspora, Moore, a talented storyteller and a daring writer, illuminates with radiant and exacting prose the tumultuous roots of a country inextricably bound to the United States. She Would Be King is a novel of profound depth set against a vast canvas and a transcendent debut from a major new author.

The Future of Private Equity-Mark Bishop 2012-10-02 The private equity industry is at a cross-roads. In the easy money years between 2004 and 2008, it was awash with investment, debt was easily obtained and some rash, over-leveraged deals were done by the so-called "mega buyout" funds. Today, fund managers are dealing with the legacy of that era, while also figuring out how best to secure new investment and make attractive returns in the age of deleveraging. Many firms are succeeding, sometimes spectacularly, in both developed and emerging markets. Some have developed innovative new business models, while others have reinvented the old. This book contains exclusive interviews with the leaders of many of the world's most successful and innovative funds. These include: Steve Klinsky and Ajit Nedungadi of US growth investors New Mountain Capital and TA Associates; Jon Moulton and Wol Kolade of the British turnaround and growth specialists Better Capital and ISIS Equity Partners; Niten Malhan of Warburg Pincus' Indian operation; Derek Sulger, an Anglo-American who transitioned from setting up telecoms businesses in China to founding Lunar Capital, which backs indigenous entrepreneurs; pan-emerging market specialist Actis and innovative investors in Africa and the Middle East such as Citadel Capital's Hisham El-Khazindar and Abraaj's Mustafa Abdel-Wadood. These in-depth interviews tease out issues such as how private equity managers can best create enterprise value and out-perform public markets without returning to pre-crisis levels of leverage, techniques for differentiating a firm's capital, the sustainability of private equity in emerging markets, the role of the industry in low-income countries and alternatives to the established limited partnership governance model. The Future of Private Equity: Beyond the Mega Buyout is essential reading for anyone working in or with the private equity industry, anywhere in the world.

Commentaries on the Laws of England-William Blackstone 1852

The End of Alchemy: Money, Banking, and the Future of the Global Economy-Mervyn King 2016-03-21 "Mervyn King may well have written the most important book to come out of the financial crisis. Agree or disagree, King's visionary ideas deserve the attention of everyone from economics students to heads of state." —Lawrence H. Summers Something is wrong with our banking system. We all sense that, but Mervyn King knows it firsthand; his ten years at the helm of the Bank of England, including at the height of the financial crisis, revealed profound truths about the mechanisms of our capitalist society. In The End of Alchemy he offers us an essential work about the history and future of money and banking, the keys to modern finance. The Industrial Revolution built the foundation of our modern capitalist age. Yet the flowering of technological innovations during that dynamic period relied on the widespread adoption of two much older ideas: the creation of paper money and the invention of banks that issued credit. We take these systems for granted today, yet at their core both ideas were revolutionary and almost magical. Common paper became as precious as gold, and risky long-term loans were transformed into safe short-term bank deposits. As King argues, this is financial alchemy—the creation of extraordinary financial powers that defy reality and common sense. Faith in these powers has led to huge benefits; the liquidity they create has fueled economic growth for two centuries now. However, they have also produced an unending string of economic disasters, from hyperinflations to banking collapses to the recent global recession and current stagnation. How do we reconcile the potent strengths of these ideas with their inherent

weaknesses? King draws on his unique experience to present fresh interpretations of these economic forces and to point the way forward for the global economy. His bold solutions cut through current overstuffed and needlessly complex legislation to provide a clear path to durable prosperity and the end of overreliance on the alchemy of our financial ancestors.

We March-Shane W. Evans 2012-01-03 On August 28, 1963, a remarkable event took place—more than 250,000 people gathered in our nation's capital to participate in the March on Washington for Jobs and Freedom. The march began at the Washington Monument and ended with a rally at the Lincoln Memorial, where Martin Luther King Jr. delivered his historic "I Have a Dream" speech, advocating racial harmony. Many words have been written about that day, but few so delicate and powerful as those presented here by award-winning author and illustrator Shane W. Evans. When combined with his simple yet compelling illustrations, the thrill of the day is brought to life for even the youngest reader to experience. We March is one of Kirkus Reviews' Best Children's Books of 2012

