<p>Blue Gold-Maude Barlow 2017-09-25 International tensions around water are rising in many of the world's most volatile regions. The policy recipe pursued by the West, and imposed on governments elsewhere, is to pass control over water to private interests, which simply accelerates the cycle of inequality and deprivation. California, as well as China, South Africa, Mexico and countries on every continent already face a crisis. This book exposes the enormity of the problem, the dangers of the proposed solution and the alternative, which is to recognize access to water as a fundamental human right, not dependent on ability to pay.</p>
<p>Water Gold Soil-Edward Morris 2019-04-10 Water Gold Soil: The American River tells the story of a single flow of water in present-day California from origin to end use. Beginning at the river's headwaters in the Sierra Nevada mountain range, the book follows the water through pipes and dams, past Sutter's Mill and the birthplace of the Gold Rush, to the corporate agricultural fields until it eventually disappears into the ground, finding veins in the soil. Including a short essay by Elizabeth Kolbert, the book brings together a series of narrative text, photographs, and archival images that represent the history of extraction in California and testify to the social and ecological consequences of watershed colonialism.</p>
<p>Gold in the Sky-Alan E. Nourse 2012-12-01 Acclaimed sci-fi author Alan E. Nourse offers up an exciting tale of treachery, adventure, and vast wealth in the novel Gold in the Sky. The story unfolds among the rarefied and rough-and-tumble crews who mine the surface of asteroids for valuable metals and minerals. Much like the lawless mining towns of the Old West, these groups are made up of rapacious types who will stop at nothing to strike it rich.</p>
<p>Golden Rules-Mark Kanazawa 2015-07-10 Water supply is an extremely contentious resource issue in California and the West. The framework currently used to resolve these issues, however, is based on the legal system that arose in response to the 1849 Gold Rush, and on which California and other Western states modeled their laws. In "Golden Rules: The Origins of California Water Law in the Gold Rush," Mark Kanazawa mines a vast cache of previously untapped historical sources both to tell the story of California's water laws and to shed light on how institutions and economies develop in relation to each other. The Gold Rush was a massive shock to the California economy and provides a unique opportunity in which to observe largely unfettered economic and cultural forces giving rise to rapid and dramatic changes in laws. Kanazawa draws on the latest scholarship in law and economics, property law, and new institutional economics, in combination with a great deal of evidence, to describe and interpret the water law doctrine that emerged from 1850s California. Seen through the lens of water development and property law, "Golden Rules" provides a coherent framework within which to understand much of what is observed in terms of institutional developments, and the activities governed by those, during the Gold Rush."</p>
<p>Gold in the Snow- 2014-04-23 Who among us hasn't treasured memories of yesteryear told to us by our 'elders'? Aleta Miller has gathered vignettes and woven them into a tapestry of life in a Sierra Gold Rush mining town exotically named Port Wine (near Whiskey Diggins and Poker Flat). She has captured the essence of California's pioneer spirit, mining nuggets of real life stories that lay buried under yesteryear's journalism: Two story deep snowdrifts compete with a mountain visitor in a Locomobile. Civil War politics blend in with birth pains of the new California statehood. Downhill ski races lift spirits of beleaguered residents of Port Wine and La Porte, also known as Rabbit Creek. Uncontrollable fires got reconstructed towns with diabolical regularity. In addition, we meet colorful characters who have touched the hills including Black Bart, Dutch Kate, Bret Harte, the Blue Lake Monster and Sasquatch. There is something for everyone in this delightful read. Aleta Farren Miller, as a young girl, became enamored of California gold country history during occasional visits to the Davis Motor Mine. The mine tunneled into a mountainside within a mile of Port Wine, CA. It was operated by Aleta's cousins Fred and Durward Davis and produced a modest quantity of gold. Aleta was enchanted by the remoteness of the location as well as by the surroundings which have changed very little over the last 100 years. Passing encounters with "old timers" and whimsical poetry adorning grave sites in the Pioneer Cemetery stimulated a growing interest. Many of her relatives and even a pet parrot are buried there. With the help of her mother, Rilla Farren Cross, other family members, the archives of Bancroft Library at U.C. Berkeley, and The Mountain Messenger Newspaper at Downieville, CA, the interest culminated in Aleta investing almost a decade undertaking this collection of what now may be classified as journalistic memorabilia. We are indebted to her instinctive ability to sort out and preserve this remarkable collection of memories. Her own background and personal experiences make her uniquely capable of understanding and synthesizing the insight that she gained from that time in California history.</p>