The Fix-Michelle P. King 2020-03-03 In the vein of #Girlboss and Nice Girls Don't Get the Corner Office, discover how to thrive at work from the head of the Global Innovation Coalition for Change at UN Women with this "passionate, practical roadmap for addressing inequality and finally making our workplaces work for women" (Arianna Huffington). For years, we've been telling women that in order to succeed at work, they have to change themselves first—lean in, negotiate like a man, don't act too nice or you'll never get the corner office. But after sixteen years working with major Fortune 500 companies as a gender equality expert, Michelle King has realized one simple truth—the tired advice of fixing women doesn't fix anything. The truth is that workplaces are gendered; they were designed by men for men. Because of this, most organizations unconsciously carry the idea of an "ideal worker," typically a straight, white man who doesn't have to juggle work and family commitments. Based on King's research and exclusive interviews with major companies and thought leaders, The Fix reveals why denying the fact that women are held back just because they are women—what she calls gender denial—is the biggest obstacle holding women back at work and outlines the hidden sexism and invisible barriers women encounter at work every day. Women who speak up are seen as pushy. Women who ask for a raise are seen as difficult. Women who spend hours networking don't get the same career benefits as men do. Because women don't look like the ideal worker and can't behave like the ideal worker, they are passed over for promotions, paid less, and pushed out of the workforce, not because they aren't good enough, but because they aren't men. In this fascinating and empowering book, King outlines the invisible barriers that hold women back at all stages of their careers, and provides readers with a clear set of takeaways to thrive despite the sexist workplace, as they fight for change from within. Gender equality is not about women, and it is not about men—it is about making workplaces work for everyone. Together, we can fix work, not women.

Chocolate City-Chris Myers Asch 2017-10-17 Monumental in scope and vividly detailed, Chocolate City tells the tumultuous, four-century story of race and democracy in our nation's capital. Emblematic of the ongoing tensions between America's expansive democratic promises and its enduring racial realities, Washington often has served as a national battleground for contentious issues, including slavery, segregation, civil rights, the drug war, and gentrification. But D.C. is more than just a seat of government, and authors Chris Myers Asch and George Derek Musgrove also highlight the city's rich history of local activism as Washingtonians of all races have struggled to make their voices heard in an undemocratic city where residents lack full political rights. Tracing D.C.'s massive transformations—from a sparsely inhabited plantation society into a diverse metropolis, from a center of the slave trade to the nation's first black-majority city, from "Chocolate City" to "Latte City"—Asch and Musgrove offer an engaging narrative peppered with unforgettable characters, a history of deep racial division but also one of hope, resilience, and interracial cooperation.

A Confederacy of Dunces-John Kennedy Toole 2007-12-01 Winner of the Pulitzer Prize "A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing less than a grand comic fugue."—The New York Times Book Review A Confederacy of Dunces is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times).

The Predators' Ball-Connie Bruck 2020-02-04 "Connie Bruck traces the rise of this empire with vivid metaphors and with a smooth command of high finance's terminology." —The New York Times "The Predators' Ball is dirty dancing downtown." —New York Newsday From bestselling author Connie Bruck, The Predators' Ball dramatically captures American business history in the making, uncovering the philosophy of greed that dominated Wall Street in the 1980s. During the 1980s, Michael Milken at Drexel Burnham Lambert was the Billionaire Junk Bond King. He invented such things as "the highly confident letter" ("I'm highly confident that I can raise the money you need to buy company X") and the "blind pool" ("Here's a billion dollars: let us help you buy a company"), and he financed the biggest corporate raiders—men like Carl Icahn and Ronald Perelman. And then, on September 7, 1988, things changed... The Securities and Exchange Commission charged Milken and Drexel Burnham Lambert with insider trading and stock fraud. Waiting in the wings was the US District Attorney, who wanted to file criminal and racketeering charges. What motivated Milken in his drive for power and money? Did Drexel Burnham Lambert condone the breaking of laws?

The Land of the Elephant Kings-Paul J. Kosmin 2014-04-21 Taking in the bulk of Alexander the Great's Asian conquests, the Seleucid Empire encompassed remarkable ethnic, religious, and linguistic diversity; yet it did not include Macedonia, the dynasty's ancestral homeland. Paul Kosmin shows how rulers over lands to which they had no historic claim transformed the territory into a coherent space.

The Last Kings of Shanghai-Jonathan Kaufman 2021-06 "In vivid detail... examines the little-known history of two extraordinary dynasties."--The Boston Globe "Not just a brilliant, well-researched, and highly readable book about China's past, it also reveals the contingencies and ironic twists of fate in China's modern history."--LA Review of Books An epic, multigenerational story of two rival dynasties who flourished in Shanghai and Hong Kong as twentieth-century China surged into the modern era, from the Pulitzer Prize-winning journalist The Sassoons and the Kadoories stood astride Chinese business and politics for more than one hundred seventy-five years, profiting from the Opium Wars; surviving Japanese occupation; courting Chiang Kai-shek; and nearly losing everything as the Communists swept into power. Jonathan Kaufman tells the remarkable history of how these families ignited an economic boom and opened China to the world, but remained blind to the country's deep inequality and to the political turmoil on their doorsteps. In a story stretching from Baghdad to Hong Kong to Shanghai to London, Kaufman enters the lives and minds of these ambitious men and women to forge a tale of opium smuggling, family rivalry, political intrigue, and survival.

What It Takes-Stephen A. Schwarzman 2019-09-17 NEW YORK TIMES BESTSELLER From Blackstone chairman, CEO, and co-founder Stephen A. Schwarzman, a long-awaited book that uses impactful episodes from Schwarzman's life to show readers how to build, transform, and lead thriving organizations. Whether you are a student, entrepreneur, philanthropist, executive, or simply someone looking for ways to maximize your potential, the same lessons apply. People know who Stephen Schwarzman is—at least they think they do. He's the man who took \$400,000 and co-founded Blackstone, the investment firm that manages over \$500 billion (as of January 2019). He's the CEO whose views are sought by heads of state. He's the billionaire philanthropist who founded Schwarzman Scholars, this century's version of the Rhodes Scholarship, in China. But behind these achievements is a man who has spent his life learning and reflecting on what it takes to achieve excellence, make an impact, and live a life of consequence. Folding handkerchiefs in his father's linen shop, Schwarzman dreamed of a larger life, filled with purpose and adventure. His grades and athleticism got him into Yale. After starting his career in finance with a short stint at a financial firm called DLJ, Schwarzman began working at Lehman Brothers where he ascended to run the mergers and acquisitions practice. He eventually partnered with his mentor and friend Pete Peterson to found Blackstone, vowing to create a new and different kind of financial institution. Building Blackstone into the leading global financial institution it is today didn't come easy. Schwarzman focused intensely on culture, hiring great talent, and establishing processes that allow the firm to systematically analyze and evaluate risk. Schwarzman's simple mantra "don't lose money" has helped Blackstone become a leading private equity and real estate investor, and manager of alternative assets for institutional investors globally. Both he and the firm are known for the rigor of their investment process, their innovative approach to deal making, the diversification of their business lines, and a conviction to be the best at everything they do. Schwarzman is also an active philanthropist, having given away more than a billion dollars. In philanthropy, as in business, he is drawn to situations where his capital and energy can be applied to drive transformative solutions and change paradigms, notably in education. He uses the skills learned over a lifetime in finance to design, establish, and support impactful and innovative organizations and initiatives. His gifts have ranged from creating a new College of Computing at MIT for the study of artificial intelligence, to establishing a first-of-its-kind student and performing arts center at Yale, to enabling the renovation of the iconic New York Public Library, to founding the Schwarzman Scholars fellowship program at Tsinghua University in Beijing—the single largest philanthropic effort in China's history from international donors. Schwarzman's story is an empowering, entertaining, and informative guide for anyone striving for greater personal impact. From deal making to investing, leadership to entrepreneurship, philanthropy to diplomacy, Schwarzman has lessons for how to think about ambition and scale, risk and opportunities, and how to achieve success through the relentless pursuit of excellence. Schwarzman not only offers readers a thoughtful reflection on all his own experiences, but in doing so provides a practical blueprint for success.