<p>The Gold Hunters-James Oliver Curwood 2015-07-06 This early work by James Oliver Curwood was originally published in 1909 and we are now republishing it with a brand new introductory biography. "The Gold Hunters" is the second in the series that related the story of friendship and discovery between Roderick Drew, Wabigoon and Mukoki in North America. Curwood cleverly allows the reader to view the wilderness through the eyes of both the hunter and the hunted. James Oliver 'Jim' Curwood was an American action-adventure writer and conservationist. He was born on 12th June, 1878, in Owosso, Michigan, USA. In 1900, Curwood sold his first story while working for the Detroit News-Tribune, and after this, his career in writing was made. By 1909 he had saved enough money to travel to the Canadian northwest, a trip that provided the inspiration for his wilderness adventure stories. The success of his novels afforded him the opportunity to return to the Yukon and Alaska for several months each year - allowing Curwood to write more than thirty such books. Curwood's adventure writing followed in the tradition of Jack London. Like London, Curwood set many of his works in the wilds of the Great Northwest and often used animals as lead characters (Kazan, Bare; Son of Kazan, The Grizzly King and Nomads of the North). Many of Curwood's adventure novels also feature romance as primary or secondary plot consideration. This approach gave his work broad commercial appeal and helped drive his appearance on several best-seller lists in the early 1920s. His most successful work was his 1920 novel, The River's End. The book sold more than 100,000 copies and was the fourth best-selling title of the year in the United States, according to Publisher's Weekly. He contributed to various literary and popular magazines throughout his career, and his bibliography includes more than 200 such articles, short stories and serializations. In 1927, while on a fishing trip in Florida, Curwood was bitten on the thigh by what was believed to have been a spider and he had an immediate allergic reaction. Health problems related to the bite escalated over the next few months as an infection set in. He died soon after in his nearby home on Williams Street, on 13th August 1927. He was aged just forty-nine, and was interred in Oak Hill Cemetery (Owosso), in a family plot. Curwood's legacy lives on however, and his home of Curwood Castle is now a museum.</p>
<p>The Gold of Scapa Flow-Dr Donald T Fairburn 2016-07-02 Located just north of Scotland, the Orkney Islands surround a huge sea basin called Scapa Flow, which is an anchorage that served as the United Kingdom's chief naval base during both World Wars. As one might expect from its location, it truly is a desolate place. But this is made up for by sunsets that paint the evening clouds with a golden pink that can make even a stranger want to stay. And then the sky comes alive at night with a wondrous display of the Aurora Borealis, whose luminescent swirls of green electrons can make that same stranger slightly afraid to stay in its presence. But of greater significance is its history. It is the dramatic history of Scapa Flow that makes it the geographical focal point of this story. And while history is more fascinating than conjecture, fiction has the ability to convey historical events in a way that makes them more understandable and memorable. This is what The Gold of Scapa Flow does for events that span the First World War, the fascism of Hitler's Third Reich, and the birth of modern Israel. The main character is Neil McKenzie, a simple man of the Orkneys who earns his living as best he can selling real estate and running a boat charter service. For him, an ideal life would be to simply live on the shores of Scapa Flow making enough money to provide for his needs with just a bit left over for an occasional want. But his life suddenly takes an adventurous detour through greed and deception before his ideals are finally restored.</p>
<p>Rivers of Gold-Brent M. Haddad 2000 The movement to implement market-based approaches to allocating water is gaining ground across California and in other western states. In Rivers of Gold, Brent M. Haddad explains the concept of water markets and the economic theory undergirding them. He shows how some water markets have worked -- and others have failed -- and gives the reader the analytic tools necessary to understand why. Rivers of Gold is the first book to provide a detailed examination of water markets and the institutional design issues associated with them. Copyright © Libri GmbH. All rights reserved.</p>

<p>Goering's Gold-Stan Morse 2014-08-12 In 1934 Hermann Goering was flying high as the Nazis came to power. Knowing Hitler's radical plans were a gamble, he smuggled a nest egg of three tons of gold to America, embedded in hydroelectric pipe destined for a project in the Pacific Northwest. When the Third Reich fell in 1945, the Russians seized Goering's papers and put them in storage, where they remained until a former KGB officer rediscovered them during a routine audit in 2001. In that same year, America's finest assassin, Jerry Dearborn, was lost when a Cuban MiG jet shot down his jet over the Caribbean. A dead Jerry became a convenient scapegoat for U.S. embarrassment over a botched assassination on the Yucatan Peninsula. What the government's covert assassination squad-the Foreign Intervention Coordination Office (FICO)-didn't know was that Jerry was not on that jet. Now in hiding, and encamped near the same hydro project where Goering's pipes were installed, Jerry is involuntarily drawn into a struggle between forces seeking the lost gold. If FICO learns he still lives, Jerry's days will be numbered. Stan Morse is a lawyer, author, keynote speaker and motivational presenter for kids, living in Washington State. The inspiration for Goering's Gold came from his discovery in 1976 of swastikas cast into pipes at a local hydroelectric plant. The novel's cover was created from an actual photograph of one such pipe. This story, unlike the photo, is pure fiction. Maybe . . .</p>

<p>Red Water, Black Gold-Margaret A. Bickers 2014 Red Water, Black Gold: The Canadian River in Texas 1920-1999 tells the story of the Canadian River in the Texas Panhandle. It is a tale of grand designs, high hopes, deep holes, politics, fishing, follies, foibles, and environmental change. Although efforts had been made to tap the Canadian River's waters before 1920, the discovery of oil in the Panhandle gave new urgency to the search for permanent water supplies. Additionally, the spread of groundwater irrigation amid the discovery of the limits of Ogallala Aquifer spurred regional interests to tap the Canadian. But overestimates of the river's flow and unfamiliarity with the critical role groundwater played in maintaining that flow led to complications and frustrations, culminating in a lawsuit over the location of the banks of a seemingly waterless river. This book is a valuable addition to the water history of Texas and the American West and to the growing body of worldwide regional water histories. Combining traditional historical sources with hydrology, climatology, and geology, Red Water, Black Gold complicates the traditional story of top-down water management as well as telling the thus-far untold story of the Canadian River in Texas.</p>