Black Edge-Sheelah Kolhatkar 2017-02-07 NEW YORK TIMES BESTSELLER • A riveting, true-life legal thriller about the government's pursuit of billionaire hedge fund manager Steven Cohen and his employees at SAC Capital—a revelatory look at the power and wealth of Wall Street ONE OF THE BEST BOOKS OF THE YEAR—The New York Times and The Economist • "An essential exposé of our times—a work that reveals the deep rot in our financial system . . . Everyone should read this book."—David Grann, author of Killers of the Flower Moon Steven A. Cohen changed Wall Street. He and his fellow pioneers of the hedge fund industry didn't lay railroads, build factories, or invent new technologies. Rather, they made their billions through financial speculation, by placing bets in the market that turned out to be right more often than not. Cohen was revered as one of the greatest traders who ever lived. But that image was shattered when his fund, SAC Capital, became the target of a seven-year government investigation. Prosecutors labeled SAC a "magnet for market cheaters" whose culture encouraged the relentless pursuit of "edge"—and even "black edge," which is inside information—and the firm was ultimately indicted and pleaded guilty to charges related to a vast insider trading scheme. Cohen, himself, however, was never charged. Black Edge raises urgent and troubling questions about those who sit at the pinnacle of high finance and how they have reshaped the economy. Finalist for the New York Public Library's Helen Bernstein Book Award for Excellence in Journalism • Longlisted for the Andrew Carnegie Medal for Excellence in Nonfiction and the Financial Times and McKinsey Business Book of the Year Award

The King of Oil-Daniel Ammann 2009-10-13 Billionaire oil trader Marc Rich for the first time talks at length about his private life (including his expensive divorce from wife Denise); his invention of the spot oil market which made his fortune and changed the world economy; his lucrative and unpublicized dealings with Ayatollah Khomeini's Iran, Fidel Castro's Cuba, war-ravaged Angola, and apartheid South Africa; his quiet cooperation with the Israeli and U.S. governments (even after he was indicted for tax fraud by Rudy Guiliani) and near-comical attempts by U.S. officials to kidnap him illegally. This sure-to-make-headlines book is the first no-holds-barred biography of Rich, who was famously pardoned by Bill Clinton, and resurfaced in the news during the confirmation hearings of Attorney General Eric Holder. The King of Oil sheds stunning new light on one of the most controversial international businessmen of all time, charting Rich's rise from the Holocaust, which he fled as a young boy, to become the wealthiest and most powerful oil and commodities trader of the century. From his earliest trading days to the present, Marc Rich's story is astonishing and compelling.

Private Equity as an Asset Class-Guy Fraser-Sampson 2011-12-01 Unfairly reviled, and much misunderstood, private equity differs from all other asset classes in various important respects, not least the way in which its fund mechanisms operate, and the way in which its returns are recorded and analysed. Sadly, high level asset allocation decisions are frequently made on the basis of prejudice and misinformation, rather than a proper appreciation of the facts. Guy Fraser-Sampson draws upon more than twenty years of experience of the private equity industry to provide a practical guide to mastering the intricacies of this highly specialist asset class. Aimed equally at investors, professionals and business school students, it starts with such fundamental questions as 'what is private equity?' and progresses to detailed consideration of different types of private equity activity such as venture capital and buyout. Rapid and significant changes in the environment during the recent financial crisis have prompted the need for a new edition. Separate chapters have been added on growth and development capital, as well as secondary investing. Newly emergent issues are considered, such as lengthening holding periods and the possible threat of declining returns. Particular problems, such as the need to distinguish between private equity and hedge funds, are addressed. The glossary has also been expanded. In short, readers will find that this new edition takes their understanding of the asset class to new heights. Key points include: A glossary of private equity terms Venture capital Buyout Growth capital Development capital Secondary investing Understanding private equity returns Analysing funds and returns How to plan a fund investment programme Detailed discussion of industry performance figures

Togo Mizrahi and the Making of Egyptian Cinema-Prof. Deborah A. Starr 2020-09-22 A free open access ebook is available upon publication. Learn more at www.luminosoa.org. In this book, Deborah A. Starr recuperates the work of Togo Mizrahi, a pioneer of Egyptian cinema. Mizrahi, an Egyptian Jew with Italian nationality, established himself as a prolific director of popular comedies and musicals in the 1930s and 1940s. As a studio owner and producer, Mizrahi promoted the idea that developing a local cinema industry was a project of national importance. Togo Mizrahi and the Making of Egyptian Cinema integrates film analysis with film history to tease out the cultural and political implications of Mizrahi's work. His movies, Starr argues, subvert dominant notions of race, gender, and nationality through their playful—and queer—use of masquerade and mistaken identity. Taken together, Mizrahi's films offer a hopeful vision of a pluralist Egypt. By reevaluating Mizrahi's contributions to Egyptian culture, Starr challenges readers to reconsider the debates over who is Egyptian and what constitutes national cinema.

The Age of Surveillance Capitalism-Shoshana Zuboff 2019-01-15 The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.
